What A Difference **Good Fertilizer Can Make** And FCX Fertilizer Is Better

Just about the best investment a farmer can make is good fertilizer because the collars spent for plant food are returned many times over in better yields and higher quality crops. But not all fertilizers are alike . . . some give you more for your money. Such a fertilizer is that bearing the FCX trademark. Farmers over the Carolinas recognize this familiar triangle as a symbol of quality and performance. Use it on your crops this year . . . and see for yourself what a difference a good fertilizer can make.
