one hundred thousand dollars. The deficiency appropriation bill, as reported to the Senate today, omits the paragraph appropriating \$85,396 to pay the judgment of the Court of Claims in favor of the Pacific railroads.

Train Robbers. robbers were found last night in an attempt to rob an express train on Cooley's Lake, twenty-four miles east of Kansas City.

The county officials had been warned of the intended robbery and they sent an armed posse on the train the woods close to Cooley's Lake. The robbers programme was carried out all right up to a certain point. The train was stopped by a red light, and three men, armed with repeating rifles, covered the engineer and ordered him to disthe ground, a part of the posse, concealed in the engine gave the robbers a volley. Others on the train came up, and so did those in the woods. The robbers returned the fire from repeating rifles, but did no harm. They ran for cover, firing when pursuit became too close. For the purpose of saving or improving the security thus afforded by its junior lien the Government should have the right now to purge this paramount lien of all that is fraudulent, fictitious or unconscionable. If the transfer to innocent hands of bonds of this character secured by such first mortgage prevents their cancellation it might be well to seek a remedy against those who issued and transferred them. If legislation is Congress can readily supply it.

"It is quite time that the troublesome complications surrounding this entire subject, which has been transmitted to us as a legacy from former days, should be adjusted and settled. "No one, I think, expects that these railroad companies will be able to

pay their immense indebtedness to the Government at its maturity. "Any proceeding or arrangement that would result now, or at any other time, in putting these roads or any portion of them in the possession

and control of the Government, is, in my opinion, to be rejected -- certainly as long as there is the least chance for indemnification through any other "I suppose we are hardly justified

in indulging the irritation and indignation naturally arising from a contemplation of malfeasance to such an extent as to lead to the useless construction of these roads or the 'oss of the advances made by the Government. I believe that our efforts should be in a more practical direction, and should tend, with no condonation of wrong-doing, to the collection by the Government, on behalf of the people, of the public money now in jeopardy.

Liability of an Insurance Agent to His

Cor. of the News and Observer. The question of how far an agent of an insurance company cau go of his own accord, in disregard of his considerable interest. It is a general rule of law, that all contracts made by a servant, within the scope of his authority, either expressed or implied, bind the master. This liability of the master is founded on the would seem that the principal should have some recourse and protection when his agent or servant disregards instructions directly given.
