CHICAGO Nov 11 -The presence of the blue coats was about the only indiestion this morning of a strike being in progress. Hundreds of men went to work and there seemed to be no lack of business at the principal packing house. Armour & Co. are running almost at fu'l blast, they having received a number of men from the east last evening. and a number of both old and new men have been put to work this morning. The firm has now nearly 3,000 men at work.

CHICAGO, Nov. 11 -The situation at the Union stockyards shows improvement this morning All the packers report that their forces are increasing and among the applicants for work today are many of the old men, contrary to general expectation. The army of workmen which was engaged by Fowler & Co. in New York last Monday arrived at the yards and reached their employers' establishment without any molestation. Trouble was expected when these 300 men arrived and every precaution ing. Shortly after that hour a Grand Trunk train, with imported workmen est part of the stockyards district to the yards proper, and although the streets were crowded with the strikers and their sympathizers, not the slightest interference was attempted. The new workers are new safely housed at Fowler's. Reports to Gen. Fi'zsimmons at 8 o'clock from all parts of the yards refort everything quiet.

The Chicago packing and provision Nelson Morris and Fowler Bros. have each fully as many, and Swift & Co have about 1,500 men. The great topic of conversation this morning was the row in the camp of the Knights and the split between Barry & Butler and Grant, Harper & Dolan E.ch side has its sympatizers and the constitutents of the men who have defied the authority of Barry & Butler are those who are going to work. The B rry & Batler element-lines the sidewalk on Halstead street, and uses all endeavors to dissuade the men who desire to go to work from doing so. No violence is attempted, however, as the blue coated pickets line the approaches to the yards, and inspire due respect in the minds of even the most pugnacious of the strikers.

CHICAGO, Nov. 11 .- The strike at the stockyards is at an end. Late this afternoon, Barry, who has been on the ground ever since the strike was inaugurated, and who, all day has been in consultation with Carlton, of Boston, one of the general executive board of the Knights of Labor, appounced that an order sending the men back to work will be issued. The men will go back on the packers' terms, viz: Ten hours per day. What proportion of the strik-ers will find employment is rather doubtful. At the end of the last strike the packers announced that none of the men would be discharged to make room for those who left them, and that they were anxious to give new hands permanent venes in a few weeks, to pass such laws employment, but soon after the strike sa the convention deems suitable to the was over the new men left in droves. an explanation being given that the old gates in the convention, representing men would make it so unpleasant for farmers claim to hold the balance of town. Senator Blair.

This distinguished senator and gentleman, who was invited here by the Colored Industrial Association, arrived yesterday, and at 2 30 o'clock addressed a large audience of both white and celored people at the grounds of the association.

In the course of his remarks he said: That he had been invited to come down here to witness the growth and progress of the colored people since emancipation. After beholding their form. capabilities in what he saw before him, he testified that he was astonished, and an opportunity was only needed for them to astonish the world.

He told the colored people that to have accomplished what they had done was wonderful. No other nation could have done more, and he cheerfully recognized the capacities of the race. He said he would fail in duty if he neglected to offer a few suggestions which he thought good and pertinent; that their best friends should be those about them and with whom they are most identified, and while emigration under certain circumstances may have good tendencies, the best place for them is where they were born. Glittering prospects were sometimes presented by emigration agents, but too often "distance lent en chantment to the view," and in seekirg to better the condition, one could realze more relief in efforts to better himself where he is than by moving to and

He urged that every man, if he wanted to be a free man should acquire education and land. The one would teach the proper use of the ballot, the other afford comfort and sustenance in case of failure of professional or manufacturing efforts. The colored people should realize that they are not a different civil class, but that their interes's were the interest of all, and that South just now, but their good time was | call it well. coming, capital was now secking investment in every water-fall and forest in creasing the circulation of money multiplying school houses, stock and chattels of all kinds in which they were destined to share a large part.
