Notes of the Earthquake.

INCIDENTS OF THE GREAT PHENOMENA AT CHARLESTON AND NEAR BY.

Book cases which were facing north and south felt towards the south, which indicates that the force of the shock there was from the south, not from the BNERGETIC STEPS TAKEN TO RELIEVE north as the News and Courier says. Summerville, where the earthquake was most violent, is a summer resort of Charlestonians. Its summer population numbers some 3,000, it is said. Tho consternation and dismay were so great in Summerville that the people clamored loudly to be taken away from the scene of what was to be, as they thought, their certain destruction Accordingly the railway Thursday placed at the disposal of the citizens a train composed of five coaches and three box cars, which carried away to Columbia about three hundred people. The news received in Summerville, however, to the effect that the shocks were prevalent in nearly every place, will possibly prevent any further exodus from the town.

A News and Courier correspondent on James island, very near Charleston. says: Reports from every portion of the island have been received and not s casualty is reported In hundreds of places the earth opened in long cracks, from many of which large bodies of cold water mixed with sand and blue mud gushed out. These cracks appear principally in low places. The entire population of the island passed the night out of doors or in their piazzas. The clocks all over the island have been stopped at ten minutes to 10. The correspondent was in a small row-boat about a quarter of a mile from shore. with a number of ladies. The boat was drifting and the rumbling roar could be heard distinctly coming from the sea before any shock was felt; then the keel of the boat seemed seized by a mighty hand and violently shaken from side to side, producing a feeling closely approaching sea sickness in all the occupants.

At Charleston the true shocks of earthquake can be readily distinguished from other vibrations by the feeling of nausea they cause. It is a perfect

On Wednesday morning a reporter of the News and Courier, owing to the very highly colored accounts that were current of a great loss of life in the section of country between Charleston to investigate the rumors. The first real indication of the earthquake beyoud the city were found at Disher's farm, not far from the carriage road, There the appearances were that there had been an eruption all over the farm.

A correspondent at Yemassee wrote the News and Courier that the first shock made it difficult to walk. When the severity subsided a perceptible vibration of the building from east to west could be perceived. In about five minutes his attention was attracted by a deep lumbering sound like the approach of a freight train, when in about a minute another vibrating fit seized the building and rocked it furiously again for a minute or so, but with less severity and tumult than at first. This was followed at intervals of ten minutes, each lessen ing in severity, till seven distinct shocks were experienced. The sound did not appear to travel with great rapidity. having somewhat the nature of distant thunder. He thought the vibrations were vertical; in other words that the pressure was directly underneath.

It was reported at Charleston Thursday that Tuesday night a wave of conaiderable height advanced up the Cooper river and overflowed not only the banks of the river but the country interiorly for about a mile. The statement was thade to a reporter at Ten Mile Hill by a number of colored people who said that they had seen the overflow or freshet as they called it. The depth of the wave that inundated the country was not great, inasmuch as little or no dam-

age was done to persons or property. The News and Courier asserts that in Charleston the motion north and south was probably the most decided, but there are abundant evidences of a cross wave at right angles to it, and indeed at every angle. A circular motion was also indicated, in some striking instances, by the manner in which pieces of furniture were turned partly around, while the direct wave motion was throwing other articles down in the line of the wave. Many things were literally twisted out of place. In one case, of two globes that overhung the jets in a large gas chandelier, one fell and was broken, it being the western one in position, while its mate and similar globes in the house escaped injury. In Sum-

with their faces to the wall. The old family mansion of the Pringles, rendered familiar to readers in all parts of the Union by the description; and illustrations in the Century magahine about two years ago, stood the shock well. Apparently the walls are great bargains in suspenders and braces at 26 | not cracked, and but little plastering fell, although some of the valuable, china relies fell and were broken. In city. the yard, strange to say, the water from the well came up like a waterspout, overflowed the yard, and deposited six one at 9 a. m. Another slight shock B. F. Let's for the relief of the people of Charleston.

BRIGHTER DAYS.

THE PEOPLE OF CHARLESTON EMERGING FROM THE GLOOM.

DISTRESS AND SET TO RIGHTS.

CHARLESTON, Sept. 4 .- The shock last night caused great alarm on account of the condition of the nerves of the people. Those people who had ventured back under their roofs hurried into the streets, which presented for a few moments as tragical an appearance as Tuesday night But little actual harm was done by the shock. Two untenanted houses are reported to have fallen, together with part of the coping of the Charleston hotel. The vibration during the shock was not especially great, but the moaning and howling sound was sufficiently alarming. Gradually the people had come to the conviction that the shocks were at an end and the disappointment was agonizing. The sensation today is the falling of showers of pebbles in the lower part of the city. The first fall was at half past seven e'clock this morning and the second at about 11 o'clock. They appeared to fall in a slanting direction, from the south to the north. There are morsels of flint among them, and all are plainly

abraded and worn by the action of water. Some few have sharp fractures and and have evidently been recently broken. The fact of their fall is vouched for by several trustworthy persons. The bulk of the pebbles fell in and around the News and Courier office.

CHARLESTON, S. U , Sept. 4 .- The bar or harbor of Charleston has not been affected by the earthquake. Soundings teken Wednesday show seventeen and a half feet of water in the south channel, one hour before high water; and in Pumpkin Hill channel sixteen and a half feet of water. There is absolutely no deterioration. There is no truth in the report that the bridges across the Ashley river have fallen.

CHARLESTON, S. C., April 4 - Samuel Hammond, who was reported as dangerously injured and dying, is now doing well. His leg, however, is fractured and he has many severe contusions. The feeling today is decidedly more cheerful and a better tone naturally pervades the community. It is difficult to give any precise reason for this, but it is the fact. Workmen are at work upon the injured buildings, putting them in order and as much as possible is being done to protect the interiors from rains which are expected. Another element which increases the confidence is the organization today of a strong relief committee, which will take entire charge of the provision of food, of clothing and quarters as far as necessary for those who have suffered by the earthquake. A considerable number of tents has been received from the government ard others are expected tomorrow. The orphan house, almshouse and both the Catholic orphan asylums have been prowided with sufficient shelter. An encampment for other refugees, in military style, is now being formed on South Battery. There will be an encampment for colored refugees on Marion square. It can be confidently asserted that this work of the committee will be systematic and judicious and that all funds at their disposal will be properly ap-

WASHINGTON, Sept. 4-The following dispatch was received here this morning from the manager of the Augusta, Ga., office of the Western Union telegraph

Augusua, Ga., Sept. 4th. "All of our wires are o. k. this morning. Business is extremely heavy. The shock last night has upset everybody again and we all feel more or less nervous. We have had but little sleep or rest since August 31."

NEW YORK, September 4.-The following bulletin was posted at the office of the Western Union telegraph company here this morning: "Charleston, S. C., September 4th. Last night's shock has greatly impaired confidence The slightest noise, such as the jarring of a door, will empty any house of its inhabitants. It is still very difficult to deliver telegrams, as few people can be found at their usual places. At 5 o'clock this morning the Western Union elegraph company succeeded in clearing up its business with all cities, for

the first time since the earthquake." SAVANNAH, Ga., Sept. 4.-Since last night's shock slight vibrations have been felt in the upper stories of the Morning News building almost continuously, the intervals between them varying only from five to ten minutes merville the curious feature was noted at most. While there was a general of the pictures in a room being turned stampede at the first shock, the editorial and typographical forces nevertheless returned to their posts and stuck to them. The building is the highest and

> largest in the city. PITTSBURG, Pa., Sept. 4 -A slight earthquake shock was felt at Tewickley, Pennsylvania, twelve miles west of this The shock was not perceptible in this week.

Augusta, Ga., Sept 4 .- Two slight shocks were felt today, one at 6 36 and

For Congress.

Montgomery, Ala., September 4.- Cleveland and had been confirmed by

A Postoffice Offering: Washington, September 4.- Today

The hydrographic office has received a letter from Capt. Leo Vogel, of the steamer City of Palatka, briefly describing the effect of the earthquake at sea. He had just left Charleston and was about thirteen miles off the harbor of Port Royal, in 81 fathoms of water, when he "experienced a terrible rumbling sensation," which lasted 11 minutes. There had been quite a heavy sea from the southeast, but when the rumbling began the wave motion ceased

and the water remained perfectly calm until the rumbling ended, when the swell was again manifest. The wind was southeast and light, the weather was cloudly, barometer 30.01, thermometer 80. The sensation, Capt. Vogel says, resembled that upon a ship scraping a pebbly bottom. The ship'

vibrations were very great. More Shelter Needed. WASHINGTON, Sept. 4.-In response to an application from the authorities at Charleston, Lieut, F. V. Abbott, of the corps of engineers, now stationed there. has been instructed to consult with the mayor and render such assistance in the examination of buildings and otherwise as may be in his power, and Capt. Bixby, of the engineer corps, has been ordered from Wilmington, N. C, to Charleston, for similar duty. The war department has sent about 100 tents to Charleston, and this exhausts the supply on hand; Requests have today been received for unable to comply.

Ready to Aid. ing that the chief damage was to the mayor of Charleston, who was expec-. ted to be in the city tomorrow, and ascertain if his people were really in need of assistance, in which case subscriptions would be at once opened. The following has been received at the petroleum exchange from the acting mayor of Charleston : "We are thankful for any aid in the shape of money."

New York's Gift. has been sent A. W. Taft, president of the cotton exchange at Charleston, by the chairman of the New York cotton exchange: "Draw on us for \$5,000 for the relief of the sufferers. We will send you more as fast as subscribed. Dr. Simonds, of the First national bank, says his bank will cash your draft." The committee appointed as managers of the New York cotton exchange to solicit subscriptions will receive and transmit free of charge any moneys raised for the benefit of the Charleston sufferers. The smount subscribed to date at the cotton exchange is about \$5,500.

A Very Queer Effect of the 'Quake. WASHINGTON, D. C., Sept. 4 .- A curious effect of the earthquake has been discovered at the signal office. A selfregistering wind vane shows a horizontal mark preceding and subsequent to the shaking, denoting a mild, steady, almost invariable breeze; but for the thirty or forty seconds of the most violent shaking the marks indicate that the pencil point was moved up and down the paper many times and with great rapidity. An explanation of this phenomenon is difficult to reach. This is the only instrument at the signal office which seems to have been affected by the earthquake.

The Shock at the Light Houses.

WASHINGTON, D. C., Sept. 4 .- The light-house board has received a report from Charleston to the effect that the main tower of the Morris island light is cracked near the third landing from the ground and that the floor in the wasteroom upon which the lens rests is somewhat loosened. Romain light and tower have been seen since the earthquake and are supposed to be all right. The lens at Bull's bay light-house has been thrown off its pedestal.

A Fire at Petersburg, Va. PETERSBURG, Va., Sept. 4.-A fire this morning destroyed the tobacce exchange building, the ground floor of which is occupied by E. R. Beckwith & Co., as a drug store. The total loss is \$25,000. The tobacco exchange has an insurance on the building of \$12,000 and Beckwick & Co. of \$7,750. Chief of fire department P. H. Curtis was severely injured by falling bricks.

New York Cotton Futures. NEW YORK, Septe mber 4 .- Green & Co.'s report says: Public and private advices from Liverpool tended to confirm the chances of a flurry on September options and our market responded with a firmer tone. Some three to four points were gained and maintained to the close. Business was light, however, and did not appear to extend becity, last night at 11.05, standard time. | youd some traders settling up for the

> Death of a Noted Tennesseess. NASHVILLE, Tenn., Sept. 4 .- Gen. erate general, and postmaster here. died here today. He was appointed postmaster at Nashville by President

> > Bank Statement.

New York, Sept. 4 .- The weekly statement of the associated banks is as follows: Reserve increase, \$132,275; loans decrease, \$322,600; specie increase, \$1 676,200; legal tenders decrease, \$2,523,200; deposits decrease; \$3,441.100; circulation increase, \$78. 900. The banks now hold \$6,920,425 in excess of the 25 per cent. rule.

A NEW THEORY

WHICH PROF. MCGEE ADVANCES AS TO THE EARTHQUAKE.

HE ASCRIBES IT TO A VAST LANDSLIDE -- SOME PUZZLING FEATURES.

CHARLESTON, S. C, September 4 -Prof. W. T. McGee, of the U. S. geological survey, went to Summerville yesterday to investigate the immediate or remote causes of the earthquake. He stopped at Ten Mile Hill station, around which the earthquake was particularly active, and paid especial attention to the water which was thrown up from the craters, which are numerous through a belt of county extending from . Disbeer's farm, about four miles from Ten Mile Hill, north and south and likewise east and west for an indefinite distance along the seacoast. Prof McGee collected specimens of soil and mud which had been thrown up and samples of the water which flowed from the fissures, taking particular note of the cavities on the farm of Charles Lee, the largest of which is about sixteen feet square and sixteen feet deep. At Summerville Prof. McGee continued his investigations and talked freely with gentlemen there. One of these gives the News and Courier a sketch of Prof McGee's statement. Prof. McGee said that the ornamental work and "gingerbread" work about 500 more, but the department is in Charleston was in many instances out of the earth was very perceptible, but of proportion to to the size of the build- not nearly so severe as that felt Tuesday ings, and these parts would be night. There was not as much exciteant to fall and carry away por-NEW YORK, September 4 - The chair- tions of the general structure ity committee of the New York produce | He said that when he left Washington exchange met this afternoon, but as he thought he would have very little they had received no reply to their tele- difficulty in determining the approximate gram to Charleston, concluded that they | cause of the earthquake, but confessed could not take any decided steps, see- to have been much puzzled by his observations. Contrary to his expectahomes of the rich. They, however, in-structed the president to call on the uniform in their direction Some extended from north to south, and others from east to west and on this account he would hesitate now to make any scientific declaration. He did however give the opinion that the shocks were the result of local land-slides. By the term "local" he does not mean that the shakes can be traced to any particular place at Summerville, Charleston or

elsewhere, and remarked that there was no connection between the shakes and the supposed volcanic action impression is the area covered by the theory has been from forty to one hundred miles under the bed of the sea. He was confident moreover that the worst was over. This statement, however, was made prior to the severe shock at 11 o'clock last night. He left Summerville this morning for the phosphate district where he will continue his bservations. Prof. McGee's remarks have had an excellent effect. Up to vesterday about 1,000, or one third of the whole population, had left Summerville, and it is expected that Prof. McGee's statement will stop any further

The Mails all Right Now. WASHINGTON, Sept. 4 .- Acting postmaster-general Stevenson today received a telegram from the postmaster at plated. OXFORD, N. C.

Oxford is to have a large cigarette and smoking tobacco factory. A corporation has been formed under the name of the "Cooper Tobacco Company;" Mr. J. C. Cooper being president, Mr. H. G. Cooper vice-president and Mr. S. W. Cooper manager. They propose to carry on, on quite a large scale, the manufacture of smoking tobacco and eigarettes, and to deal in leaf tobacco. The organization is made for ten years, with ample capital to do a large and at the same time a safe business. All the machinery will be of the most improved kind, being run by an engine of sixty-horse power. The name Cooper is so thoroughly identified with the tobacco trade that we feel safe in predicting success in this instance. The company is composed of business men of capital, who are thoroughly acquainted with tobacco in every stage of its production and manufacture. A good deal of the machinery has arrived and opera-

tions will be begun in a few days. Mr. John Johnson and his charming bride have returned from their western tour. Mr. Johnson's residence and grounds have been greatly beautified, making one of the most attractive places in our town.

Rev. R. B. Willis, pastor of the Presbyterian church here, is quite sick. Mr. B. S. Royster, of the firm of Hall & Royster, druggists, is now off on a trip of several weeks to the mountains of Virginia, visiting the Blue Ridge and the White Sulphur springs. Mr. Royster is one of our most successful and

popular young business men. duced the charges of their school, making it now one of the cheapest schools in the State. They will now teach a nine months' session instead of two of five months each as before.

Time is money, but health is happiness. If you have a bad cold or cough use Dr. Bull's Cough Syrup. It will cure you every time.

WHICH PROVE TO BE NOT WELL FOUNDED. loday there were all sorts of wild rumors here, some to the effect that Charleston had sunk after last night's shock; others that a volcano had broken out there. A private dispatch, over the wire of the Scaboard line, said that very little damage to Charleston had resulted, but that outside of that city the ground in several places had sunk, while in others upheavals had taken
