In sending his check for \$25 to The Robesonian for the Lumberton Post club room fund, ex-Judge T. A. McNeill writes: "I think this is a very fine, almost necessary, movement, and I assure you I wish for it great success."

Judge McNeill has expressed what seems to be the general opinion in regard to this movement to furnish a club room for former soldiers of the world war, members of the Lumberton post of the American Legion. The following subscriptions have been made:

It is estimated that \$1,200 or \$1,500 will be necessary to properly furnish the club room. From the way subscriptions are being made through Dr. R. S. Beam and other members of the committee this amount will be subscribed by the next issue of The Robesonian. Send in your subscription to Dr. Beam or to The Robesonian and it will be properly credited.

Woman Appointed to Office by President

Helen Hamilton Gardener, of Washington, widow of Colonel S. A. Day, and author and lecturer, was nominated Monday by President Wilson to be a member of the Civil Service Commission. She will succeed Charles M. Galloway, of Columbia, S. C., who was "ousted" from the commission last year after the President had determined to reorganize it.

"All our lives we have heard of the office seeking the man," Mrs. Gardener wrote the President, thanking him for the nomination, "but it is something quite new in the history of the world for the office to seek the woman."

Mrs. Gardener said her first impulse was to decline, but upon reflection "realized that since women are for the first time to enter fully into the benefits of American citizenship, they must not refuse to take up such duties as are laid upon them."

SILENT ON GOOD ROADS

McGirt Challenges Policy of Government on Roads—If Legislature Considers Woman Suffrage It Should Consider Vital Subject of Good Roads.

Mr. W. A. McGirt, chairman of the North Carolina Good Roads association, in a letter to Col. T. L. Kirkpatrick of Charlotte, president of the Wilmington-Charlotte-Asheville Highway association, challenges the policy of Governor Bickett in advocating woman suffrage and remaining silent on the subject of good roads. Mr. McGirt would not deny the suffrage to women, but he thinks that along with this the Governor should advocate a broad State-wide policy of constructing hard-surfaced highways.

His letter follows:

"With further reference to the movement for a State bond issue to be used in constructing a State system of hard-surfaced highways connecting county seats of the State, which was launched by members of the executive committee, in Charlotte, on January 2nd, I feel more encouraged over the prospects of the General Assembly giving due consideration to the matter of a better State road law or bond issue, since Governor Bickett has called on members of the Legislature to ratify the Anthony amendment for woman suffrage during the special session of the 1920 Legislature.

"Reports coming to this office from different sections make it appear that the Governor is lukewarm on the 'good roads program', and would not sanction good roads legislation during the special session, and that no work would be undertaken, except that of 'putting the finishing touches' on the revaluation act, which, by the way, is a good law, a step in the right direction and should have the support of all good citizens.

"It is a well known fact that the Governor has given no support to a broad, State-wide movement which would result in the building of the main hard-surfaced highways connecting county seats of the State.

"The Governor openly approves woman suffrage and calls on the solons to ratify, but he is silent on the subject of good roads.

"Does he think that woman suffrage will help the farmer and business man more than a system of good roads? "It is certain that woman suffrage will cost the State nothing (in dollars and cents) and will come within the promise made by the Governor that the State would surely raise more money under the new act, but there would be no increase in taxes.

"Woman suffrage is right and no politician would dare refuse the good women 'equal suffrage.' If the special session permits of a discussion of this important issue, will it not permit of a discussion of just one other vital issue, to-wit: 'Good Roads'?

"There will be no increase in taxes, says the Governor.

"Does this mean that the great State of North Carolina with all its wealth would prefer to have a low tax rate rather than spend a few more paltry dollars and banish illiteracy from the state?

"Does it mean that the farmers and merchants must continue to pay a mud tax rather than a small State tax for good roads?

"Does it mean that our people would rather hoard their dollars in stocks and bonds and suffer a high death rate?

"Does it mean that our State institutions must live under the old budget? What does it mean?

"It is apparent that not a few of our so-called statesmen still cling to the old idea that it is not a part of the State's business to function in matters which make for the deeper and richer things of life.

"All work is left to the poor little county unit—the State will not function under this system.

"It should be a part of our program to help elect men to office who have a vision of the State's needs and the courage to deal with essentials rather than non-essentials."

Government Will Abandon Control of Coal Prices.

With a warning against profiteering, President Wilson Tuesday ordered abandonment of government control over bituminous coal prices and asked miners and operators to negotiate a new working agreement on the basis of the majority report of the coal strike settlement commission.

The President ordered termination of price control on April 1, when the working agreement becomes effective. This will permit at least partial absorption in coal prices of the increase in miners' wages established at 27 per cent by the commission's majority report. The increase in wages, the commission estimated, will entail an added annual cost of \$200,000,000 and includes fourteen per cent increase awarded the miners in settling the recent strike.

The operators, however, were reprimanded by the President that unreasonable prices must not result from the relinquishment of price control and the addition of increased wages to their expenses.

Determined to Build Raleigh-Wilmington Railroad.
