A correspondent, writing from Kentucky, informs us that "the hog pestilence has been traced to some droves that passed through a tobacco-growing district on their way East." He also remarks that " tobacconists are using prussic acid to give an al-mond flavor to the leaf, and, in consequence of this poison, a number of smokers have lost the use of their lower limbs."

263

New York Post. COAL FORMATIONS OF THE WORLD

The proportions of the superficial coal areas of the principal scal producing counties of Europe and America, may be stated thus:

United States, 183,132 square miles; British America, 18,000 square miles; Great British and Ireland, 11,859 square miles; Spain, 3,408 square miles; France, 1,719 square miles; Belgium, 518 square miles.

Thus it will be seen, that the United States has a superficial coal area more then these times.

tons of coal.

Pennsylvania, as above stated, has a coal area of 437 miles, which, in a single year (1847) produced 3,000,000 tons of coal, affording cargoes for 11,339 vessels. Our scaport friends should

remember this.

North Carolina, probably, will be found to possess a much larger coal area. From the north-castern extremity of the Deep River Basin to the Pee Dee is not less than sixty miles in length, and if it should be found to average ten miles in width, we have a coal area of 600 square miles, or nearly one-fifth larger than Pennsylvania. It should be remembered, too, that the Pennsylvania coal is anthracite, of but medium value, while the North Carolina coal is butuainous, and ranks as a gas coal, equal to the finest, and will command the highest price in all the markets of the At-

Mr. McLane, in his pamphlet referred to on a former occasion, says that at Egypt, one ton per minute can be delivered, 1,000 feet from the coal pit, at 60 cents per ton. That the capacity of the Deep River Slack Water Navigation is lim-ited to the delivery at Wilmington or Smithville of but 720 tons per week. Then, according to this authority, a single shaft working ten hours per day, can deliver upon the surface weekly, 3,600 tons, or about five times as much as can be passed down the Cape Fear river. But when a dozen shafts are delivering their 3,600 tons per week, it will be seen the Cape Fear can afford no adequate outlet for their productions. The friends of the Cheraw and Coal Fields Ruilroad need. of the Cheraw and Coal Fields Railroad need have no misgivings as to the supply. We really are at a loss to say what the capacity of the Road would be, but think 600 tons might be transported over it per day. If so, then, Charleston would receive 167,200 tons of the finest coal in the world annually. With such a prospect to induce the construction of the Cheraw and Coal Fields Road, can any one interested in the welfare of our beloved Queen City, healtate to invest to the extent of his ability?

Col. R. N. Wood, formerly of Mississippi, and one of the American electors in California during the recent to the American electors in California during the recent to the fine has shown that it is but 67 miles from Cheraw to Egypt, and that the line of road would, from that point, traverse the coal basin some twenty miles in this direction. If the capacity of the Road be equal to the above supposition, and should cost \$1,250,000, its income from coal alone, would be \$668,000 per annual come from coal alone, would be \$668,000 per annual come from coal alone, would be \$668,000 per annual come from coal alone.

num, or equal to one-half its cost. We know that we are not making statements with unthematical precision, but we do know, that we approximate the truth, and that our statement, if erroneous, as probably they are, may be fore them. And we beg that every friend of the in cold marble John Howard Payne for the pur Road, who can elucidate its value, do so at once. Many we know are in possession of facts which would vastly subserve the cause, if they were given to the public. We hope, therefore, to hear soon from many who have heretofore remained si-

OLD SCHOOL PRESBYTERIAN ASSEMBLY .-The General Assembly of the Presbyterian Church (Old School) closed its annual session at Lexington, Keatucky, on the 1st of June. It is stated that great harmony prevailed on all sub-jects under discussion. The Missionary element was prominent. The seminaries of learning and the boards of the church are all prospering and moving forward in the accomplishment of this great work. It now has a Presbytery or two in India, one or two in China, one in Western Afrien, one in California, and one among the Choctaw Indians. The Assembly declined to send delegates to any of the New England Associations, on account of their disposition to meddle with the subject of slavery. The Hon. John C. Breckenride, whose two uncles are prominent clergymen, was a daily attendant on the Assembly, and entertained the members with great hospitality at his home.

EMIGRANTS FOR LIBERIA.—The Norfolk Heraid of Wednesday says:

The ship Caroline Stephens, from Baltimore, bound to Liberia, yesterday received the emigrants. Some two hundred in number who have been collecting here for some weeks past from various sections of Virginia and North Carolina. The greater portion of these can both read and write, thereby enabling them to become both useful and honorable citizens of the New Republic. We learn that the indefatigable agent of the American Tract Society, Mr. E. Cuthriel, visited them several times, and has distributed amongst them not only a large number of good books and Tracts; but also such as will be of service to them in their new home. Mr. C., who is also agent for the American Bible Society, likewise distributed amongst them a large number of copies of that Holy Book. Had we not here in our midst such an active agent as Mr. C., many persons, both seamen and emigrants would leave here without the means of studying God's Holy Word.

AMERICANS IN EUROPE. - Thousands of Americans are now in Europe, and others are direct ing their footsteps to that portion of the world. The rage for travel was never so great as now. This may be attributed in some measure to the facilities afforded by steam navigation. It is stated that prior to 1850 the number of Ameri-oans that visited the Old World never exceeded 7,500 in any one year, and the average number for the ten years previous was not more than 5,running, and 29,362 Americans crossed the At-lantic during that year. In 1856, the number of American travellers returning from Europe that landed at New York was 30,319. In 1855 the number landed at our ports was 29,598, but in 1854 it reached \$2,641.

WESTERN LAND SPECULAT PEOPLE RUN MAD.

man, Eli Bruce, who has just returned fro land sales in Lows, and language feils to the greediness there displayed for land. The Osage land office in the northesters tion of Lows was first opened for private on Monday the 18th just. In that two year old

and aguare miles; France, 1,719 square miles; Belgium, 518 square miles.

Thus, it will be seen, that the United States has a superficial coal area more than three times as great as all the countries of Europe. And it should be remembered, too, that the coal busins of the United States are but partially explored and defined.

In regard to production, however, the contrast is altogether in favor of Europe, thus: Great Britain and Ireland produce 31,500,000 tons; Belgium 4,960,000; France, 4,141,617; Prussia, 3,500,000; Austria, 7,000, while the United States, with a coal area more than three times the extent of all Europe, actually produces but 4,400,000 tons.

Pennsylvania has a coal area of 437 square miles, and yet in a single year, that of 1847, she produced 3,000,000 tons—furnishing cargoes for 11,439 vessels, which cleared from the single port of Philadelphia, that year.

In 1825 a few tons of an unknown combustible were brought to Philadelphia, where its qualities were to be tested and its value ascertained. In 1828 the first cargoes reached Philadelphia and Baltimore. Since then, the Pennsylvania coal fields have produced an aggregate of 19,000,000 tons of coal.

Pennsylvania, as above stated, has a coal area accel area accel area and make the entries. One hundred and fifty thousand acceptance of the coal and fifty thousand acceptance of the coal area of t the entries. One hundred and fifty thousand acres were subject to entry, and the rage for the-lands created this midness.

> Boous Financianno.—It is well known to PRATTIL the residents of this District that there are no bills circulating as currency under the descrainstion of five dollars within our limits, a law of Con-gress having driven such trash from circulation. But this fact is not generally known abreed.— Small bills are frequently received at this office for subscriptions purporting to be issued by "banks" which have no existence—the emissions of mere individuals who make use of "Washing-

ton" or "Georgetown" to give themselves respectability. We doubt not thousands of such notes are taken and passed, from hand to hand, by honest persons throughout the country. Such inthe denomination of five dollars are issued by either banks or individuals in the District of Columbia.—Nat. Intelligences

THE DURLS YESTERDAY MORNING .- TWO duels were fought, yesterday morning at half past four o'clock, on the South Caroina side of the river, a few hundred-yards above Hamburg. The first took place be-tween Mr. Phillips and Mr. Moorefield; and he second between Mr. Prathes and Dr. Appleby. Messrs, Phillips and Prather are he editors of the Lafayette (Ala.) Tribune, and Mr. Moorefield and Dr. Appleby, edi-tors of the Lafayette Herald,

The distance was ten paces, and pistols he weapons used. After the first fire in each duel, mutual friends succeeded in adjusting the difficulties between the parties. Fortunately, neither duel was attended with any mjury .- Augusta Constitutionalist, 4th

MONUMENT TO THE AUTHOR OF "HOME, WEET HOME."-Says the Louisville Journal We solice that some public spirited citimens of Boston have set on fine a project for the erection of a monument to John Howard Payse. The suggestion is received with appliance by the press, and will doubtless be carried out with graceful promptitude. Mr. Payne-passed the early years of his chequered life to Boston, and it is fitting of his chequered life to Boston, and it is fitting that some tangible memorial of him should adorn the city on which his memory sheds so sweet a

lastre. Shall it be done? It is after alt but est hymn the human soul has ever uttered. song is enshrined more permanently than all the trophies of art can express in that great popular heart which obtains its most perfect existence, when vibrating to the molody of this noble strain and yet we can fully appreciate the spirit of our Bostonian friends in the erection of a clay remembrance to him who has moved, as deeply as poet ever moved, the finer feelings of his fellow unn; who has lifted us above the wear and torment of the world by a simple air; who has given the wrecked miriner in the very offing of his life, time to repent and shed a tear, who has engulphed, by recalling us to seedes of innocence and youth, all dark ambition, unsatisfied hopes. festering wrongs, the harsh abrasions of our earthly lot and the cares of circumstance; who has elevated, renovated and purified the very fountains of virtue, and whose name has lived, and will live in the fondest memories of that generation which has learned to lisp and feel the enchantment of " Home, sweet Home. N. Y. Nowa.

JACKSON SPRINGS FOR SALE.

These Springs are on Jackson Creek, Moore Co., K. C. The virtue and medicinal properties of the rater are well known,—the prevailing mineral is Iron, with Magnesia and Sulphur also present. There is a fall of water passing by the Spring, by which machinery could be drawn, so as to elevate water into bathing-vals, or even convey water to the dwelling bouss. Every natural facility is present to make this a place of novel interest, with a small investment.

In connection with the Spring is a body 248 acres of Land, part of which is under improvement.

This property having once been fitted up for a watering-piace, all the necessary houses are already there, and in tolerable good order. The Cheraw & Coal Fields Railroad will pass as near the Springs as

a proprietor would wish.

From inquiries made of me last summer, I suppose that more than three hundred persons would have gone to these Springs during that season if the house had been open.

It is thought unnecessary to give further details as to this property. The Leabour Springs are to this property. The Jackson Springs are too well known to require it. Those thinking of purchasing

will inform themselves about the property.

Warranted titles will be given, and such time on payments as may suit the con purchaser. Address,

A. D. CAMPBELL.

BOERHAVE'S HOLLAND BITTERS

THE CELEBRATED HOLLAND REMEDT FOR DYSPEPSIA.

DISEASE OF THE KIDNEYS, LIVER COMPLAINT. WEAKNESS OF ANY KIND,

FEVER AND AGUE. And the various affections consequent upon a dis

STOMACH OR LIVER,

STOM ACH OR LEVER,

Such as Indigestica, Acidity of the Stomach, Colicky Pains, Heartburn, Loss of appetite, Despondency, Costiveness, Blindand Bleeding Files. In all nervous, Rheumstie, and Neuralgic Affections, it has in numerous instances proved highly beneficial, and in others effected a decided cure.

This is a purely vegetable compound, prepared on strictly scientific principles, after the manner of the celebrated Holland Professor, Burhave. Because of its great success in most of the European States, its introduction into the United States was intended more especially for those of our fatheriand scattered here and there over the face of this mighty country. Meeting with great success among them, I now offer it to the American public, knowing that its truly wonderful medicinal virtues must be acknowledged.

It is paticularly recommended to those persons whose constitutions may have been impaired by the continuous use of ardent spirits, or other forms of dissipation. Geoerally instantaneous in effect, it finds its way directly to the seat of life, thrilling and quickening every nerve, raising up the drooping spirit, and, in the infession was health and rice in the vertee.

way directly to the seat of fife, infilling and quick-enling every nerve, raising up the drooping spirit, and, in fact, infusing new health and vigor in the system. NOTICE.—Whoever expects to find this a beverage will be disappointed; but to the sick, weak and low spirited, it will prove a grateful aromatic cordial, pos-sessed of singular remedial properties.

sessed of singular remedial properties.

CAUTION.

The great popularity of this delightful Aroma has induced many imitations, which the public should guard against purchasing. Be not persuaded to buy anything else until you have given Secritare's Holiand Bitters a fair trial. One bottle will convince you how infinitely superior h is to all these imitations.

Sold at \$1.00 per bottle, or six bottles for \$5.00, by the

PROSPECTUS

THE NORTH CAROLINA

The Presbyterian Church in North Carolina has ong labored under a serious disadvantage from the want of a journal to advocate her claims and represent her interests. It is estimated that only 1000 Presbyterian Weeklies are taken in the bounds of our three Presbyteries. We have 13,000 Communicants, and it is safe to infer that there are 30,000 Presbyterians in principle in the State. Our Synod stands fifth in the Union in point of numbers, and her trem-bership is greater than that of any Synod South or West of Pennsylvania. Our sister States on the North and South, neither of which has a membership so large as ours, publish the Central, and the Southern Presbyterian, for the benefit of their people. The time has come when the Presbyterian Church in North Carolina should likewise do her duty to her children. It is a conceded and important fact, that hundreds of our members will take a State paper who will take no other. The Paper is needed to be the organ of our Synod and Presbyteries—to elevate and enlighten the plety of our membership by diffusing evalgelical know-ledge—to premote the cause of Education—to develope the talents of our Ministry, and to strengthen the attachment of our people to the soil and sanctuaries

of their own State.

If our Church in other States, and other Churches If our Church in other States, and other Churchesin this State, can supply their members with a Bellgious jou-us!, why may not we? Are North Carolina
Presbyterians inferior in talent, energy and patriotism to their neighbors on the North or South, or to
Christians of other denominations at home? With
the same or better opportunities of accomplishing this
work, shall we leave it unions? In the language of
one of our most able and useful Ministers, an adopted
son of our State, "It ought to have been undertaken
20 years ago, but it is not too late to begin to do
right."

right."

In the last two or three months, a fund of about \$5000 has been subscribed as a permanent capital.
At a meeting of the contributors, held at Greensporagh on the 14th of May, - Rev. A. Baker, Chairman, the Paper was unanimously located at Fayetteville, under the name and title of the North Carolina Pressyruman. Rev. William. N. Mebane and Rev. PRESENTERIAN. Rev. William. N. Mebane and Rev. George McNeill were elected Editors: Rev. Meesrs. George McNeill, Wm. N. Mebane, A. Baker and C. H. Wiley, and Messrs. George McNeill, Sr., John H. Cook and David Murphy were appointed an Executive Committee, to establish the Paper and manage its business affairs.

It is our wish and design to make the NORTH CAR-

oning Pursurery as journal of the first class, equal to the best in the country in typographical appearance and in adaption to the wants of our Churches. Its columns will afford the latest intelligence, both foreign and domestic, and special care will be taken to give a full and accurate summary of State news.

The name of the Paper is designed to be an exponent f its character and contents, From conviction, it will advocate the conservative, orthodox, Old School doctrines and order of the Church.

Our first appeal is to our own people-to N. C. favor, we trust that the native sons of North Carolina who have found homes in other States, and the adopt-ed citizens of our State who form so important an element in our Ministry and membership, will take a deep interest in this enterprise, and give it their

hearty support.
Trums: \$2 per annum in advance, or on delivery of the first number; \$2.50 in six months; \$3 at the end of the year. To clubs of 25 or more paying in advance and when the Paper is sent to one address, a discount of 10 per cent. will be allowed. Our Minisdiscount of 10 per cent. will be allowed. Our Ministers and Elders are carnestly desired to act as Agents, and all others friendly to the cause will please assist in procuring as many subscribers as possible, and forward the names, by August 1st, to this Office. As soon as 1500 subscribers are obtained, the first number will be issued. If a faithful and vigorous effort is made in the next two months by those who take a lively interest in this work, we will, without doubt, e able to begin the publication at the end of that sime with a paying subscription list of at least 8000.

byterian, Payetteville, N. C. FATETTEVILLE, May 20, 1857.
