## This Is Soup Weather

We are certainly at the height of the soup season. The soup kettle, in most American homes has given way to the can of bought soup. Although there are many fine canned soups, it is hard to beat a great big bowl of "home made" vegetable soup.

Besides, if you want to save money and at the same time, serve tastier meals preparing old-fashioned soups is one way to do this.

If you are interested in saving money on your food budget, you can have soup once a week. Save meat stock. Add to it the bones from chicken or any fowl, chop bones, roast bones, and other meat bones. Also, any water from cooking vegetables.

Cook this mixture down until it is rich and flavorful. It can be used as a base, not only for soups but stews and cooking vegetables.

This stock pot should be boiled up once a day. In the old days great grandmother kept a stock pot going on the back of the stove all the time.

It is possible to make an excellent stock with 2 pounds of skin meat with bone. Add a beef bone and for extra flavor a veal or beef knuckle. The knuckle is filled with gelatin and adds both texture and flavor.

There are endless varieties

of soup. Some are perfect served before a meal. Some are cold, thin or thick. A favorite for this season is the "all-in-one" soup. This soup is made with vegetables and good stew meat. It is thick and nourishing and needs only bread, salad and a dessert to accompany it to be a luncheon fit for a king or any "hard-to-please" husband.

Moore--"Did I understand that you bought this house for a song?"
