See The Asbestos Sweat

If you want to know why range bodies rust out from the inside
leaving an otherwise good range, come and see the Asbestos
Sweat. See where and how the Sweat-Rust forms. See the pa-
tented Copper-Clad Idea: "A Sheet of Pure Copper Between
the Range Body and Sweaty Asbestos."

See these things for Yourself—know for a certainty.
SEE THE LATEST STYLE IN RANGES

The range with concealed hinges, catches, latches, corners and
crevices.

The range as smooth as a dish because the nickel parts are free
of rivet and bolt heads.

The range with four walls and an air space—built like a ther-
mos bottle.

The range with a solid one piece malleable iron back flue.

The range with a square smoke pipe.

Copper-Clad means a sheet of pure Copper is placed BE-
TWEEN the sweaty asbestos and range body. To place it else-
where would be like climbing on top of a roof to get out of the wet.
