To Take **Business Census Here**

New York - The Government announces that it is preparing forms, which will be sent to business firms in Franklin County later this year, in connection with the forthcoming 1963 Economic Census.

This is a periodic inventory, conducted by the Department of Commerce. It covers retail trade, wholesale trade, the service industries, manufactures, minerals and transportation. The last such survey was made

As in the past, local business men will be asked about their payrolls, number of people employed, hours worked, sales volume, and what is new this time, a breakdown of sales by broad merchandise lines.

What will the census show as to Franklin County? What economic changes have taken place locally since the last such survey was taken.

The answers are important to the merchants and manufacturers themselves, as well as to others who need such information to measure product demand and to set plans for future inventory requirement.

Franklin County's figures will show, according to unofficial estimates, that considerable progress has been made since the 1958 census, which reported local retail trade for that year at \$13,882,000. Before that in the 1954 census, it was \$11,392,000.

which indicate the rate of growth since then, the 1963 total is expected to be in the neighborhood of \$20,029,000. This would be a five-year increase of 44.2 percent.

The local service industries have been moving ahead rapidly. From a volume of \$553,000 in 1954 they rose to \$999,000 in 1958. This year, allowing for the same rate of growth, they will reach an estimated \$1,872,000.

The Government states that, while it is mandatory to fill out the questionnaires, the re- present administration. for any investigation purposes.
