

PUBLISHED DAILY (EXCEPT MONDAY) AND WEEKLY.

By THE NEWS & OBSERVER CO.

J. I. MORRIS, Editor.

Daily one year, by mail postpaid, \$1.00.

The Radicals propose the division of California into two States, as well as the admission of Dakota and Oregon.

We have the Trinity Archive for December. The publication is very creditable one to the College it represents.

The Second Regiment of the State Guard tendered its services to Governor-elect Fowle for escort purposes on the occasion of the inauguration and the tender has been accepted.

Mr. C. W. Hunt becomes editor and proprietor of the Burlington News. He promises a paper that will devote its principal time to the building up of Burlington, Alamance county, and the State, and that in politics will be democratic.

We commend to our readers the interesting description elsewhere printed of the eruption of the Japanese volcano of Bandai-Sau.

NEWBORN has a beautiful little pamphlet in circulation at the North setting forth its rare advantages as a winter resort.

BROTHER BARRY, late of the Knights of Labor, has issued his declaration of principles for the new order, the Brotherhood of United Labor, which he is to found.

The democrats of Edgecombe county stood aloof from Republican bonds and on the first Monday in December they all, but one, failed to bring up the required bonds.

Good for Edgecombe. If democrats everywhere would follow the example thus set there would be less trouble from irresponsible radical officials.

The leading republican candidates for the speakership of the next House are Reed, of Maine; Cannon, of Illinois; Burrows, of Michigan; and McKinley, of Ohio.

To Make Two States of California. Representative Vandever, of California, has introduced a bill in the House of Representatives at Washington to divide the State of California into two States.

Didn't Take Up the Note. A Washington telegram says: The Sunday Herald publishes a story that Sewell and Phelps went to Quay late in the campaign and said that an expenditure of \$60,000 more New Jersey would surely go Republican.

Slips Cheaper. Heller Bros. are offering many inducements in order to dispose of as much of their immense stock as possible before moving.

Lord Randolph Churchill will in a short time start on a visit to South America.

PARTY DISCIPLINE.

We observe a Washington letter to the New York Herald, from the pen of the Herald's veteran representative at the Federal capital, Mr. Nordhoff, we presume, in which the writer remarks that the democratic members of Congress seem to feel badly beaten, and then goes on at some length to say that the democracy of the country at large has in recent years lacked coherence, as a party, has lacked discipline and leadership.

There is more truth than poetry in his remarks. The ends a party has in view can only be attained by the strictest coherence and co-operation of the individual parts that go to make it up.

A political party is like a great army. Obedience of the proper sort is absolutely necessary and it must obtain throughout the ranks, from one end of the organization to the other.

The republicans have been more fortunate in their choice of leaders than ourselves, we think, for some time past. They have secured such leadership as has inspired confidence all along their line and enforced a discipline which has been superior to that of the democracy.

How this has been done we leave for democratic statesmen to determine. But these statesmen of ours should set themselves to discover why we have failed of late in this regard and should devise a remedy for the evil without delay.

We do not mean to say we have no discipline or leadership in the democratic party. We do not mean to say we have not brains and ability.

CONGRESSMAN MCKINLEY is a very shrewd republican as well as one of the most respectable of the wrong side of the House. He is reported as saying that the talk of his party being now insured for twenty-five years of power is mere extravagance.

There are other words but they can not be read. It is said that long ago when travel was done by stages or private conveyance a body of Quakers or Friends were on their way either to or from their yearly meeting at Salem, and when they reached this place, a small creek, called Fox Swamp, which they had to cross, was very much swollen.

JAPAN.

THE ERUPTION OF BANDAI-SAU—A GRAPHIC DESCRIPTION FROM THE PEN OF A SOUTH CAROLINIAN. THE TRIUMPH OF PARANATLAL VE IN THE MIDST OF DISASTER. Cor. of the News and Observer.

It does not require a long residence in Japan to become accustomed to the shock of earthquakes, and while they are not as frequent in this section as in the northern part of the empire, a shock was felt here a short time ago that moved the desk on which I now write nearly two inches from its usual place.

Japan is a volcanic country. The mountains and hills that give such beauty to the scenery are but the unfading evidence of the mighty up-heavals of nature. And no one can tell when or where the pent-up fires will burst their partly-cerements.

In the north of Japan, there arises along the shores of the Pacific Ocean a range of mountains known among geologists as Abukuma. Towards the interior, and along-side this range, is a chain of volcanic mountains. One of the chains is called Bandai-Sau. It is situated in lat. 37 deg. 36 min. N. and long 140 deg. 6 min. E. Bandai-Sau had been classed as one of the active volcanoes many years ago. Tradition states that it was in a state of eruption 807 A. D. Since that it has been quiet.

The new schedule on the Louisville railroad went into effect on Monday last. By this we have one mail a day. Heretofore we received the News and Observer at 11:30, now we get it at 3 p. m. and Washington papers which formerly came at 6 p. m. on day of publication now get here at 3 p. m. of the day after.

In taking a walk near town some days since the writer came upon something which reminded him of an incident which occurred here many years ago. Near the old cemetery in a little clump of asasafras on a high hill overlooking the town is an old granite headstone, fallen down and the words thereon scarcely distinguishable.

Gov. Richardson's Inaugural.

Gov. Richardson, of South Carolina, was inaugurated Thursday in the presence of both branches of the General Assembly with imposing ceremonies. In his inaugural address, referring to the recent presidential election, he said:

The vital question with us in South Carolina is how will the result of the recent presidential election affect the full exercise of local self government which we are now enjoying with so much advantage to all the people of all races and conditions?

There is no question with us in South Carolina as to the result of the recent presidential election. It is a foregone conclusion that the late verdict of the elections contains no menace to our opening prosperity or existing good government that cannot be readily and successfully averted by the steadfastness to principle and conduct so remarkably illustrated by the people, even more in peace than in war.

There is no question with us in South Carolina as to the result of the recent presidential election. It is a foregone conclusion that the late verdict of the elections contains no menace to our opening prosperity or existing good government that cannot be readily and successfully averted by the steadfastness to principle and conduct so remarkably illustrated by the people, even more in peace than in war.

THE PICTURE OF THE MIGHTY SUN.

The midnight sun is thus described in "A Jubilee Jaunt to Norway." Imagine yourself on a ship at anchor looking west or straight in front of you. There is a broad expanse of sea a little to your right hand, and you will be the rugged coast and to your left the long, narrow fiord between the islands and the mainland that the steamer has just traversed.

The experiments were made at Mr. Edison's laboratory at Orange, and the first victim was a calf weighing 124 pounds. The hair was cut on the forehead and on the spine behind the forelegs, and sponge covered plates, moistened in sulphate of zinc, were fastened in place. The resistance of the animal was 1,200 ohms. An alternating current of 700 volts was applied for thirty seconds, and the animal was killed instantly.

THE PUBLIC PRINTING.

No paper in the State did better service for the Democratic cause than the Raleigh News and Observer, and we think it deserves well of the party. It is the only daily paper, too, at the Capitol, and it should be sustained. The public printing must be given to some one of the offices there. Why not give it to the News and Observer? In the first place, we think it has won the honor; and in the second place, we think the party should do whatever it can legitimately to keep up a Daily at the Capitol. Mr. Ashe has had charge of the work heretofore and given entire satisfaction. He is a competent and honorable man, struggling to keep up a Daily at the Capitol of the State. If the representative of the Democratic party think such an enterprise of value to the party then they should do what they can to sustain it.

Gen. Jones has served the State most faithfully and efficiently as Adjutant General and his friends throughout the State are earnestly in hopes of his continuance. We have no doubt but that Mr. Fowle will reappoint him.
