up toward the close of the fifteenth cen tury, and which was chiefly embodied in four great men-Leonardo, Raphael, Michael Angelo and Titian. All of these were great portrait painters in the true sense of the term, with the exception of Michael Angelo, who seldom condescended to easel pictures and who never

Portrait Painting

The great advance made by the six teenth century painters over the pre-raphaelites was in the much fuller utilization of the resources of chiaros curo. Up to this time the colors used were mostly clear and light, and only necessary to give relief to the figures. The value of shadow in itself was hardly appreciated—in fact, the whole concep-tion of painting was to show everything as far as possible in a full light.
