COMMISSION AND MANAGER PLAN OF COUNTY GOVERNMENT

(Continued from page three)

gone back to our antiquated system. There is a bill now pending in the Legislature of Louisiana to put that State under a similar form. The Governor of Kansas is advocating it for that State. Our own model city of Charlotte is now considering this for plan. A writer for the July World's Work says: in the first ten minutes he sat in the Trenton, N. J., council room he saw business transacted that would not have been concluded in less than three months under the old system. Since the commission form was established at Trenton three years ago fifteen other New Jersey cities have established it. He says though he tried he did not find a single man in Trenton who could give a single instance where commission government had failed. He says further that it has been successful in towns of one thousand and cities of four hundred thousand and may solve New York's municipal problems. He says also that the Trenton government places responsibility where it can't be shirked. Every voter can know who is responsible, and its success lies more in the form than in the men. Do you want it? If you do, it's only a question of effort and time. We must have improvements from some source and I offer this as best I can find.

In conclusion, I have heard that some had asked why I was advocating this plan, that I must expect some thing in return. I do expect a better and less expensive government. I control large interests and the taxes have become burdensome. I expect some relief from that source. But aside from that I hope that this effort today will result in making life easier for my fellow countrymen. I see life through a different light from the way it appeared to me in years gone by. I have seen in recent years fortunes swept away in a day. I have seen strong healthy men collapse in an instant. These and other observations have convinced me that if we do any permanent good in this life, it's what we do to make the world better; and I would want no greater monument to my memory than that those who live with me and those who follow me could truthfully say that some act of my life had made the burdens of life fall lighter on them, and I believe this plan of government will bring results that will make life easier for this and the coming generations.

This plan provides that when possible all work should be done under competitive contracts. This plan provides that all elective officials are directly responsible to the people and that the responsibility is fixed and are subject to referendum and recall.

It provides that full publicity of all public records be submitted to the public under a modern, business-like statement. An adequate system of accounting that will guarantee a dollar's worth of service for each dollar expended, and the books to be open to inspection each day to any citizen. Finally, it provides for a complete business system, organized and operated like a well regulated bank or business corporation, with the people as stockholders. They elect the commissioners as their directors and the commissioners select the executive head, whose duty is to bring results for the stockholders. If he in any way fails in this he can be promptly discharged by the commission or recalled by the people, or stockholders.

This manager would not need to be selected from any one place, but wherever the proper man or men could be found.

Germany, said to be the best governed country in the world, calls their officials like we call our preachers, professors, etc. Fitness and merit is the ruling power in their selecting servants of the people. In Robeson who are the servants?

County Government.

Charlotte Observer.

Major McKinnon's Lumberton speech, in which he outlined a plan for county government by a commission and paid by a manager, caused The Gastonia Gazette to discard an editorial it had prepared on the same subject and to construct another along new lines. The plan which Major McKinnon has suggested, like the first draft of all economic legislation, is subject to revision, amendment and improvement. He has advanced the idea upon which constructive legislation may be built. The Observer spoke truly when it said Major McKinnon had started something which would attract the attention of the State. The discussion already developed indicates that the more progressive counties in the State are wanting something better than the practically obsolete system of government by county commissioners.

Cured of Indigestion.

Mrs. Sadie P. Clawson, Indiana, Pa. was bothered with indigestion. "My stomach pained me night and day," she writes. I would feel bloated and have headache and belching after eating. I also suffered from constipation. My daughter had used Chamberlain's Tablets and they did her so much good that she gave me a few doses of them and insisted upon my trying them. They helped me as nothing else has done." For sale by all dealers.

The Cortright Company advises us that the use of these goods has grown enormously all over the country and they can only attribute this constant growth to the splendid satisfaction the roofing is giving.
