

Have You Tried Our

Palm Beach Suits

Or as the Mohair Suits are a little more dressy possibly you might like them best, but for the comfort there is no difference. As to cost the Palm Beach Suits sell for \$8.50, are washable and will not shrink. The Mohair Suits sell from \$10 to \$22.50. They dry clean beautifully and will not spot, pucker or draw from being wet. They are not rain proof but a shower will not hurt them, but why get wet when you have one of our zephyr weight Slippers at \$5.00?

\$1 Regal Shirts always a bargain at \$1.
Savoy Shirts \$1.50.
Boyden Oxfords \$6.00.

TOTAL ECLIPSE OF THE SUN

WILL BE OBSERVED IN EUROPE AND ASIA AND PART OF NORTH AMERICA.

The eclipse of the sun on August 21 next—total in part of Europe and Asia and partial in northeastern America—is attracting the widespread attention of astronomers and scientists, various expeditions being arranged to witness this phenomena. In view of the public interest in the event, C. G. Abbott, head of the astronomical branch of the Smithsonian Institution, Washington, D. C., and a recognized authority on solar phenomena, gives the following popular account of the eclipse, and the scientific results sought from such events:

On August 21, 1914, the moon will pass exactly between the earth and the sun, and there will be a total solar eclipse. It will not be observed in America, except as a small partial eclipse at sunrise in the northern states and Canada, but in Persia and Scandinavia the full effect will be seen.

Although the moon looks about the same size as the sun, it is very much smaller and nearer. The sun is 865,000 miles in diameter and 93,000,000 miles away, while the moon is 2,163 miles in diameter and 239,000 miles away. On account of the moon's small size compared with the sun, the shadow cast by the moon is a cone, and the point of this cone just barely reaches the earth.

In the August eclipse the diameter of the cone at the earth's surface is only about 85 miles, so that the eclipse is visible as total only in a belt about 85 miles wide stretching over the countries named above. The important cities of Bitlis, Trebizond, Kief, Minsk and Rega lie near the center of this belt. It passes about 100 miles north of Stockholm and Trondheim. The eclipse will be seen as partial over a very wide area, including northeastern America, Greenland, Europe, half of Asia and half of Africa. Within this region only a portion of the sun's disk will be hidden by the moon.

Sometimes the moon and sun occupy such positions that although the moon passes directly between the earth and the sun, the shadowed cone does not quite reach the earth. Such solar eclipses are called "annular" and are nowhere total eclipses. In the most favorable case a total eclipse may last over seven minutes at a station, but such occasions are very rare.

There will be total eclipses visible in the United States on June 8, 1913; September 10, 1923, and January 24, 1925.

As the glare of the sun in the sky is removed, and yet the moon hardly more than covers the sun, it is possible at times of total solar eclipse to see all the celestial objects near the sun. These can not be seen at other times because they are lost in the bright sky light. It is this which makes astronomers so eager to observe total eclipses. The most striking thing seen is the solar corona, a beautiful pearly light stretching away from the sun in all directions, something like the Aurora Borealis seen in northern countries.

Crop Prospects in Southwest.
With a crop in excess of 100,000,000 bushels of wheat almost certain in Kansas, Nebraska, Missouri, Oklahoma and Texas this year, producers, millers and grain dealers are giving consideration to prospects for prices. Every advance of a cent in the price of the cereal will mean an increase of \$3,000,000 in the returns to the southwest from its unprecedented crop and every decline of a cent will mean, of course, a contraction in wheat revenues of \$3,000,000. The general opinion is that the southwest will average about 65 cents per bushel for its wheat on farms, which should make the crop of that section worth \$200,000,000.

Against Star Chamber Proceedings.
Representative E. Y. Webb, of the Ninth North Carolina district, has introduced in Congress a bill to provide that persons indicted or informed against for crimes and misdemeanors, other than capital offenses, shall be furnished copies of the indictment or information at or before the time of arraignment, or pleading. Names and addresses of witnesses would also be furnished to defendants at least one day before trial.

Mr. Webb, who heads the judiciary committee to which the bill was referred, seeks to liberalize the "star chamber" features of prosecutions.

Too Much Militancy.
"Would George enlist?"
"No, I don't think he would."
"What's the reason? He comes of fighting stock."
"That's the reason. He's soured on fighting. His grandmother is a Colonial Dame, his aunt is a D. A. R. and his mother is a militant."

PHYSICIAN SAYS HE HAS FOUND MISSING LINK.

Dr. Howard A. Knox, an assistant surgeon in the United States public health service at New York, announced at the annual meeting of the Eugenics Research Association, at Columbia University a few days ago, that he believed the "missing link" had been found at Ellis Island.

Dr. Knox told of the strange individual he believes to have been a "throw back" to the caveman, or, as the surgeon himself calls him, "the man Darwin wrote about, but never saw."

The man's full name cannot be disclosed, according to the rules of the service. He was called Joan, came from Finland just two weeks ago and was deported on account of "constitutional inferiority." He was of average height, but his strength was prodigious.

"His gait was roving and his eyes constantly searched the ground," said Dr. Knox. "His features were distorted with a strange grin, rather of recognition than of understanding. His forehead was startlingly receding, his ears much lower in the head than is normal with man, placed exactly, in fact, as are an ape's ears. The top of the head was round and covered with coarse, wiry hair."

"The under jaw stuck out much too far, and in place of canine teeth he had long fangs that made his lips protrude. They eyebrows were shaggy and the ridges above them were unusually prominent, another ape characteristic lacking in man. The nose was of the spreading saddle type."

"During his examination the Finn was docile and in a dumb way good-natured. He had had four years schooling and showed the mentality of a ten-year child."

"The big toe of each foot was like a thumb and could be used for any purpose that the latter could be put to. The most remarkable feature of the case was the hands, which were ape-like in nearly every particular."

According to Dr. Knox many of the recent immigrants from certain countries have shown marked indications of mental and physical inferiority.

"With the present laws," he added, "we are absolutely powerless to stop them, although it be a simple matter to do this if we had definite physical standards."

"It would seem from my observation that it is the unfit of all classes who show the strongest tendency to remain here at the present time, for it is here that the struggle is easiest and it is here that the kindest provision is made for their existence, and it is here that the law of the survival of the fittest does not apply."

Reduced Rates Now in Effect.

The reduced interstate freight rates into North Carolina from western points and from the Pittsburgh one in the east, that were fixed through the compromise settlement between the railroads and the state authorities and approved by the legislature and the interstate commerce commission, became operative Saturday, applying to all freights originating on that day. These reductions, it will be remembered, are expected to work out savings to North Carolina shippers aggregating two million dollars a year.

Also new and reduced rates on furniture to the west became effective Saturday. The western and Pittsburgh rates, it will be remembered, were worked out in conferences between the railroad officials and the members of the corporation commission at Old Point Comfort, and were later accepted in the special session of the legislature.

School For Feeble-Minded.

Definite announcement is made that the State School for the Feeble-Minded, at Kinston, which has had such a checkered history during its period of erection, is to be formally opened for the special work for which it was established—the best possible training for feeble-minded children—on July 1 under the superintendency of Dr. C. Banks McNairy. It is announced that the policy will be to take in first the highest grade of the feeble-minded girls in the state and then the highest grade boys, the age limits being 6 to 21, and then admit the lower grades in their order until the limit of the capacity of the school is exhausted.

It's a Hard Job, Bud.

Reidsville Review.
With everybody clamoring for the news concerning important cases in court, and everybody playing favorites in the hearings and "taking sides," it is a hard matter for a newspaper man to do his duty by keeping his head and printing only the salient news of the case. But this is the plain and manifest duty of a newspaper, and we try very hard to do our duty.

URGES THAT WE FORGET MASON AND DIXON LINE.

President Wilson has expressed the wish that the Mason and Dixon line be forever forgotten. In a letter written this week to H. B. Joy, of the Lincoln Highway Association, asking that the road run from Philadelphia to Gettysburg through Washington, the president suggested that it would be a good means of further obliterating sectional feeling between the north and the south.

In his letter to Mr. Joy, President Wilson says:

"I am sure that the entire country is interested to see to it that there should no longer exist a North or a South in this absolutely united country, which we all love, and that the imaginary Mason and Dixon's line should be made once and for all a thing of the past, and as a small contribution to that end, I earnestly suggest that the Lincoln Highway Association should grant permission to place the official Lincoln highway markers on the macadam roadway from Philadelphia to Washington through the properly selected streets of the latter city to the Lincoln monument, and from there through Frederick, Md., to Gettysburg."

With Malice Aforethought.

Mrs. Cronan heard her little granddaughter, Margaret, crying as if in pain, and hastened to the child.

"Why, dear, what is the matter?" inquired Mrs. Cronan. "Did you meet with an accident?"

"N-no, grandma!" sobbed Margaret. "It w-was'n't an accident! M-mother did it on purpose."

THE NORTH CAROLINA College of Agriculture And Mechanic Arts

The State Industrial College offers strong courses in Agriculture, Horticulture, Stock-raising, Dairying, Poultry, Veterinary Medicine, in Civil, Electrical, and Mechanical Engineering; in Chemistry and Dyeing; in Cotton Manufacturing, and in Agricultural teaching. Four year Courses in Agriculture and in Machine Shop Work. Faculty of 61 men; 738 students; 25 buildings; excellent equipment and laboratories for each department. On July 9th County Superintendents conduct entrance examinations at each county seat. For catalogue write E. B. OWEN, Registrar, West Raleigh, N. C.
