

REPUBLICAN TICKET.

FOR CITY ALDERMEN. FIRST WARD.—Jacob Wise and Henry Brewington. SECOND WARD.—Wm. P. Canaday. THIRD WARD.—Lawson E. Rice. FOURTH WARD.—James Wilson. FIFTH WARD.—Wm. H. Banks and Hiram Hankins.

It sometimes makes a difference among our democratic friends whose ox is gored. Ever ready to catch at the slightest straw to denounce our party and its friends, they are very careful to say nothing when their friends are implicated. When "Boss" Tweed and his thieving gang were unearthed by the Republican party, they were very quiet. To be sure, our twinkling neighbor called attention to the Tweed stealing as an instance of "Radical corruption," but we have heard little more of that New York gang from our neighbors. They were very virtuous over the Credit Mobilier scandal and "rolled it as a sweet morsel under their tongue," but democrats were implicated as well as Republicans, in that performance.

But there is another sin laid to our party's door. The President of the United States actually approved a bill increasing the salaries of many officials, including his own! This bill was a remarkable one in many respects. It increases the pay of the President and Cabinet, to take effect March 4th, inst. It increases the pay of some of the Treasury departments, to take effect next July, and increased their own pay, to take effect two years ago. Our neighbor of the Journal has some strictures to pass upon the President for approving this bill, but it has nothing to say of the Congressmen who were elected, and who were anxious to serve their country at a certain rate, and after the service was done and they had drawn their pay according to the law, turned round and drew additional pay for the time already passed! Why is it so silent? The Massachusetts Legislature and several others, largely Republican, denounced their Congressmen for receiving the additional compensation. The North Carolina Legislature, did no such thing. Why? Because a majority of our Congressmen are Democrats, and drew that money. This is the difference in the two parties. When we find corruption, we expose it at once. We fear they do not. Our representative from this district, Hon. A. M. Waddell, voted for that bill, and we have seen no notice of his refusing to draw the extra compensation. He was the Journal's choice, why don't it denounce him? We labored to defeat that gentleman—although he is our personal friend—on political grounds. Had Colonel Dockery been elected two years ago, and voted for that bill, every Democratic paper in this district would have denounced him. Why don't they say something about Waddell?

We favored the increase of salary. We do not think they were adequate to the needs of our Washington officials. But we see no reason why the members of Congress should vote themselves increase of pay for the past two years, and make the Auditors' increase commence next July. That is an inconsistency we do not endorse. We see no reason, however, for denouncing the President merely for approving a bill which gave him no back allowances, which, if he had disapproved, would have injured hundreds. It was his duty to approve, and the President always does his duty. Why, then, should our neighbor denounce President Grant, and go easy on its political friends? Who can tell? Every slander that ingenuity could invent, has been published about him, and he has quietly lived them down. It seems as though our opponents were struggling to find something to find

fault with, and caught at this slender thread. The very queer.

EDITORIAL BUDGET.

The largest number of deaths from scarlet fever in England from 1866 to 1870 was in 1870, when 32,543 died. The costs of the first Liverpool election under the ballot were \$9,160; of this \$5,075 were spent in polling stations and bill-posting. The railway directors of England are considering the question of decreasing speed and diminishing the number of express trains. Advice from Cape Town state that the great diamond of 288 carats, which has been exhibiting there, is to be sent to the Vienna Exhibition. Out of the ten members of the French Assembly already chosen to act on the Committee on the Anglo-French Treaty of Commerce seven are said to be opposed to it.

A return has been issued of the sum which has accrued from the imposition of the fines for drunkenness in the English army since the introduction of that penalty in July, 1869, up to March 31, 1872. The total received is \$266,280, of which \$37,015 has been disposed of. At a recent meeting of the shareholders of the Roman fox hounds it was decided that the Roman races should take place in April. The programme will continue very much the same as that of last year, and a special race committee has been formed from the members of the hunt. The Prussian plans for frontier fortifications have caused much sensation at Moscow. The Moscow Gazette says it is astonished, because peace in the East is certainly secured for a long time, and Prussia would obtain between Posen and Königsberg a basis of operations equally favorable for offensive and defensive purposes.

The energies of the police of Brooklyn are now turned to the capture of the mysterious woman who is supposed to have murdered Goodrich. She was from New England, and for some time resided in Boston. Several of her letters are now in possession of the police, and show that she was fairly educated. The last letter, dated February 27th, is reproachful in tone, as though some trouble had originated between Goodrich and the writer. The letters are under the general head of New York, and are signed with an assumed name. Nothing has yet been discovered to indicate the direction of her flight. The police conceal her name.

Brooklyn detectives arrested on Wednesday last a woman about thirty years of age, who works in a shirt factory in New York under an assumed name. She refused to talk except to answer inquiries in the briefest manner. She was arrested on information given by W. W. Charles. She is married, but has a trouble with her husband, and left him. Her connection with the murdered man was of the most intimate character. He was in the habit of visiting her at her abode in New York. According to her statement she has been three times with Goodrich at the house in Degraw street. Goodrich told her he was not married, but foolishly got in with a girl, but had "shook her." She says she had had some trouble at her house with some man about Goodrich when he was present, and took him into another room. She refused to tell where she was Thursday night, but thought she was home. She got to work at 11 o'clock Friday morning. Didn't go over to Brooklyn to see the body, because she disliked to see Goodrich in that condition. She gave the police a roll of bills to take to her mother, with the request that the latter be not informed she was in Brooklyn. Being asked if she had formed any theory as to how Goodrich came to his death, she said she thought he was killed by some man who followed him home. She will be detained at Brooklyn Police Headquarters for the present.

WASHINGTON NOTES.

During the past week there were filed in the Patent Office 523 applications for patents on inventions and 78 caveats. The patent on the improved bedstead fastening, invented by L. W. Baxton, of New Hampshire, has been extended. There is no truth whatever in the report telegraphed from here to the effect that Secretary Richardson has drawn largely upon the \$14,000,000 legal tender reserve. During the recess of Congress the President will only receive callers on other than official business on Mondays, Wednesdays, and Fridays of each week between 11 A. M. and 1 P. M. The Attorney General, under the resolution of Congress, passed last session,

has issued a circular requesting the United States Marshals to make complete returns of all bankrupt cases.

Mr. Tolbert Lanston, who was recently appointed to the charge of the Secret Service Division of the Pension Bureau, has selected out of his old division (the 1812 division) Mr. T. D. Yeager as confidential clerk.

An advance in gold to 116 1/2 yesterday was occasioned by the sudden raising of the Bank of England discount rate to four per cent., as against three and a half per cent., the previous minimum. The action of the Bank of England is doubtless precautionary, and, perhaps, preliminary, in view of the anticipated demand upon London in connection with the active negotiation there of all sorts of loans on the eve, so to speak, of a fresh movement of money to Germany in further settlement of the French indemnity. More importance was attached to the matter because the alteration was made at a special or extra meeting of the Bank.—N. Y. Herald, 27th inst.

King Oscar, of Norway, is to be crowned Drontheim on July 18.

Col. Hunt, an American officer in the Khedive's service, was recently killed in Alexandria, Egypt, by being thrown from his horse.

Max Strakosch has secured the New York Academy of Music for next fall and winter, and will produce Italian opera with Christiana Nilsson as his prima donna, and Capoul and Campanini for his tenors.

THE STEAM CLOTHES WASHER.

BUY AND USE ONE. Nothing like it in use—will save time, labor, clothing, fuel and soap, and of course, this will save your money. With it any lady can do the washing, if she chooses, especially if she has a wringer. Put it on the stove when breakfast is being prepared. It is only to boil 30 to 75 minutes, when the clothing will be clean and nothing to do but rinse and run them through the wringer. Nothing really needed except one-third the usual quantity of common soap. This mode of washing will soften and bleach the clothing after a few washings. This can be accomplished in first washing by using one spoonful box with soap. There is no rubbing necessary for the worst soiled clothing if it is boiled 75 minutes—30 or 40 minutes, generally is sufficient. The following parties, who are well known in Wilmington, have tried it this week and will recommend it: Geo. R. French, Sr. Mrs H VonGlann, Mrs W R Bass, Mrs Col J L Cantwell, Rev Mrs H B Barr, Mrs J G Burr, Mrs Jas G Smith, Mrs W P Johnson, Mrs D Anderson, Mrs W P Canaday, Mrs Capt Jno F Divine, Mrs W A French.

I have numerous other certificates from persons living in Wilmington. The principle on which this washer works is very simple. After it commences to boil, the water and steam are forced up through the tubes and inside of washer, and is ejected on the clothing. This causes a vacuum under the false bottom, the valve in the false bottom then acts similar to a force pump in drawing the water through the fabrics of the clothing to fill the vacuum caused by the boiling in bottom of washer with water and steam again. This constant ejection has the desired effect without the least injury to the most delicate or heavy clothing. The longer you use it, the more it will appreciate. Call at the office, No. 4 Lippitt Block, where we have a supply on hand. GEORGE A. NEWELL, Agent for Wilmington.

Directions For Using The Washer:

Soak the clothing over night, or wet them thoroughly and wring out, cut the soap and put in bottom of washer—say one-fourth bar of soap—then fasten down false bottom over the soap, pour in washer 15 or 18 quarts of water for the washer full of clothing. Spread the clothing in layers, not rolled up, and pack down in washer, allowing room for thorough vent of steam at top. You will know when the work commences by the water when the work commences by the water being ejected through the tubes at top of washer. After this has been going on from 30 to 70 minutes, rinse out and the work is complete. David J Greer, F C Burnett, are authorized to take orders for the Steam Washer.
