ADDRESS To the Planters, Manufactur ers and Dealers in Tobacco

in North Caralina. The Convention which assembled at Greesboro, N. C., on the 19th August, instant, and formed the nucleus of "The North Carolina Tobacco Association," requested the under signed'to prepare and publish an address to all those raising, dealing in, or manufacturing tobacco in our State; and we have the honor to submit the following, which has been hastily thrown together, and without that due preparation which the importance of the subject de-

mands. We deem it proper to say in the outset, that there is no question which should be discussed with a deeper and more vital interest, than the one entrusted to your Committee, and that within the limit of this paper we can hardly expect to be Satisfactory reference given, if desired, SIGHT CHECK; and allow interest able to enter the field; but we sincerely trust that our efforts may awaken a desire on the part of the great mass of our citizens who are interested on this subject, and that some abler pens, or more fertile maginations, in a larger and more extended essay, may yet be induced to undertake the task of writing at

length on the subject. Our oldest histories inform us that Tobacco was found growing indigenous upon our soil as far back lighted on Carolina's Eastern shore, cotic, which has, at this day, become

almost universal.

the fiscal world. found to be an indigenous growth upon the soil of North Carolina, is the best proof that the climate and soil of this State are naturally adapted to its growth and culture, dapted to its growth and culture, dapted to its growth and culture,

subsequent history of its culture, growth and manufacture here, would be ample evidence that the culture of the plant is inherently and peculiarly adapted to our soil.

Again, the signs of commission merchants and dealers in tobacco in New York, Philadelphia, Baltimore, Charleston, Savannah, New Orleans and Galveston, and, we might add, in the principal markets world.

When we come to consider the vast proportions of the trade; when we consider that the fine chewing tobacco for the merchantable world, is raised in about twenty counties bordering upon the State line, between Virginia and North Carolina; and when we remember that our lines have been cast in this very part, the most favored of any country yet explored on the habitable globe, for the cultivation of fine grades of the weed, our minds ought to be filled with the importance of the subject which it has been made our duty and pleasure to elucidate.

The magnitude of the question that the tobacco erop of last year, in North Carolina, has been estimated to exceed fifty millions of pounds, which, at an average price of rejoicig that rocks which might be be promptly reported, for the proten dollars per hundred, gives us a used a ballast, were plenty, and tection of those who honestly comstaple which annually turns loose that hi father was possessed with ply with the laws and strive to upon our commerce the amount of sufficiet wisdom to make the ends make the business high toned and five millions of dollars. DR. T. W. KEEN, Chm's. EUGENE MOREHEAD, R. D. HAY, J. R. Morris W. T. BLACKWELL. ToD. NEATHER MOST August 28th, 1873

Correspondence of the Patriot. head. LOUISVILLE, KY., Sept. 13, 1873 Editor Patriot

This is the second week of the Exposition, and it may be pro-nounced a perfect success.

The large building is literally filled with curiosities of nature and art, products of mechanical skill in endless variety, machinery of every conceivable kind, from the miniathus avoid the losses occasioned by ture locomotive which pulls its liliputian train after it to the intense delight of young folks, to the huge monster steam engine, which thunders its caged power with such force as to make the earth beneath

it tremble. On every hand you are met with evidences of man's wonderful genius and the painful, toilsome, yet triumphant labors of American in-

ventors. Here you see a steam engine, a cotton gin, an agricultural machine, a turbine wheel, all as busy as if they had so much to do and just so many minutes to do it in :then you see the products of the machine guided by the artizan's skill in a thousand varieties, whose perfection would make our grandfathers stare with astonishment. There are about 700 models from the Patent Office on exhibition-tri-

umphs of American ingenuity-a little world of developed thought which fills the beholder with admi-The world is too prone to sneer at the man who labors for years to

give material shape to a creature of his brain, and if disappointment at times befall him he is written down mad-but the achievements of those mad men which work such radical revolutions in the avocation of life ought to compensate them for the ridicule of a world of fools. Among the attractions in an en gineering way is a glass, double

working low pressure engine, composed of 4,200 distinct pieces so perfectly constructed that it works with the nicest ease. It is a perfect little specimen of patient persever ance on the part of its constructor. and is designed to show the com plicated nature of the principles of the high pressure system. It is run by gas and is employed in making glass ware of a thousand varieties, useful and ornamental. It attracts much attention.

The art gallery has a fine showare very fine, and the success of the sculptor's chisel is displayed in life that one almost listens to hear

the marble speak. The department of natural history is well represented in minerals and fossil remains, rock-preserved types of life which lived and had It is believed that by co-opera- their being how long since man

in the power of the farmers of ot Southern States. With such a mate as North Carolina pe ention paid to the cultivation grasses as is requisite for the p inction of tobacco, wheat or onts, your State ought to be a very

It is just as easy—much more pleasant, to say nothing about profit—to feed a slick symetrical of an English lord, as to try to fat-ten an ill shaped abortion, whose carcass when skinned would not make a meal for a hungry hound.

In connection with the fair meter I may be allowed to ment that the greatest laugher in country is one of the ma whenever he opens his mouth, the effect produced on your tympanum

form divine and weighs only four hundred pounds. Not long since he had a spell of sickness and arose from his couch with a loss of one hundred and sixty pounds. The medicine that robbed him of that much meat must have been powerful enough to waste a common man away, kill a dog and negro cat. He ought to have one more spell and then he would have course material enough left to make as big a man as Alexander Stephens-minus the

The Ku Klux excitement is now at fever heat hereabouts. The Courier Journal of this city sent a correspondent into some of the counties in the neighborhood of the State Capital, who while personating a sheep dealer learned a great many doings of a miserable lot of vagabonds who rob in preference to work-and their doings are published with as much detail as if the life of the commonwealth hung upon the knowledge of them, They are called Ku Kiux, and plenty of capital will be made out of it by radical dissentionists throughout the country, when the fact is there is nothing political in their composition. They plunder black and white, Democrat and Republican, indiscriminately and annoy all who incur their ill will. They are just such a gang as the

Lowry bandits who infested some of the counties of your State not They are insignificant in numbers -cowardly dogs, and the only won-

der is that they can keep any community in hot water. Now for a little philosophizing and then good-night. Brown wrote, "Roll on, deep ocean, roll!" I wish he had writ ten something commencing, "Roll.

thou sleep forsaken, roll !" and I'd quote it verbatim. Did you ever roll !- I mean in bed-but I need not ask the question. Your plump healthy looking body tells me you are on friendly terms with Morpheus-well I have.

Twas dark, and save a spark from a star which twinkled in the distance far, there shone no light to break the gloom of night. The clock struck ten, and I smoked and then like a prudent chap I thought it well to sleep and sought my bar. mosquito bar I mean, some bars I mean as bad. Perhaps that's good where lawyers war, with Coke and Blackstone, but shed no drops of blood. Balmy sleep touched my eye lids with her finger tip, then fled afar, the little jade, and left them both a jar. No somnorific doze my eyes would close; no oblivion blest would give me rest. I rolled, as I said, upon my bed, three miles or more, lay on one side, then turned o'er. Perchance I swore-I'm sure I didn't snore .-Then my pipe I lit, solace in many a wakeful fit, and watched the circles flit towards the ceiling so fast and thick that they made the mosquitoes as sick at the stomack as if they had the black vomit, for it was vile Kentucky leaf, which some soulless thief palmed off on my nigger boy for Durham. 'Fore man and God, it is a fraud on North Carolina Durham. If I knew the hand that marked the brand, by jingo, I'd "go for 'im." And now I'll go for bed again; to which. after reading this, you may say Amen!

Why is a solar eclipse like a woman whipping her boy 1 Because it's hiding of the sun.

"Well, work away," said an in-

A supreme court-Making love to "the best little woman in the A morning paper speaks of "thieving in the outskirts," which

may be interpreted "picking ladies" A sensational writer says, "it is hard to say goodby." We don't think

so. It is easier to say goodby three

times, than to say "ichthyosaurus" A lonely fellow advertizes in a Chicago paper for a wife, and intimates that he prefers a poor girl— The Louisville Courier-Journal tells sponds and he will be almost cer-

tain to get a poor one.
