#### SERVICE AND SALES STATIONS

Same Management

Same Service

We cordially invite you to inspect our new garages

You will know them by the large FORD sign over the fronts

These garages are much better than we are required to maintain by the Ford Motor Company.. They are built for both the present and the future. They were especially built and equipped for YOU-for every FORD owner. If you do not take advantage of them, you fail to get one of the most valuable considerations you buy when you pay for your FORD car.

We carry a \$25,000 stock of genuine FORD parts, and maintain a repair department that does high grade, honest work. We work only on FORD cars, and charge only FORD prices.

We also carry a large stock of tires, and every accessory that has any place on a FORD car.

Waste is Always a Sin But Now It is a Crime as Well.

SERMON BY DR. C. L. GREAVES.

Synopsis of a sermon on food conservation preached by Dr. C. L. Greaves at the First Baptist church last Sunday morning.

Text, John 6:12. "Gather up the

sued which ought to make us hesitate to ever waste a crumb of bread.
"Gather up the fragments". Jesus did not express himself on unimportant things. Economy and thrift have their places in the plan for the salvation of character. Over the twelve baskets of fragments Jesus issues the least. As a result of our plenty we have become very choice in our selection of foods and great eaters of rich and concentrated foods. Moreover we have become wasteful, and the garbage can receives every year its tons of good foods, until it has become a national scandal.

Waste New 2 Crime sued which ought to make us hesbaskets of fragments Jesus issues the commandment we need to have emphasized today "Thou shalt not waste

bread". Ours is a land of plenty. We have fragments that remain, that nothing never known a time when anyone need

go hungry. Travelers tell us that Our Lord had multiplied the five even in times when the world is not loaves and two fishes into a suffici- at war there are vast multitudes in ency to feed the vast crowd of five India and China who are always hunthousand persons. What need could gry. They even accept it as a naturthere be for economy when bread al condition of living, as we do heat could be had so easily? Yet at the dinner would furnish an Eastern close of the meal a command is is- feast. As a result of our plenty we

> Waste Now a Crime. Waste has always been a sin. It is a sin because it mocks at God's boun-His providence. It is a sin because which craves that which others lightly throw away. But we have always been lenient with waste. We have thought it foolish, but it injured the waster only, and so it was primarily his lookout. Was it not his loaf that he threw away? But that is so no longer. It is the other man's loaf that is waste. There is no longer bread enough to go around in a hungry world, and if you waste, another in consequence goes hungry. Therefore waste is now not only a sin but a crime as well.
>
> It is the other man's loaf through your hair, taking one small strand at a time. The effect is amazing—your hair will be light, fluffy and wavy, and have an appearance of abundance; an incomparable lustre, softness and luxuriance.
>
> Get a small bottle of Knowlton's Danderine from any drug store or toilwaster only, and so it was primarily

A World in Need. For our's is a world of need. In normal times Europe imports 750 million bushels of grain from other lands. Now there is an additional shortage of 250 million bushels due to the men being in the army and agriculture having to depend on the labor of women and children. There is also a shortage of 30 million cattle and sheep. Moreover, our American wheat crop has been short for two declares that the conditions may be years. Europe in normal times draws her breadstuffs from Russia, India, South Africa and South America as well as from us. But the stores of wheat in Russia cannot be reached. Ships cannot pass through Suez can-al in safety, besides shipping is too precious to send on long voyages. So the hungry peoples of Western Eu-rope must look to America for sustenance. When we consider then the food shortage in Europe, the smaller crops produced in America and the fact that ten per cent of all we ship to Europe is sunk by the deadly sub-marine, I think we shall agree that waste is now a crime.

War Problem of First Magnitude. The food situation is a tremendousy serious problem. It is a war problem of first magnitude. Valor is of no avail against starvation. The strongest armies grow weak if the staff of life is withheld. Cut off England's food supply and Germany can conquer England without landing a soldier. Riots, mutinies and insur-rections are the death throes of starving nations. The Allies must be fed

Moreover, the food problem is a humanitarian problem as well as a war problem. To know that there are hungry women and children by the million is a disquieting and harrowing thought. Our humanity demands that we share our abundance with them. What is our remedy for meeting these conditions? Our government is making a request of every household.

or all is lost.

#### OF BEAUTIFUL HAIR SOFT, GLOSSY, WAVY

cation of Danderine you can not find ty and presumes upon-the riches of a single trace of dandruff or falling hear and your scalp will not itch, but it despises the worker's toil which produced. It is a sin because it disproduced. It is a sin because it disregards the pleading hand of poverty which craves that which others lightover the scalp.

A little Danderine immediately doubles the beauty of your hair. No difference how dull, faded, brittle and

Danderine from any drug store or toilet counter for a few cents and prove that your hair is as pretty and soft as any—that it has been neglected or injured by careless treatment that's all-you surely can have beautiful hair and lots of it if you will just try a little Danderine.

declares that the conditions may be met by two very simple expedients. First, do not waste anything either by overeating or by throwing away. Second, eat sparingly of wheat bread, sugar, meat and fats, substitute corn for wheat, substitute syrups for a part of our sugar, reduce amounts of meat, lard and butter. Use vegetables, fish and poultry. Shipping space demands that we ship only wheat, meat, sugar and fats, staple concentrated foods, to the Allies. How easily we can do what is asked of the as householders. How girmle it us as householders. How simple it is, yet how much it means to our allies, how muchit means to us.

What a precious thing a loaf of bread has become! Now as never before it represents life, power, victory and liberty! Without it cannons are
