Walk up and down a flight of stairs with a book on my head? You have got to be kidding. It's enough of an effort to begin with, even without a book.

If you are a so-called normally healthy person and you still concur with the previous statement, then it may be your posture. If you carry yourself correctly, it shouldn't require much more effort than walking on a flat surface.

If you lie flat on your back, on the floor, and then draw your legs up till the soles of your feet rest on the floor and you're still uncomfortable, then it's reasonable to assume that you're bent out of shape.

When you make it a practice to stand, sit, and walk in an upright position, you will find that you just feel better generally.

It really takes little more effort than just reminding yourself to straighten up and soon you will have formed some good habits and gotten rid of the bad ones.

Come, see our modern reducing equipment. While here, take advantage of our wig and wiglet sale. Beautiful handmade 100% human hair. Have yourself a new look from top to bottom. Feel and look like a new you.
