**HELMBOLD'S HIGHLY CONCENTRATED
 Compound Fluid Extract Sarsaparilla.**
For purifying the Blood, removing all diseases arising
from impure and vitiated exposure, and restoring to the
Life, chronic constitutional diseases arising from an
impure state of the Blood, and all other reliable and
effective known remedy for the cure of Scrophula, Salt
Rheum, Scald Head, Ulcerations of the Throat and
Legs, Pains and Swellings of the Joints, Tetter, Pimples
on the Face, and all Stagnant Eruptions of the Skin.
It is gratifying to the proprietor of these medicines to
be able to state that it is now nearly three years since
they were first introduced, during which time they have
been extensively used in various parts of the United
States, and have given to patients and practitioners the
highest degree of satisfaction in the various cases in which
they have been employed: whether in town, country,
hospital, or private practice, they have invariably given
the most decided and unequivocal satisfaction, and pro-
duced the most satisfactory and beneficial effects. Nu-
merous letters have been received from the most distin-
guished physicians in the country, and from the profes-
sors of several medical colleges, recommending in the
highest terms the value of these medicines, and their
superiority over all other preparations for such complaints
as the proprietor recommends. Numerous preparations
of Sarsaparilla and Buchu, and various modes of pre-
paring them have been given, all of which of course will
differ according to the mode of preparation which each
individual may adopt.
These medicines require considerable care in the pre-
paration and the employment of different measures in
successive operations to take up the extractive matter, and
in consequence, are most frequently improperly
made, and not unfrequently much impaired, if not ren-
dered totally inert, by the injudicious and unskillful
management of those unacquainted with pharmaceutical
preparations. It is therefore of the highest consider-
ation and importance to the public and to the faculty that
the standards should be uniform in strength, and
possessing the most advantages. To effect this and ob-
viate the evil alluded to, I have made a number of ex-
periments to ascertain the most effectual mode of extrac-
ting the virtues of the Sarsaparilla and the Buchu, and
to discover the most eligible form for their exhibition.
The experiments were conducted most favorably, and it
is with much pleasure I now offer to the public the in-
feriority of my Compound Fluid Extracts, which contain all
the virtues of the articles they are represented to be made
from in a highly concentrated form, and are the most ac-
tive preparations which can be made. Two tablespoon-
fuls of the Extract Sarsaparilla added to a pint of water
is equal to the Lisbon diet drink, and one bottle fully
equals in strength one gallon of Syrup Sarsaparilla or
decouction as usually made.
