Soybean Outlook Good, Dean Says

Will soybeans fit into your farming operation? If so, I believe it is a crop that will make up for any reduced income you may have because of the ten percent acreage reduction in tobacco.

The outlook for soybeans appears to be good in 1964. Listed below are seven steps to 50 bushels or more soybeans per acre:

- I. Field Selection:
 - A. Work soybeans into your crop rotation program. Prepare land for soybeans by obtaining a soil test and following good management practices.
 - B. Avoid planting soybeans following peanuts, or soybeans. Why? Diseases--Southern Stem Rot.
 - II. Have your Soil Tested:
 - A. Obtain a soil sample in the fall or early winter. Ad-

just the recommendations to your conditions.

B. If lime is needed, apply Dolomitic limestone 3-6 months prior to planting. Disk it into the soil before plowing. Break land 8-10 inches deep being careful to bury all residue of previous crop.

C. Use fertilizer as recommended--soybeans require phosphorus and potash. As a general rule soybeans remove the equivalent of 400 pounds of 0-10-20 per acre. Place the fertilizer in a band 2 1/2"-3" to side and 1 1/2" below seed. If fertilizer is to be broadcast, use 10 to 20% more. On soils very low in phosphorus and potash, broadcast superphosphate and muriate of potash and work into soil before planting.

III. Use High Quality Seed:

- A. Buy only tested seed of high germination and purity. If in doubt, have a TZ test.
- B. Use adapted variety.
- C. Treat seed with Thiram 50 dust (2 oz/bu), Thiram 75 (1 oz/bu), or Captan 75 (1 1/2 oz/bu).
- D. Plant 9-10 seeds/ft. of row 1 1/2" deep in 36-42" rows. In 24" rows, plant 5-6 seeds/ft. Never plant more than 50 lbs/A of any variety unless broadcasted or drilled. Thick plantings result in increased lodging.
- E. Inoculate seed prior to planting even on land grown to soybeans recently--a cheap form of nitrogen.
- F. May 1 to May 30 is the best time to plant full season beans (Hill, Hood, Lee, Jackson, or Hampton). Use only the late maturing varieties (Lee, Jackson, or Hampton) for plantings made later than June 1. Select variety on basis of when the first frost normally occurs. Hampton and Jackson are too

late for most of the Piedmont.

IV. Management: (Don't plant soybeans in a deep furrow)

- A. Use rotary hoe for first cultivations. Control weeds early!
- B. Cultivate shallow and as often as needed to control weeds and grass. Avoid pushing soil up around the stems to decrease the possibility of Southern Stem Rot.
- C. If necessary, use chemicals to control weeds, particularly cocklebur. Follow the manufacturer's directions carefully.
- V. Control insects:
 - The recommendations given in the 1964 Pesticide Manual for soybean insect control are being reviewed. As soon as this is cleared up the recommendations will be announced.

VI. Disease Control:

- A. Resistant varieties (Hill, Hood, Lee and Hampton). See "Soybean Varieties-1964" for more information.
- B. Rotation. Do not plant soybeans following peanuts or soybeans.
- C. Seed treatment--see Step III-C.

VII. Harvesting:

- A. Harvest as soon as soybeans are dry enough to combine (14% moisture). This reduces harvest loss.
- B. Make sure your equipment is properly adjusted.
- C. Keep records.
- D. Store if possible--prices are always lowest as harvest. In case of problems or need for further information, contact your agricultural leader or educational agencies.

SCIENCE FACT & FABLE

PEOPLE HAVE TRIED AN AMAZING VARIETY OF "CURE-ALLS" TO OVERCOME THE SNIFFLES. ENGLISH PHILOSOPHER GEORGE BERKELEY SLEPT WITH A BARREL OF TAR WATER IN HIS BEDROOM FOR GOOD HEALTH.

ANOTHER FAMOUS OLD REMEDY REQUIRED A PERSON TO CATCH A FALLING LEAF IN AUTUMN BEFORE IT TOUCHED THE GROUND TO AVOID COLDS IN WINTER.

TODAY SCIENCE STILL HASN'T ALL THE ANSWERS, BUT FOR GOOD ADVICE, GET SUFFICIENT REST, DRESS PROPERLY, AND TAKE DECONGESTANT COLD CAPSULES, SUCH AS CORYBAN-D, TO RELIEVE THE SYMPTOMS OF WINTERTIME MISERIES. DRINK PLENTY OF LIQUIDS, TOO.

Social Security Notes

Clay Stone of social security in Franklin County asks: "Are you planning to retire soon? Do you keep putting off inquiring about your social security status? If so, do you know what documents will be needed when you apply? Don't depend on your neighbor's recollection of what he was asked for--his situation may not apply to you."

Resolve today to prepare for your eventual retirement and inquire before you retire. Generally, you will need the following:

1. Proof of your age.
2. Evidence of earnings--if you work for wages, your Form W-2, Withholding Tax Statement, for the year before you apply; if you have your own business, a copy of your complete Federal income tax returns for the past year and the cancelled check showing payment of the social security tax will be needed.
3. If your wife is applying at the same time, she will need proof of her age.

Plan to make application at least 60 days before your actual retirement.

ATTENTION ALL FRANKLIN COUNTY REPUBLICANS

There will be a Republican County Convention in the Franklin County Courthouse April 25, 1964 at 8:00 P.M. All Republicans are urged to attend this meeting at which a County Executive Committee will be elected.
