NEWS NOTES AND COMMENT Crop Prospects Are Fine—Children's

hulls.

ST. PAUL NEWS PACKAGE

THE ROBESONIAN,

Tested Buckeye Hulls

side by side with old style hulls

Mr. C. H. Noblin, Forest, Miss., states that he is using Buckeye Hulls exclusively. He experimented in the beginning by using old

style hulls and Buckeye Hulls side by side, and found by actual comparison that his cows fed on Buckeye Hulls gave more milk than the cows fed on old style hulls. There are several reasons why

should give these results. They are all roughage. There is no

worthless lint to clog the digestive tract and make the assimilation

of food difficult. They mix uniformly and thoroughly with other feed. They are free of trash and are unusually clean. Test Buckeye Hulls as Mr. Noblin did and you will have the same results. And remember, they cost you very much less per ton than old style

To secure the best results and to develop the ensilage odor, wet the hulls

thoroughly twelve hours before feeding. It is easy to do this by

wetting them down night and morning for the next feeding. If at any time

this cannot be done, wet down at least thirty minutes. If you prefer to feed the hulls dry, use only half as much by bulk as of old style hulls.

Book of Mixed Feeds Free

Gives the right formula for every combination of feeds used in the South. Tells how much to feed for maintenance, for milk, for fattening, for work. Describes Buckeye Hulls and gives directions for using them properly. Send for your copy to nearest mill.

Conspiracy to Destroy Lake Shipping

Secret investigation by government agents has disclosed the existence of a conspiracy to destroy or hinder shipping on the Great Lakes and thereby delay the organization of American war armies and check the from the West to the East, states a Washington dispatch of the 2nd.

tice departments are co-operating to bring the offenders to punishment. The Canadian government probably three ounces of orchard white. will be called upon to help. Care should be taken to strain the This plot, engineered by Germans, assisted by sympathizing American citizens, is believed to have been re-snonsible for the succession of "ac. cident" to lake shipping, especial-ly in the neighborhood of the Sault Ste Marie canal, which began about a month ago. The steamers Saxonia and Pentacost Mitchell were sunk at the mouth of the Soo river, with the channel. The steamer Venetian Maid was sunk in the Detroit river, with the loss of one life and later an at tempt to dynamite the steamer Mack-inac was made. The Kasaga II was blown up and burned and the Jay Dee III and the Niagara had their machinery wrecked. This plot, engineered by Germans, juice through a fine cloth so no lem-
