September 12. 02—

NEW FIRM.
THE FIRM OF FISHER, FOARD & HOOKER
Having been legally dissolved, we, the undersigned, have associated ourselves together under the firm of
FOARD & HOOKER,
for the purpose of continuing the former business at the same place.
We are thankful to our friends and customers for past favors, and hope by a correct, prompt and energetic system of doing business, to merit and receive increased patronage.
We shall be able to furnish
Staple Dry Goods, Groceries, Provisions,
Ship Chandlery, Negro Clothing, Farming
Implement, North Carolina Flour,
Corns, Hay, Fish, Cypress Shingles,
&c., &c.,
at as low prices as any other house in eastern North Carolina.
Having our own vessels, wharves, &c., we will pay particular attention to the commission and forwarding business. We will also make liberal cash advances on consignments.
JOHN F. FOARD,
G. HOOKER.
Newbern, N. C., May 27, 1859. 41—

New Store! New Features!!
NEW GOODS!
CALL AND EXAMINE THEM!!!
This advertiser would return his sincere thanks to his customers and friends generally, for their liberal patronage while at the old store. He has recently moved to the new store, formerly known as "Kirkland's Corner," where he would be pleased to see his friends and patrons. His stock this season is full and complete, consisting of every grain and style of
READY-MADE OL' FISHING
AND
Gentlemen's Fine Furnishing Goods.
He is confident that he can please all that may give him a call, both in quality and price, as he is determined to sell on as good terms as any other house in Hillsborough.
He has also combined with his clothing a good assortment of
Dry Goods and Groceries,
consisting of nearly everything that is generally kept in a first-class country store, which he intends to sell as low as the times will admit for the cash. He will take all kinds of Country Produce that will sell readily in payment for goods.
L. GARMICHAEL,
May 22. 43—

Jersey City, N. J.
P. S.—The subscribers wish to engage a few active men, as Local and Traveling Agents for their house, to whom liberal inducements will be offered. For particulars, address as above.
November 6. 67—3m

NEW FALL AND WINTER GOODS,
AT PRICES TO SUIT THE TIMES.
I AGAIN announce to my customers and the public generally, through the medium of an advertisement, that I have purchased a stock of Seasonable Goods at an advanced period of the season, upon the most favorable terms, and do not expect to ask but a very small per centage over New York cost for them, thus adapting the prices to the dull times. This system, in connection with the favorable terms upon which I purchased my goods, owing to the lateness of the season, will enable me to save to my customers at least twenty-five per cent. In short, I will state that I do not expect to make more profit this season, but have bought goods adapted to the wants of the public, and to keep my trade active by selling goods cheap.
The following named articles are at very reduced prices, and will be sold at a sacrifice, viz: Black Cloth Cloaks, from \$6 to \$10, actually worth half as much more; Square-cut and Long Shawls, from \$2.50 to \$7; Dress Goods, from 1/2 to the finest quality in the market; Men's superior long Shawls; Flannels, Battinettes, Casimere, Cloths, Ready-Made Clothing, Ladies and Gent's Shoes of all grades, Keszey, Linings, and Negro Shoes, Blankets, &c.; Sole Leather of a choice quality, at low rates. In the Millinery line I can offer good inducements to all who would like to wear a beautiful Black or Cut Velvet Bonnet, at a little over half price. Having purchased these goods at greatly reduced rates, no one who has looked for a Bonnet in my store has gone away disappointed. I have also an immense variety of Head Dresses. In Black and Fancy Silks, I expect to meet the views of any and every one who may desire to wear an elegant Black or Colored Silk, the latter especially, as I purchased a large lot at auction prices to run off very cheap. These Silks are of the very best quality, and will be offered at the price of inferior qualities. And last, but not least, I can offer the most approved bell-shaped Hoop Skirts of the "empire" style, an entire new design, made of the best watch-steeple springs.
As the season for parties and weddings is approaching, Mrs. OWEN would remind the ladies that she is well prepared to supply their wants in every article in the line, and all orders to make up such articles will be promptly executed. In addition to her facilities in the line of dress, she would also state that she has the assistance of a fashionable young lady from Petersburg, who will make up dresses in the most approved styles, or cut and fit Bodices for those who buy Dress Goods; also Cloaks cut or made. In a word, she flatters herself that she is prepared to supply all the wants of ladies, both as to the material and making up of all garments, thus making our establishment of more than ordinary convenience for ladies. A call, at least, is respectfully solicited when you come to Hillsborough looking for desirable articles.
127 Store east of the Court House, formerly occupied by Mr. P. B. Ruffin.
Respectfully,
H. L. OWEN.
November 6. 67—3w

TO PREVENT TOOLS FROM RUSTING.—Thousands of dollars are lost each year, by the rusting of plows, hoes, shovels, &c. Some of this might be prevented, by an application of lard and resin to all steel or iron implements. Take three times as much weight of lard as resin, and melt them together. This can be applied with a brush, or cloth, to all surfaces in danger of rusting, and they can be easily kept bright. If tools are to be laid away for the winter, give them a coating of this, and you will be well repaid. It can be kept for a long time, and should be always at hand ready for use.

RURAL ECONOMY.
"May your rich soil,
Exuberant, nature's better blessings pour
O'er every land."
COMFORTS FOR COWS.
Now that the cold season is setting in, let the cows, especially the milk-givers, have all possible attention. They should be well housed and well fed. The stables should be just moderately warm, well ventilated, clean, and provided with suitable bedding. Aside from the mere matter of food and drink, the animal should be kept comfortable. This matter can hardly be over-estimated.
Then, as to fodder: part of this, of course, should be straw, and hay, and cornstalks; but to expect cows to give milk on such lean fare is folly. Favor them with messes of chopped roots, of cut straw, or stalks mixed with meal of some kind. A favorite "mess" for cattle with a friend of ours is this:—Cut up hay, or straw, or stalks, in pieces not more than an inch or inch and a half long, put the provender in a tub or tight box, and pour boiling water upon it; then sprinkle on a little salt and cover the whole with a little bran or meal to keep the steam in. When cold, feed it in messes of a bushel at a time. Good as this is, it should be varied from time to time, for cows like variety as well as men. Cows should be salted two or three times a week. In mild weather they should range by day in a commodious yard, protected on two sides, at least, by covered sheds. And this yard should have a post-neck of running water, or a trough kept full always from a good pump; the first is best.

A NEW DISCOVERY IN WINE MAKING.
A new discovery made by a wine grower near Bordeaux, France, has just been made public, and has somewhat startled the old and steady wine factors, makers, and doctors of that place. The discoverer of the natural phenomenon by which wines are rendered at once fit for bottling, without the long probation they have hitherto been made to undergo, has been for some years living in the mountains. In the various qualities of wine grown by him he was struck with the difference of development of maturity which took place, according to the temperature of the cellar in which the barrels were stored. The higher up the mountain the sooner did the wine arrive at perfection. The reason of this difference soon became clear—atmospheric pressure diminishes gradually as the region rises above the level of the sea. This discovery induced the experiment of raising and diminishing at will the atmospheric pressure upon the barrels, and with the most perfect success, it is said, so as to make old wine in as many days as it formerly took months.

TO PREVENT TOOLS FROM RUSTING.—Thousands of dollars are lost each year, by the rusting of plows, hoes, shovels, &c. Some of this might be prevented, by an application of lard and resin to all steel or iron implements. Take three times as much weight of lard as resin, and melt them together. This can be applied with a brush, or cloth, to all surfaces in danger of rusting, and they can be easily kept bright. If tools are to be laid away for the winter, give them a coating of this, and you will be well repaid. It can be kept for a long time, and should be always at hand ready for use.

If tools are to be laid away for the winter, give them a coating of this, and you will be well repaid. It can be kept for a long time, and should be always at hand ready for use.

TO PREVENT TOOLS FROM RUSTING.—Thousands of dollars are lost each year, by the rusting of plows, hoes, shovels, &c. Some of this might be prevented, by an application of lard and resin to all steel or iron implements. Take three times as much weight of lard as resin, and melt them together. This can be applied with a brush, or cloth, to all surfaces in danger of rusting, and they can be easily kept bright. If tools are to be laid away for the winter, give them a coating of this, and you will be well repaid. It can be kept for a long time, and should be always at hand ready for use.

'Tis a Long Lane That has no Turning.
BY T. L.
Hope on, brave heart, oppress'd by sorrow,
Though gloomy be thy path to-day;
The clouds may disappear to-morrow,
And thus more clear may see thy way,
A goal to brighter hours discerning—
'Tis a long lane that has no turning!
Hope on, fond parent, youth is erring,
And thy beloved one gone astray,
While the paths of vice preferring,
May yet return some happy day,
Rejoice, for thy blessing yearning—
'Tis a long lane that has no turning!
Hope on, poor wife, alone and weary,
Listening for that well-known tread
Throughout the night, so long and dreary,
Every moment fraught with dread,
While sinks thy taper dimly burning—
'Tis a long lane that has no turning!
Hope on, ye workers, sisters, brothers,
Laboring for your daily bread;
What'er your calling, serving others
With horny hands, or aching head,
Keep ye the lamp of hope a-burning—
'Tis a long lane that has no turning!

SUNSHINE AT HOME.
BY T. S. ARTHUR.
Sunshine for home plants is just as necessary as sunshine for garden plants; yet from how many homes is the sunshine banished! It is no wonder that so many children grow up morally blanched, or with strange, one-sided developments of character.
Without heart-sunshine, beaming from radiant faces at home, the affections cannot blossom in a fragrant promise of good fruit. The proposition being made self-evident, needs no enforcing argument. Thought asserts. But a picture from real life, may give the precept an active force in some heart which otherwise might continue to dwell in the darkness of its own sickly fancies, instead of coming into the sunlight.
"But how," asks one, "am I to get sunshine into my home?"
"Open the doors and windows," we answer. "The heavens are full of warm light. Open the doors and windows, and it will come in."
"How am I to open the doors and windows? It is easy to say open them! But how?" asks another.
"We will undertake your case, friend. It is a difficult one, we own; your close fitting doors and windows have been shut so long, that the bolts and hinges are rusty. Lichen and moss have grown over a hundred narrow and close-leaved ivies are hanging their curtains in front of old loopholes through which, at least once a day, in former times, the sun glanced into two or three small chambers of your guarded dwelling. Your children, the home plants whose culture has been so unwisely neglected, are sickly and deformed in their moral growth. They do not adorn and beautify, and make vocal with all sweet melodies your home. There is small hope for them, unless you open the doors and windows of which we have spoken, and get them into the sunshine.
It is evening, and you have turned your feet homeward. What have you been doing all day? Gathering in and hoarding what you have already lost the power of enjoying. Is it not so? Let your thought go away down into consciousness. Look at the face of your real self. How is it, of this life, which you are spending your life to obtain? You enjoy, if the word may be used, the excitement of getting; but, in the dispensation, how little of true pleasure is evolved.
And so, when you turn yourself away from your counting room, and look homeward, the shadows begin to fall around you, and you bring these instead of sunlight into your dwelling.
They are falling around you now. The feet that bear you onward, are not winged by sweet anticipations but seem heavy laden. You have left all light heart-pulses behind you. It is with you now as it has been for months; we might say, years. You know how it will be on your arrival; and how it will not be. No thumping of glad little feet down the stairs and along the hall will answer, like musical responses, to your first steps, long waited for. And yet there are young feet and children's voices in your dwelling. Thus it will not be. But instead, the sharp notes of wrangling, or the dissonant cries of passion, are the sounds that wait for your reluctant ears. The memory of what has been is too distinct in your mind for anything like self-forgetfulness. The shadows fall more and more heavily around you; there lies a weight upon your bosom. Expecting the worst, you are going home prepared for the worst.
But this is not well. Try if you cannot take home a little sunshine. It will be such a novel thing, that we should not wonder at any magical results that might follow.
"It is easy for you to say, Take it home. But where am I to find the sunshine of which you speak?"
You are not very anxious to get home, so turn aside with us into the public square by which we are passing. You rarely go through it, I believe. There is plenty of heart sunshine in there about this hour of the day. Maybe a ray or two may find a path through the cloud that envelops you, and brighten you with its radiance.
What a pleasant transition from the hard pavement, and the stiff, red houses. We
