8-3-4mon Plain Talks on Fertilizers

Increasing and Safeguarding the Wheat-Crop

The use of commercial fertilizers on the wheat crop is yearly becoming more general-proof enough that it pays, and pays well.

Too many farmers, however, use fertilizers without due regard for the special needs of their soils. Often they buy the cheapest

grades. Or they use very

small quantities. That such unscientific use of fertilizers has proved profitable indicates what it can accomplish

for wheat growers if used more carefully and intelli-

gently. The best way to learn just what fertilizers will pay you

best is to make comparative tests on a small scale with your soils - then use a

you will undoubtedly increase not only the average yields, but your profits as well.
