Exposition Notes.

. The meeting of the backmen held last Tuesday night resulted in establishing the following rates: From the depots to the railroads. From various points in the city to the exposition grounds by carriage will be charged; and from various points it the city to the exposition grounds by back, spring or Jersey wagon a rate not exceeding 2 reents will be charged. From the N. C. and Raleigh & Gaston railroad depots a rate not exceeding 50 cents for one horse, or \$1 for two horse drays will be charged on all freight carried to the ground.

The meeting of the directors Wednesday was well attended and quite satisfactory Major Robert Bingham has donated \$50 o the educational building fund. Among the recent applications for space

s one from O. S. Causey, of High Point for sufficient room to run two plaid looms, and one from Messrs. Goodell & Waters, of Philadelphia, the well-known manufacturers of wood-working machinery, for a space 47x32 feet in which they propose to operate thirteen machines. There is an application from the Plymouth iron works, Plymouth N. C., for space for engines, shingle ma chines, etc. The officers of the exposition are now in correspondence with the Newark Machine company, of Newark, Ohio, closing an arrangement by which the above company will exhibit and operate one of their celebrated clover hullers. This will give a most excellent opportunity for the people of the State to see that North Caroina should raise her own seed and how easily it can be accomplished with a little

work.

The officers of the exposition have now a full line of the various floor plans, &c., of the different buildings. They are anxious to fill the entire space at as early a date as possible, and we wish to impresss upon our readers in Raleigh particularly the following idea. A number of applications are coming in constantly for a line of goods that will not aid materially in developing our State, and which are not sold throughout the State generally. If the merchants of Raleigh would furnish the exposition company with the names and addresses of the various houses North and South with which they deal, the officers would take great pleasure in furnishing these particular houses all possible information on the subject. Furthermore, a letter directly from the merchant here would have more effect with firms selling goods in this market than a number of letters would from the Exposition company. They would be glad to receive at an early date a list from each and every merchant in the city of Raleigh of such northern firms as they are accustomed to deal with.

Important Notice to Countles. All counties proposing to make exhibits are earnestly requested to make application for space before July 21st, and counties which do not apply before that will have to take such space as may then be left. Collectors of county exhibits are requested to exclude from their county exhibits all displays that are personal in their character.

Very particular attention is directed to the advertisement in regard to the lease of 'privileges" at the State exposition, which appears elsewhere.

Colored Boy Drowned and Another Boy Aircated for Snoving him Over-board.

[Wilmington Star.]

A small boy, between 7 and 8 years of age, named Willie Smith, a son of Green Smith, a well known colored man of this city, went in bathing Sunday afternoon and was drowned. There were other boys in bathing with him, and it was reported that one of them shoved him overboard. and thus was the cause of his death. A warrant was issued Monday for the arrest of one George Chapman, aged 12 or 13 years, who was eard to be the boy who did the shoving. The case was tried before a magistrate, who ordered that the boy be recognized, with security, in the sum of \$100 for his appearance at the same place on Saturday next, by which time the body will probably be found, the coroner's inquest held and possibly further developments be made.

A Marder Story Disproved,

[Wilmington Star.] A week or two ago we published an item in reference to an alleged case of child murder at or near Tar Heel, Bladen county, in which two colored children. aged respectively 5 and 7 years, were represented to have killed their three-year old brother and thrown the body into the river. We gave the information as we received it from undoubted authority. Since then it has been ascertained that no such bloody and tragical event occurred, and it was in this wise that the bloodcu-dling story got started : It seems that the three children were off in the woods picking berries. The little one was left in the road while the older children went off a short distance where the berries were more abundant. Upon their return the child had strayed away and they could not find it. They returned home without it, and upon being questioned by their parents it was found difficult to get a satisfactory answer. Finally they commenced whipping them to make"them tell where the little one was, when, in their ignorance. they concected the story of the murder. It had the effect to relieve them from further chastisement for the time being, for the parents were almost paralyzed with horror, and were more interested in recovering the lifeless remains of the victim than (just then) in punishing them for the crime. Their search, however, was in vain, for the dusky waif was subsequently discovered in an apple orchard four miles from the spot where it disappeared, and when found was devouring an apple with
