Fruit Eaters Need no Doctor. [Rural New Yorker.] We were struck recently by the remarks of a doctor friend of ours, who said no one thing will do so much to make people independent of the medical profession as the daily free use of fruit. He had noticed that those farmers in whose families fruit was largely and regularly consumed, seldom needed his services. We thought what a pity that every farmer could not be con vinced of these truths. It is a deplorable fact that farmers' families do not enjoy that sobust health which country air and out door life, with plenty of exercise should give. It is also a fact that living on farms except it may be an occasional apple. The standard food in a majority of farmers' houses consists largely of bread, butter and meat body. The vein from which the ore was taken curiously escaped the usual notoriety. A good while ago, we do not know how long, a man found quartz rock on the creek, rich with metal that he would not believe it had value, classing it as "mundio" the cornish name for iron pyrites. Since the gold discoveries on Boilston Creek, he thought there might be something in his discovery, and returned to the locality, but has not yet been able to identify the exact spot. He obtained good specimens near by, of which the "shot" is the product. Perhaps a bonanza is in store for some are not more healthy, and that door, telling him they had a letter
