FERTILIZING BY ELECTRICITY

Nikola Tesla's Latest Great Discov ery Made Public.

Nikola Tesla's latest contribution to science opens up one of the most surprising visions of man's future control over nature that the nineteenth century has produced. It shows that not only may the earth Now of Charlotte, will be in Greens-boro at the McAdoo House on Wednes- out of the circumambient air may be drawn an element which can restore the exhausted energies of the soil and increase the fertility of even the most richly favored lands. I found that, while he was willing to discuss the bearings of the discovery with me privately, he proments concerning it to the bare which will be quoted further on.

As the earth fills with inhabitants and more and more of its be. On the contrary, they can Brick! Lime! Cement! easily be drained off by the too prodigal cultivation, and then the grain to Brick! Lime! Cement! jaded land lies almost powerless to

MANY WORN OUT FARMS Exist all over the country, and frequently their owners find the expense of applying fertilizing agents in proper quantities too great for their resources, and so the land

sessor and to itself. In the neighborhood of large cities the soil, plied with powerful stimulants, is driven like an engine with safety valve tied down, in order to supply the pressing and ceaseless demands that are made the planet he dwells on nourish upon it. In many places it becomes practically an artificial soil, and, although its productiveness is
