LOCAL BRIEFS.

—License has been issued for the marriage of W. W. White and Mary Ivey.

—Mr. W. D. Barfield of Ten Mile, who has been marketing quite a bit of vegetables here this season, was in town Friday afternoon and among some tomatoes he was selling he had one that weighed one and a half pounds. It was a "whopper".

—Mr. Alf H. McLeod with his automobile and Clide Love, colored, on a bicycle had a head-on collision at the Seaboard station Friday morning. Love was right much bruised up and he has not been able to be out since, but it is not thought that he is seriously hurt. The bicycle was pretty badly torn up. It was all purely accidental.

—Mr. and Mrs. T. C. Evans and infant son, T. C. Jr., will move Wednesday to Cheraw, S. C., where, as has been mentioned in The Robesonian, Mr. Evans has accepted the position of cashier of the Citizens Bank. Mr. and Mrs. Evars, who moved to Lumberton from Charlotte nearly three years ago, have many warm friends here who regret exceedingly to lose them as residents of the town and who will follow them with best wishes. As also has been mentioned, Mr. T. C. Barnes of Barnesville succeeds Mr. Evans as cashier of the Farmers & Merchants Bank here and moved his family here some two weeks ago.

In Social Circles.

Mr. T. E. Petty of Cordele, Ga., who spent a few days last week in town a guest of Mr. David Fuller, entertained Friday evening a few friends at supper at the Waverly hotel. \$8,000,000 Damage Done to Crops by Army Worms.

Washington Dispatch, 8th. More than \$8,000,000 damage was done to crops in the South last month by the army worms, according to unofficial estimates of the Department of Agriculture.

Whether the season's second brood of the insects, already appearing in South Carolina, Alabama, Georgia and other States, will increase this loss is of much concern to government experts. All the means at the department's disposal are being used to meet the emergency.

Reports of the department say the army worm, at some places half a foot deep on railroad tracks, has stopped trains. The loss is placed at \$1,000,000 in Georgia while in Arkansas twenty per cent of the corn and 10 per cent of the cotton planted have been destroyed. Losses also have been great in Tennessee, the Carolinas, Alabama, Mississippi and Louisiana. In some of these, particularly in Louisiana, they exceed the million mark. Cotton, corn, sugarcane and rice crops from Louisiana to the Atlantic have been affected.

Typhoid Fever Present—The House Fly Guilty.

There are about twenty cases of typhoid fever in the county. The source of infection of many of these has been carefully investigated. Upon analysis the drinking water is found to be good, with few exceptions. The dairy products are not the source of present infections. It seems that the house fly is guilty. A good per cent of the homes in which typhoid cases are found are not screened. In many instances the dishes, linen, and excretions from the sick room are not disinfected. Care should be taken to prevent the spread of the disease by contact, by flies, by contaminated drinking water, or by infected dairy products. The typhoid germ always enters the system by mouth and laboratory findings show that they may be present in the system for twenty months after recovery from the disease. B. W. Page, Co. Supt. Health.

Mr. Kitchin is spending a large part of the time going about the State urging the "dear people" to turn out a man "who does things," and give the man whose promises four years ago are yet unfulfilled a chance at a few more promises.
