THE STORM.

The recent heavy storm which moved from the Atlantic inland, has done great damage in many localities by flooding low lying grounds, &c., but no serious marine disasters are as yet reported.

THE MONSTER BALLOON.

The Daily Graphic company of New York are progressing finely with the Monster Balloon named after it, and it will go up soon, the time to be advertised.

BUTLER.

The Butler campaign in Massachusetts seems to be the only exciting political topic of the day, and the maneuvering of that gentleman's friends is watched with particular interest by all parties.

THE CONTENTION AMONG THE CHEROKEES.

St. Louis, Aug. 14.—Mr. A. Cole of Vinita Indian Territory arrived here last evening. He reports that returns of the recent election in the Cherokee Nation are not yet all in, but that both the Downing and the Ross party are sanguine of success.

LIBERAL DEMOCRACY.

Groesbeck's response to his Ohio friends, when asked to name the new party, or rather to disguise the old party under a new name, was pathetic in the extreme.

out of its old organization into a new one; determined in another to tenant the old shell until it is pulled down about his ears.

BISMARCK.

Late foreign advices deny the reported interview between Prince Bismarck and a newspaper reporter, wherein the remark was attributed to him, "of substituting the State, as an object of worship, for God."

THE TRIBUNE ON THE PRESIDENT.

The New York Tribune with characteristic effrontery, is constantly hammering at the Administration in a style which would do credit to a first class billings-gate sheet of the Democratic persuasion.

MURPHY VS. THE TRIBUNE.

According to the New York Times, the Tribune has a deep pecuniary interest in the matter of removal of the Government store houses.

ALASKA.

The importance of the purchase of Alaska by the United States, has never been fully understood by the great majority of the people, and not until recently has the wonderful resources of this rich region been described.

So far the fur trade has been regarded as the chief element of its prosperity. How boundless it seems to be, every visitor to Alaska delights to speak.

The Alaska Herald, devoted to the interests of the Territory, contends that Alaska, without reference to the value of the fur-seal islands, will prove a grandly-paying investment.

Gold mines are being worked which are promising, and shipbuilding has begun with an inexhaustible supply of most excellent timber.

Poverty puts a fearful strain on a man's honesty. The poor man who lives an honest life is entitled to more credit than the man of wealth.

Among the notable articles contained in the issues of the Living Age for the last month are the following:—Lectures on Darwin's Philosophy of Language, by Prof. Max Muller.

FAP.

The N. Y. Tribune of the 16th, has an editorial on "infant diet." We think the readers of that journal have been treated to that kind of diet about long enough.

W. A. RICHARDSON, Sect'y.

The July number of "OLD AND NEW" has a very nice and simple story of Mississippi River life, at "the City of Biggins Bend," by H. A. Bertou.

The following advertisement appears in the number of the Gestiimunde (North Germany) Gazette: The following heirs of Catharine Spelling, and her daughter Dorothy, both of whom died a violent death in 1852, at Amsterdam, are requested to send their addresses immediately to the Royal Probate Court at Amsterdam.

As a result of the Kentucky election the Senate will stand 33 Democrats and 47 Republicans, a Republican gain of 2. The House will have 80 Democrats and 20 Republicans, a Republican gain of 1.

MISCELLANEOUS.

The Shah cost Queen Victoria £33,000 and the nation £7,000. John Stuart Mill's fortune falls to his step-daughter, Miss Helen Taylor, who is known in London literary circles.

The New York Police Commissioners have adopted a resolution allowing the Legion of St. Patrick to parade with arms as well as the Knights Templar, and will furnish a police escort.

A London ship broker, in a recent circular, mentions that several English ship owners have placed their vessels under foreign flags, in order to obtain freedom from petty vexation and annoyances by British officials.

Count Frederick Honstein, a leader of the Bavarian ultramontanists, has been sentenced to one year's penal servitude for what is now called in Bavaria "Spitzdering"—i. e. opening a bank under clerical patronage, and living on the money of the depositors as long as it lasts.

Rufus Porter, the original editor of the Scientific American, who is now living in West Birmingham, and is apparently in his dotage, has constructed an air vehicle which he thinks will make fifty miles an hour and carry five persons. He has spent about \$2,000 on it already.

A new and important fact in silk culture has been developed by the Acclimatiztion Society, France, namely, that silk of varied color can be produced by feeding the silk worms on different leaves. Worms fed on vine leaves produce a silk of a magnificent red color. Larvae has been found to produce an emerald green colored silk.

The Japanese government has decided that, in future, no students shall be sent abroad at the expense of the State, for their education, until they have passed a satisfactory examination as to their qualifications, and particularly as to their acquaintance with the language of the country to which they will be sent.

Elmira milkmen have adopted a new plan for delivering milk which seems to possess many advantages over the old one. Their wagons are arranged like those employed to deliver soda water, and the milk is furnished in quart and pint bottles, which are returned the following day, and which can be kept cool while filled by lying them in water.

Salt is a simple remedy for many things. It will cure sick headache, make cream freeze, make the butter come, take ink stains out of cloth of any kind, kill worms, make the ground cool, so it is more congenial to celery, cabbage, &c.; eases the itching pain caused by irritable skin diseases, like hives, itch, &c., produces vomiting or stops it, as you like, and many other things, too numerous to mention.

The Shah of Persia, according to the following story, has the true Oriental preference for fat women: Being shown some very obese cows at the Home Farm at Windsor, he asked how they were fed. Being told that they were brought into this plump condition by a diet of oil cake, his interest was at once excited, and he said to his interpreter: "Ask if oil cake is good for wives."

A number of sea horses were born in the latter part of July at the tanks of the Manchester Aquarium in England. It is said that these are the first sea horses whose birth has taken place in Great Britain. There are thirteen of the young ones, and they moved about with great activity the day after they were born.

A Telltale Skeleton. The following advertisement appears in the number of the Gestiimunde (North Germany) Gazette:

The following heirs of Catharine Spelling, and her daughter Dorothy, both of whom died a violent death in 1852, at Amsterdam, are requested to send their addresses immediately to the Royal Probate Court at Amsterdam: Sophia Behrensbrug, Otto Kelmaer, Anna Derfling, Maria Derfling, Joseph Derfling, all of whom emigrated to the United States since 1864.

Ernest Belger, Solicitor. This advertisement was issued in consequence of the discovery of the murderer of the widow Spelling and her daughter, and the recovery of the spoils of his fearful crime, upward of twenty years after it had been committed.

In July, 1852, the police of Amsterdam saw on the floor of the house on Harlem street where Catharine Spelling lived with her daughter Dorothy, a notice to the effect that the two women had gone to the country. This notice aroused no suspicions, but when the old lady and her daughter did not return after the lapse of six weeks the police entered it. A fearful sight met their eyes. The widow and her daughter, with their throats cut from ear to ear, were lying on the floor in an advanced state of decomposition, while all the buttons were riddled of their valuables.

It was ascertained that the murderer had carried off diamonds, money, and bonds amounting to nearly one hundred and fifty thousand dollars. Time passed by, and the double murderer was almost forgotten, until on the 3d of July last the house in which the crime had been committed was torn down. Between it and the adjoining house was a space of about one foot in width, and hemmed in there was found a male skeleton. At the bottom of this space lay a large leathern pocket, containing the diamonds, the money and the bonds of the murdered widow. This skeleton was undoubtedly that of the murderer of the two women, who, after assassinating them and bagging his plunder, had tried to escape over the roof of the house, but slipping his foot, had fallen into the space between the two buildings. There he met with the just retribution of his terrible crime. He died there the excruciatingly painful death of slow starvation.

Mechanics, artisans, factory hands, and people who labor for a living, find it very difficult if not impossible to keep the hands free from stain. Hand Sapolio will not only remove every particle of stain, and what is called "grained in dirt," but it will also keep the skin soft and pliable, rendering the muscular action as quick and easy as in the case with those who do not perform hand labor. It is only 10 and 15 cents a cake, according to size. Every mechanic should use it constantly in place of all other soaps.

BEAUTIFUL WOMEN.—The hair is the crowning glory of woman. There are few moderate defects which cannot be remedied by the proper disposition of the tresses. But when the hair begins to fall out, or turn gray, in young people, or with those in the prime of life, there is cause for real regret.

For Loss of Appetite, Dyspepsia, Indigestion, Depression of Spirits & General Debility, in their various forms, FERRO-PROPRIETARY ELIXIR OF CALISAYA made by CASWELL, HAZARD & Co., New York, and sold by all druggists, is the best tonic. As a stimulant tonic for patients recovering from fever or other sickness, it has no equal. If taken during the season it prevents fever and ague and other intermittent fevers.

NOTICE.

To the Holders of Claims against Cartered County: I have been appointed a special Commissioner for the purpose of compromising what is denominated the floating debt contracted prior to 1868; there is or will be nearly three thousand dollars in the treasury appropriated to this object, in the which I am limited to 50 cents on the dollar. Any persons holding claims for the deficiencies of 1868, 1869-'70 and '71 which have been passed upon by proper authority, can if they elect to do so, have them settled under this provision. Upon presentation to me I will credit the same and give an order to the Sheriff to pay taxes of this year or to the treasurer to pay the money as soon as collected. I will attend at several places in the County about the time the Sheriff is collecting taxes; will also be at Beaufort every first Monday and at New Port whenever requested. W. J. DOWDRIE, Aug. 13th 1873.
