FOR YOUR HAIR

Here Are Facts We Want You To Prove At Our Risk

Marvelous as it may seem, Rexall '93' Hair Tonic has grown hair on heads that were once bald. Of course it is understood that in none of the cases were the hair roots dead nor had the scalp taken on a glazed, shiny appearance.

When the roots of the hair are entirely dead and the pores of the scalp are glazed over, we do not believe that anything can restore hair growth.

When Rexall '93' Hair Tonic will do as above stated, it is not strange that we have such great faith in it and that we claim it will prevent baldness when used in time. It acts scientifically, destroying the germs which are usually responsible for baldness. It penetrates to the roots of the hair, stimulating and nourishing them. It is a most pleasant toilet necessity, is delicately perfumed and will not gum nor permanently stain the hair.

We want you to get a bottle of Rexall '93' Hair Tonic and use it as directed. If it does not relieve scalp irritation, remove dandruff, prevent the hair from falling out and promote an increased growth of hair and in every way give entire satisfaction, simply come back and tell us and without question or formality we will hand back to you every penny you paid us for it.

We lend our endorsement to Rexall '93' Hair Tonic and sell

IT IS YOUR PROPERTY. A prescription is a written order for a certain drug or combination of drugs. When it passes from the physician's hand into yours it becomes your property. The physician has no right to require you to take it to any particular druggist; he may advise but the responsibility rests with you to use your own judgment in the matter. We are thoroughly equipped to fill any physician's prescription regardless of whose blank it may be written on. No physician in this locality will criticize your judgment if you bring your Prescription to us for compounding. J. D. McMILLAN & SON. The Prescription Druggists. 10-21

LECTURE ON PIANOS The Piano is no longer an article of luxury designed exclusively for the professional musician or the rich of musical taste, or purchased as a parlor ornament to be kept sacredly locked, except on the occasion of some important family festivity. It has become a household necessity. Fifty years ago there were few Piano makers but nearly all strove to make a first-class instrument. To-day the number of makers has increased tenfold. All claim to make a first-class Piano, though some would find it difficult to substantiate the claim. A Piano maker must be an expert in knowledge of all the raw material employed in the construction of the instrument, such as the lumber for the case and sounding board, the felt for the hammers in the action, the wire for the strings; he must have a working knowledge of metallurgy, so that the frames may be cast properly; and he must be of inventive mind, so that he may be able to constantly improve the method of construction of his instruments and be able to utilize the discoveries of modern science. Taking this under consideration and it can't be doubted we find two classes of Piano: First a Piano built honestly by skilled labor. As stated above, these are the Pianos that are never advertised at factory cost; these are the Piano-makers that don't have to cover the whole country with catalogues and so-called cut prices to sell their product. First-class Piano makers never have to advertise one-third or one-half off to sell their goods. Beware of the Piano that costs one price today and in a sale tomorrow is one or two hundred dollars cheaper. Keep up with this lecture, whether you have a Piano or not. Continued next week.
