Our contemporary states the situation briefly and pointedly and leaves no room for elaboration. It says: In conversation last night with a distinguished lawyer, he suggested to the writer the strong probability that the shocking tragedy at Lexington Wednesday morning was the work of a tramp and referred to the great number of tramps who are infesting the State. He cited the statute which gives mayors and magistrates authority to have vagrants arrested and punished and urged that this is an excellent time for officers of the law to move in the matter. The Observer gives publicity and its most cordial enlorsement to the suggestion. Our towns and cities should be cleared of these pests. Considering their number and the desperate character of many of them, it is really quite remarkable that no more crime is traced to this class than
