—A correspondent thinks the time is opportune for the revival of the prohibition party in this State.

—It is significant that Mr. Hewitt, an iron manufacturer, should oppose the high protective policy which is advocated by almost all the members of the same calling as your own.—State.

—The nihilists have murdered their most intelligent and active foe in the person of Lieut. Gen. Sadeikin, whose knowledge of their habits and designs is said to have been so complete as to render him very dangerous to them.

The Butler Diversion—The Prohibition Opportunity.

It is a fact that the personal force and intrigue are far greater than any previous candidate of this party; that he always accepts nominations from any and all parties; that six months ago his presidential "literary bureau" was in operation, and that there are nearly a million voters closely united in the labor unions. It hence, requires not much of a prophet to say that in some States, and hence in the Nation, the prohibition idea has matured remarkably.

The Old Year and the New.

The events of years, like the actions of individuals, are judged by results. Thus tested, the year 1883, while it has been clouded and obstructed by financial difficulties in some branches of trade and industry, makes a good showing in comparison with the best of its predecessors, and introduces its successors, 1884, with favorable omens.

Internal Revenue Reductions.

Although it is evident that the country has nothing to hope for in the way of a reduction in the internal revenue taxes from Mr. Carlisle's Committee on Ways and Means, such legislation by the Congress, still there is yet a possibility that something may be done in that direction in spite of a packed committee against it.

Autocrats of the Needle.

I have just seen a dressmaker who was a queen, with millions of wives and daughters as her subjects. In front of her residence, in an up town side street, were a score of carriages, and her parlor was crowded with the women who had come in those vehicles.
