

### Gold Sand Club Meets

Gold Sand Woman's Club met Monday night, March 17, with Mrs. A. B. Alston with 14 members present.

Minutes of last meeting were read and approved.

Eula Cassell suggested that get well cards be sent to members and their families when they are in the hospital.

Guests of the Club were Col. and Mrs. Bill Outlaw from Fayetteville and Richard Alston.

Mrs. Outlaw gave the devotional. She read portions of scripture concerning the approaching Easter season and gave thoughts on our Christ and His resurrection, closing with prayer.

Richard Alston led the group in the pledge of allegiance to the flag.

Col. Outlaw gave a short talk on the John Birch Society and showed a film giving the five plans for attacks used by the communist in taking over a country.

Mrs. Alston served delicious refreshments.

### Thanks

To our many friends and neighbors we express humbly our sincere and deep felt appreciation for the many deeds of kindness and sympathy shown during the recent death of Arthur W. Goswick of Williamsburg, Virginia.

### CANDYTUFT

Giant Hyacinth-flowered candytuft is a representative of the upright, rocket type.

The flower we know as Candytuft is named for the place of its origin, the Island of Candy, now the Greek island called Crete.

The last syllable of the name describes the tufted flowers.

There are two species of annual candytuft grown in gardens: one known as rocket, the other as globe candytuft.

The rocket type, which you will find in catalogs and seed displays under variety names of Giant Hyacinth-flowered, Iceberg, Empress, White Pinnacle, has only white flowers but they are delicately scented. The varieties mentioned grow from 18 inches to two feet tall.

Globe candytufts, called for their globe or dome-shaped plants, have no fragrance but have colored flowers.

These may be pink, rose, carmine, crimson, lavender or white.

These plants are lower-growing than those of the rocket candytufts and can be used in large masses for an overall colorful effect.

Magic Carpet and Fairy are mixtures of all the bloom colors named.

Both types of candytuft share a liking for cool weather and both exhaust themselves by producing too many flowers.

For this reason it is advisable to sow seeds at 3-week intervals and thus keep new crops of blossoms coming along.

### WOMEN SUFFER WITH BLADDER IRRITATION

Common Kidney or Bladder Irritations affect twice as many women as men, often causing tenderness and nervousness from frequent, burning, itching urination. Secondly, you may lose sleep and have headaches, backaches and feel older. If you are depressed. In such cases, CYSTEX usually brings relaxing comfort by curbing germs in acid urine, and easing pain. ### Backache, Posture Go Hand In Hand

There is convincing evidence that backache is usually traceable to bad posture habits. After these habits are formed, the body adjusts itself to the condition but the spinal column cannot function well when it is tilted to an unnatural degree. Edges that were meant to be cushioned from one another by cartilage, meet and scrape. This, in time, causes pain and makes standing erect almost unbearable.

Most of these poor posture habits are formed in youth. In school and while working homework after classes, the child sits at a flat-topped desk, hunched over and leaning close to his work. The heavy books most students are required to carry are enough in many cases, to cause bad posture in itself.

In the interest of good posture and improved health desks should have tilted writing areas and flat margin areas above for reference books, pencils and paper. Seats should have contour backs and foot pedestals.

By the time one reaches his late teens, his posture habits have been molded. The male, who is less conscious of his appearance than the female, tends to slump at work or when standing. The female is usually conscious of her posture during adolescence. However, after marriage and a family, there are usually so many things to think about she often slips into bad posture habits.

When standing correctly the spinal column is designed to be in a straight line. There are segmented curvatures to provide flexibility and absorb stress from the base of the
