PROSECUTING & SUIT .-- To present a peition is one thing; to prosecute a suit is at Carwood, England, recently, & yous another. Rev. Dr. Nevins. INCREASE IN POPULATION .- England's

Empire in the Southern Hemisphere covers 8,000,000 square miles, the size of the United States less Alaska. The white population of Australasia, as these great slands are called, was in 1850, about 240, 000. Now it is but a little less than 2,000, 000. Victoria has grown from 77,000 to 732,000 in these twenty-five years, a ten fold growth. Queensland has grown from 9,000 to 125,000. Tasmania, which had a population too small to be counted in 1850, has 100,000 now. New Zealand has grown tenfold in a quarter of a century; from 56,4 000 to 266,000. The population of Australesia is largely Euglish and strongly Protestant." Emigration has been freely cucouraged. ~ reveral of the colonies are no longer penal; and the actual number of criminals on the islands is very small.

The appent seemed so reasonable, and the manner of the captain so kind and prepossessing, that a general burst from the ship's company answered, "Ay, ay, sir," with their usual three cheers. Swearing was thus wholly abolished in the ship.

THE POTATONS .- Some of the household recipes given in the papers are calculated to do more harm than good. Mrs. Heps son's servant girl recently read in the paper that "potatoes should be of uniform size to cook evenly." It was more than two days before she found the meaning of the word 'uniform," and then she, went to work on half a bush I of potatoes. I she work on half a bush I of potatoes. I she couldn't make the smallest the single the largest, she pared down the latternee until they were as small as the sheat nest, and as the latter was about the set of a walant, she had a weak lot of potatoes by the time she had made them of uniform size, and a quart measure would have held them all. The potatoes were "short" for dinner that day, and, as an explanation and some very sharp words followed, Mrs. Hopson's servant girl now cooks potatoes of all sizes in

A MODERN SAMSON .--- The Indianapolis Journal publishes this as a true story Mr. L. Barr, an entployee of one of the rolling mille, is said to be one of the most powerful men west of the Alleghanies .---He often picks up a couple of rails weighing 1120 pounds for small wages, and can handle a 500-pound rail easier than most men can haudle a fair-sized stick of wood. He is credited with having lifted 1475 pounds not oug since. This modern Samson wears ha hair short, is six feet in height, magnificently proportioned, and has a bright black eye-two bright black eyes, in fuet."

SELF-GUIDANCE .- It is the assertion of scientific paper that self-guidance is the first condition of a reasonable, improvable being. Children should learn at school how to study alone-to discover for themselves, what they wish to know. In giving ther no initiation, in denying them their their their will, we prepare them to resign themselves to the passive part imposed upon the nation by governments that take the initiative in all measures of social interest. We thus form subjects for a tyrant, not citizens of a republic.
