And when he looks at me, why should he look at me so long? And when he looks at me, why should he look at me so long?

When and while the fiery gale was still howling through the town, threatening almost total annihilation along the bay and on the thoroughfares, you could see the flowers of wood, the African American citizens of Charleston, true to the instincts of their race, armed with big and little hatchets, clearing away the debris with a provident eye for extra fire-wood.

A rough estimate of the loss places it at something over a million dollars. There are no lights in the city, both gas and electric lights having gone out, and there has been no railroad communication south of us. The loss of life is six people.

SAVANNAH, August 30.—The loss of naval stores by the storm is heavy. Thousands of barrels of spirits of turpentine and rosin, floating from the wharves and sheds, were carried back on the low lands. The hoops of barrels are bursting and the spirits are running to waste.

DAMAGE TO TREE ISLAND. SAVANNAH, August 30.—It will cost \$50,000 to repair the damage to Tybee Island. Hundreds of houses are ruined and badly wrecked.

It is now estimated that the losses of the rice planters will be much greater than at first supposed. Nearly the whole crop is destroyed. The loss is estimated at \$1,000,000.

The Norwegian bark Medea came into Tybee Roads to-day having on board 15 of the crew of the British ship Nettie Murphy from Pensacola for Dundee. Their vessel was wrecked in the gulf. No lives were lost. The Medea was from Balize and is on her way to Hull.

PORT ROYAL SHIPPING SUFFERS. SAVANNAH, August 30.—The following has just been received by the Morning News from Beaufort, S. C.: The shipping at Beaufort and Port Royal suffered almost total destruction in Sunday's storm. The following vessels are either sunk or ashore:

Clara McGivary, Alma Cummings, W. H. Sumner; the tugs Reliance, Juno, Wymouth, Kiska, Kent, Stone, Dove, Ida and Ivanhoe and the steamer Pilot Boy. The tugs Bessie and Cecilia, the steamer Rydal and the schooners C. H. South Carolina, Florence and Shay are safe. The schooner Messenger was blown up Broad river but sustained no damage but the loss of her anchor and cable. An unknown schooner is ashore and another bottom up in Port Royal sound.

TO DEAD BODIES FOUND. AUGUSTA, Ga., August 30.—News from the storm-wrecked district of Port Royal and Beaufort is still very meagre, the only news obtainable being by mail. Seventy dead and swollen bodies were taken from the Coosaw river to-day by searching parties. Not one-half of the horrors of the storm has yet been told.

The result of today's work of the relief party puts the number of missing at over a hundred, but owing to poor means of communication the correct list of the dead cannot be obtained. In several places along the Coosaw river were found their bodies lying on the bank close together. Graves were hastily dug near the places of discovery and without ceremony the storm victims were placed beneath the earth. Many of the dead were so far advanced in putrefaction that the sight was sickening and revolting.

HALF THE ISLAND BROWNED. SAVANNAH, Ga., August 30.—Beaufort, S. C., suffered fearfully from the storm. Capt. Finnie, of the steamer Bessie, which arrived from Beaufort, St. Helena and Bluffton half an hour before the City of Birmingham, says that Beaufort is wrecked and that on the Sea Islands the loss of life among the negroes is very great. Fully one-half the population of the islands is drowned.

THE SITUATION WORSE AND WORSE. AUGUSTA, Ga., August 31.—A special to-day's article from Beaufort, S. C., says: "Over three hundred and ninety dead bodies have been found on the islands about Beaufort and Port Royal. Over two millions of property has been wrecked near the same points. Every one of the fifteen or twenty islands lying around Port Royal and Beaufort are steeped in sorrow. On every door knob there is a bunch of grapes and upon every hillside there are fresh-made graves some already filled while others await the bodies which will be deposited in them just as soon as some can be found to do the kind Christian set of shoveling the dirt upon the coffin. The beaches, the undergrowth, trees and shrubbery, the marshes and the inlets are turning up new dead bodies every time an investigation is made. Of the many disasters and devastations which have visited this section of the country, none have been half as horrible as those which came Sunday. A ready more than 200 bodies have been found, and those who are at all posted about the country and the habits of the people in the storm-visited sections are confident in their prediction that the death-roll will run as high as 500. Some of the people, and they are among the best people of this section of the State, even place the loss at more than 1,000. There has not been an hour of any day since the early hours of Monday morning that a dead body has not been found at some point on one of the

many islands. As the waters recede and the people move deeper into the wreckage gathered by the storm, the ghastly pictures are uncovered. So frequent are the discoveries that the finding of a single body attracts no attention at all. It takes the discovery of at least a clump of half dozen or more to induce the people to show any feelings whatever."

Those Who Nominated Mr. Cleveland Should Stand by Him. During the debate in the House of Representatives on the 23d, Mr. Hatch, Democrat, of Missouri, speaking in opposition to the repeal of the Sherman act, made an attack on the New York banks, and declared that every one of them had openly and outrageously violated the law for the past thirty days.

Amos J. Cummings, Democrat, of New York, spoke next. He said the New York Democracy needed no vindication at his hands, but the Southern Democracy needed vindication before the people when it arraigned New York Democracy. He represented a district in which there were few banks—fewer, perhaps, than there were in any other district in the United States. He represented the teeming and tolling millions of New York. He represented a district where there were more than 6,000 workers living in one block; he represented a district where the black flag (but not the red) had been raised bearing the inscription "Bread." He represented that cry of "Bread, work." The only work these toilers could get was from the manufacturer told them they could not get not get work until the purchasing clause of the Sherman law was repealed. No man, friend or foe, had ever accused Governor Cleveland of going back upon or abating the job or title from his convictions. At the Chicago convention Missouri had voted solidly for him; Mississippi had done the same thing. The time to enter a protest against him was then, not now. [applause] The time for gentlemen from Missouri to say that they would desert the standard of Democracy was then, not now. [applause.] New York Democracy had bowed to the will of the convention. New York had accepted the platform. New York Democracy had gone to the front in the line of battle. It had pierced the centre of the enemy while the West and South attacked the wings. The New York Democracy today stood by its pledges. It had accepted the platform.

Continuing Mr. Cummings said that New York, in accepting the platform had accepted the platform. New York and the nominee stood on the platform to-day. Gentlemen from the South were responsible for the President of the United States. They ought to have the manliness to stand by him. The trouble was there was a great dearth of politicians. [applause and laughter.]

Prohibitory Law in Maine. The Lewistown Journal, commenting on the enforcement of the prohibitory law in Maine, says: "A New York traveling man was in the Maine office a few days ago, and he said that the more he saw of Maine, comparing it with his own State, the more thoroughly he believed that outlawing the liquor traffic is a long thing, because even if it failed to suppress it generally drives the grog-sloop in to close quarters. In three-fourths of Maine prohibition has practically suppressed the grog-shop, while in the Maine cities, with few exceptions, the traffic is greatly restrained."

While the President's mouth and jaw were swollen in surgical bandages two weeks after the operation the physicians by Mr. Cleveland's direction, disassembled from Mrs. Cleveland the nature of the operation which had been performed and the awful misdeed which it was hoped to prevent. Outdoor exercise and sea air have a powerful effect on Mr. Cleveland at all times and Dr. Bryant has been with him out in a boat much of the time for two months in the hope of building up his system and increasing his vitality. A healthy healing of the wounds in the inside of the upper jaw is all that is necessary to make his complete recovery probable, and that is now believed to be assured.

A Good Thing to Keep at Hand. From the Troy (Kansas) Chief. Some years ago we were very much subject to severe spells of cholera morbus; and now when we feel any of the symptoms that usually precede that ailment, such as sickness at the stomach, diarrhoea, etc., we become scared. We have found Chamberlain's Colic, Cholera and Diarrhoea Remedy the very thing to straighten one out in such cases, and always keep it about. We are now writing this for a pay testimonial, but to let our readers know what is a good thing to keep handy in the house. For sale by Ward and Watkins.

Harrell Denounces Editor Roscow. People who came up from Goldsboro to-day say Secretary E. G. Harrell, of the Teachers' Assembly, denounced Editor Roscow, of the Headlight, on the street. Secretary Harrell was about to be arrested on a peace warrant, but his train left before it was served. Editor Roscow has made some severe attacks on Secretary Harrell.—Charlotte Observer.

Julius Verne's Industry. Mr. Wickwire: I notice that Julius Verne is 65 years old and has written just 66 books. Mr. Wickwire: Well, that is not so many. He only had to write at the rate of one book a year to do that.—Indianapolis Journal.

THE PRESIDENT'S MALADY.

OPERATION HAS BEEN PERFORMED.

Teeth Extracted and Part of the Jaw Removed—Traces of Sarcosin Removed from the Bone and Tissue—Frequent Cause for Alarm.

Dr. Ferdinand Hasbrouck was found by a Press reporter at his home, No. 147 West 126th street last night. He was very reticent when asked to give an account of Mr. Cleveland's malady and the operation he assisted Surgeon General Bryant to perform the President last month.

"As you already know it," said he, "I don't see as there is any use of denying the fact that an operation was performed upon the President, but as to the details of it, I must refrain from discussing them. I was on the yacht only in the capacity of an assistant. Dr. Bryant, who had the whole matter in charge, will no doubt now assume the responsibility of giving out the facts of the case."

"What was your duty in connection with the operation?" asked the reporter.

"I administered gas to the President as an anesthetic and removed the teeth which it was found necessary to take out during the progress of the work. The surgical operation, which was performed by Dr. Bryant, consisted in cutting away a part of the upper jawbone and tissue as far as the orbital plate."

"The disease, the progress of which it was hoped to arrest, was sarcosin, or, in other words, cancer, was it not?" Dr. Hasbrouck was asked.

"Yes, but the disease was in its earlier stage. The infection was entirely local. The tissues of the throat had not been attacked."

"The President's affliction is much of the same character as that from which General Grant suffered and which finally ended his life?"

"It is perhaps of the same character," said Dr. Hasbrouck, "but of a much less alarming nature. Gen. Grant's trouble originated, as I understand it, from a jagged tooth in the back part of his lower jaw, which by rubbing continually against the root of his tongue, and by being constantly irritated by his cigar smoking, eventually produced an ulcerous sore, which developed into sarcosin. Various operations were performed to remove the diseased tissue until nearly his whole tongue had been removed. With President Cleveland it is different. The disease is of recent origin, and had, therefore, obtained but a small start when the instruments of the surgeon disassembled from Mrs. Cleveland."

"Did not the President impress you as a man with very strong constitution?"

"Without a doubt he has an iron constitution, and this will do much toward warding off any further attacks of his malady."

DEBACATING UNDER ALARM. Dr. Hasbrouck seemed very anxious to impress the reporter that the President's condition was not nearly so bad as it would be supposed, and that the accounts of his malady might easily become very exaggerated. He said that he had seen Dr. Bryant about ten days since who assured him that the President, who is under Dr. Bryant's incessant care, was doing very well, and that there was hope that the infectious disease had been effectually eradicated. Complete restoration of health was hoped for by keeping the President in open air all day.

MRS. CLEVELAND KEPT IN IGNORANCE. While the President's mouth and jaw were swollen in surgical bandages two weeks after the operation the physicians by Mr. Cleveland's direction, disassembled from Mrs. Cleveland the nature of the operation which had been performed and the awful misdeed which it was hoped to prevent. Outdoor exercise and sea air have a powerful effect on Mr. Cleveland at all times and Dr. Bryant has been with him out in a boat much of the time for two months in the hope of building up his system and increasing his vitality. A healthy healing of the wounds in the inside of the upper jaw is all that is necessary to make his complete recovery probable, and that is now believed to be assured.

Two Citizens of Davis Woke up the Wrong Passenger. Winston, August 30.—News was received here to-night of a serious shooting scrape at Advance, Davis county. Two men named Davis Oates and Jim Crews rode up to the house of Acting Policeman Sam Poindester. When the latter came to the door the men began firing at him. The latter went to a room, got his pistol and shot both men. Two balls struck Oates' head and the third went through his nose. Crews was shot in the leg. Both men had to be carried home. Oates is in a critical condition.

REMOVED BY DEATH. Miss Dusenbury, Postmistress at Concord, Dead.

Miss Mary R. Dusenbury, postmistress at Concord, died August 22nd, at her home, after a brief illness. She was in Charlotte last week in her usual health. But was taken sick a few days after. The physicians of Concord were assisted in their treatment of her case by Dr. John Whitehead, of Salisbury, but medical skill was of no avail. The immediate cause of death was heart failure.

Miss Dusenbury was a native of Maryland, coming South more than 25 years ago. Her relatives first settled in Lexington and it was from there she moved to Concord, being appointed postmistress first 20 years ago, under Grant.

She was reappointed under each succeeding administration. Miss Dusenbury was reappointed by President Harrison just before his term expired, and her nomination went to the Senate, but it was not confirmed. Her death brings a long controversy to a sudden close.

She was a daughter of Captain Dusenbury of the United States Navy.—Charlotte Observer.

Say, Mister! Is it possible you are suffering from catarrh, and have not used Dr. Sage's Catarrh Remedy? All the terrible consequences of catarrh in the head may be averted if you'll but make the effort! You know, too well, its distressing symptoms! You possibly know, if neglected, it invariably goes from bad to worse, and is likely to run into consumption and end in the grave! Here is a way of escape: Its makers are willing to take all the risk, and make a standing offer of \$500 for an incurable case of this loathsome and dangerous disease. You can get \$500, or better—a cure!

Julius Verne's Industry. Mr. Wickwire: I notice that Julius Verne is 65 years old and has written just 66 books. Mr. Wickwire: Well, that is not so many. He only had to write at the rate of one book a year to do that.—Indianapolis Journal.

The North Carolina Trotting Horse Breeders' Association

This Association held its second annual meeting in the city of Raleigh on the evening of the 23rd inst. The annual election of the officers of the association resulted in the election of Capt. B. P. Williamson, of Raleigh, as president, and Julius H. Hardin, of Graham, as secretary and treasurer.

The meeting would indicate to the most casual observer that the breeding of the light harness horse is no longer an experiment in North Carolina but a business established on sound business principles by some of the most progressive and most successful business men in our State. Our successful manufacturers, merchants bankers and our leading farmers are turning their attention to the breeding of the trotter in a way that is an assurance that the business may be looked upon as one of the great producing forces of the Old North State.

The most important step yet taken by the Association was the formulation of plans to establish a State Racing Circuit, races beginning in the year 1894.

This circuit will cover the entire State, and the association will give a race meeting at every track in North Carolina where the local associations and business men of the community will co-operate with its officers in providing remunerative purses for the horsemen. This action of the breeders will greatly increase the earning capacity of the trotter and will be a great inducement to our enterprising citizens to adding to their sources of income. JAMES H. HARDEN, Sec. and Treas.

"Feak and Weeble." A friend of mine had an odd way of mixing her words. Perfectly unconscious of it, she would often make folks laugh. She would speak of feeling "feak and weeble," for weak and feeble, and "castor oil pills," for castor oil pills. But she was weak and feeble, until she took that powerful, invigorating tonic, "Favorite Prescription," which so wonderfully imparts strength to the whole system, and to the womb and its appendages in particular. For overworked women, run-down women, and feeble women generally, Dr. Pierce's Favorite Prescription is unequalled. It is invaluable in allaying and subduing nervous excitability, irritability, exhaustion, prostration, hysteria, spasms and other distressing, nervous symptoms, commonly attendant upon functional and organic disease. It induces refreshing sleep and relieves mental anxiety and despondency.

Headquarters for Shoes and Slippers. Ladies' Slippers 45c. \$3.08 and up worth double the money. Ladies' Glove Grain Button and lace Shoes at 98 cents; ladies' solid leather Dongola button and lace Shoes at 98 cents, all solid; women's every-day Shoes from 75 cents up; all solid leather; men's nice shoes, lace and gaiter, only 95 cents and up; men's canvas Shoes only 95 cents and up; men's coarse Shoes only 95 cents and up; in fact any kind of Shoes and Slippers you want at HARDY'S PRICES.
