GLAND THEORY LEADS TO NEW DISCOVERY FOR INDIGESTION

Bacteriologist, Through Gland Theory, Discovers New, Quick and Positive Method for Relieving Indigestion and Dyspepsia With Preparation Known As Keison Blood and Body Builder.

Keison, in a New, Scientific Way, Stimulates All Body Glands, Relieving Depression, Nervousness, Headaches and Constipation. Also Increases Appetite, Body Weight and Energy.

QUICK AND POSITIVE RESULTS GUARANTEED

Indigestion and its attendant ills, such as despondency, nervousness, loss of appetite and weight, dizziness, sleeplessness, constipation, etc., according to recent scientific discoveries, are directly traceable to the improper functioning of the various body glands. Keison Blood and Body Builder is the discovery of a Bacteriologist, based upon the principle that good health depends upon a good digestion and the proper assimilation of food, to obtain which all body glands must be stimulated, either naturally or artificially. Keison assists nature, by increasing gland activity, to do its work in a natural way. It not only purifies and strengthens the blood, putting rich red blood in your veins, but repairs and cleanses the entire system, restores weight, appetite and energy

and acts as a safe, gentle laxative. If you want to eat what you like and enjoy it, without bad after effects, to sleep well at night and feel good all day, get a bottle of Keison from your druggist, with quick and positive results guaranteed or money refunded.

Rival of the Potato. The first carload of American-grown dasheens, introduced into this country to supplement the potato, arrived on the New York market recently, and because of the limited quantities shipped and the demand they sold as high as 15 cents a pound. The dasheens were grown on the east coast of Florida.

The Trinidad dasheen, which is a particularly fine variety of the taro, is one of 46,000 foreign plants introduced into the United States by the Department of Agriculture. It was brought here in the belief that it would yield the South a tuber crop which could be used to supplement the potato. It contains 50 per cent more protein than the potato, according to the Department of Agriculture.

His Mission Wasted. An Irishman made his way to a country jail and asked to be allowed to see the governor. On being ushered into that functionary's presence he begged for the favor of an interview with a prisoner who was to suffer the extreme penalty of the law in the course of the morning. "No, my man," said the governor. "you cannot see the prisoner. He's to be executed in half an hour, and visitors are not permitted to see a prisoner on the day of execution. But what might be your business with him?" "Shure, sor," answered Pat, "it's his birthday, and I was after wishing him many happy returns."

FAMOUS FRUMPS IN HISTORY

Proof That Feminine Beauty Is Not Always Necessary for the Acquisition of Fame.

Beautiful women have their poets and their artists who do justice to their perfections, but some of the most famous women, either from their own or their husband's talents or position, have been frumps, says London Answers.

Mrs. Samuel Johnson was nearly twice the age of the celebrated sage of Fleet street; a widow, with several children as old as the man she married. Lord Macaulay, in his famous essay, says: "To ordinary spectators the lady appeared to be a short, fat, coarse woman, painted half an inch thick, dressed in gaudy colors, and fond of exhibiting provincial airs and graces. But to Johnson his 'Titty,' as he called her, was the most beautiful, graceful and accomplished of her sex."

Caroline of Brunswick is the subject of one of Romney's most charming pictures. Yet here is a contemporary description of her from a diary printed many years after her death: "Her eyes projected like those of the royal family. She made her head large by wearing an immense wig. She also painted her eyebrows, which gave her face a strange, fierce look. Her skin—and she showed a great deal—was very red. She wore very high-heeled shoes, so that she bent forward when she stood or walked. Her feet, and ankles were dreadful."

In the same diary appears a description of the famous Mme. de Staël, the most brilliant woman of her time: "Her face was that of a blackamoor attempted to be washed white. She wore a wig like a bunch of withered heather, and over that a turban, which looked as if it had been put on in the dark; a short neck, and shoulders rising so much behind that they almost amounted to a hump." Yet she had all the airs of a great beauty, and her salon was sought by all the wits and beaux.

George Elliot, whose centenary has lately been kept, was an exceedingly plain woman. It was said that she had a massive head, but as a rule a massive head does not look very elegant on a slim, straight-down sort of figure. Besides, she cared nothing about dress, and would probably have been better content if, like Rosa Bonheur, she could have got a special dispensation to "wear the trows."

Nevertheless, she was a most charming woman and a very good housewife. She used to pride herself that she could turn from "Romola" to cookery.

Fish Not Affected by Tar.

The old question of the effect of tarring roads on fish in neighboring streams has been settled anew at Chesham, England. The main road of the town was tarred last winter for the first time, and this has been followed by the death of large numbers of trout and other fish in the River Chess. A special commission of investigation, however, has now reported that the fish destruction was not a result of the road tarring or of any epidemic disease. The real cause appears to have been poisoning by a temporary increase in the industrial pollution of a ditch which discharges into the river and is practically an industrial sewer.

BUSY REORGANIZING SAVINGS SOCIETIES IN PUBLIC SCHOOLS

Boys and Girls Who Did Such Fine Work Last Year Soon Will Be Active Again.

School boys and girls in all parts of this State are reorganizing the savings societies which did such excellent work last session, and it is believed that even better records will be made during this school year. In the nine months of the 1919-1920 session more than \$2,315,000 was invested in Savings Stamps, Thrift Stamps and other government securities in this district. In order that thrift in its various phases might be taught to greater advantage this session, Miss Mary G. Shotwell, director of the educational division of the district War Loan Organization, last summer visited all of the summer schools in Maryland, Virginia, West Virginia, North Carolina and South Carolina, and was instrumental in having regular courses in practical thrift incorporated in the curriculum not only in the State summer schools but in the county schools and teachers' institutes. In all, more than 660 lessons and demonstrations in thrift principles were given to upwards of 11,000 teachers. Many of these teachers—most of them, very likely—will correlate the thrift idea with their class work this session.

The savings movement is being conducted in the schools, and elsewhere, under the direction of the United States Treasury Department. "Work and Save" is one of the slogans. In other words, effort is being made to make everyone realize—particularly the boys and girls of today who will be the men and women of tomorrow—the importance of increasing production, of curtailing waste, of wise spending, of systematic saving, and of investing in such securities as government bonds, Savings Stamps and Thrift Stamps.

Last session the hundreds of savings societies in this State gave ample evidence of the patriotism and intelligent endeavor of their members. This session, with the foundation already laid and with the pupils knowing how to conduct their savings societies and clubs, a record is anticipated of which the State will have good reason to be proud.

Gas From Straw.

A gas derived from the destructive distillation of straw is being produced on a small scale at the experimental farm of the United States Department of Agriculture at Arlington, Va., says the Journal of Industrial and Engineering Chemistry in a recent article. This gas has been used for motor fuel, for cooking and illuminating purposes, but its commercial value has not yet been determined. The office of development work of the bureau of chemistry is now making a series of tests upon it.

Fifty pounds of straw will produce about 300 cubic feet of gas, and the problem of liquefying or condensing the gas in order to enable it to be used practically as a motor fuel is now in process of solution.

Several valuable by-products are obtained during the manufacture of the gas.

PERCHED ON A HIGH STOOL IN AN OFFICE

Many a Brain Is Trying to Work With Weak, Thin Blood.

MORE RICH, RED BLOOD NEEDED

Pepto-Mangan Gives You the Health To Tackle Your Daily Work With Vigor.

If you sit at a desk all day in an office, whether you are perched on a high stool or seated in an upholstered chair, your body is inactive. You can't get much fresh air and outdoor exercise. Your blood becomes poor. You look pale and feel weak.

The great tonic, Pepto-Mangan, is what you need for awhile. It makes rich, red blood. It restores your vital energy. Your color comes back.

When your blood is good, full of red corpuscles, you are better able to resist disease. You go about your daily work with the optimism of good health.

Try Pepto-Mangan and notice how you improve.

Pepto-Mangan is sold in both liquid and tablet form. Take either kind you prefer. Both have the same medicinal value. But be sure you get the genuine Pepto-Mangan—"Gude's."

The full name, "Gude's" Pepto-Mangan" should be on the package. Advertisement.

FOR ROAD SUPERVISOR. I hereby announce myself a candidate for township road supervisor in Saddletree township, subject to the action of the voters of the township December 30.

J. L. HUMPHREY.

THE BEST OF course you know we have the BEST BREAD

Also the best Coffee, a great combination. Something nice for your sandwiches, lunches, etc. We are adding day by day every thing we think you will like. Call in and let us show you.

Yours for service, DuBOIS BAKERY

TAX NOTICE

I will be at the following places named here below for collecting TAXES:

- Marietta, Monday, Nov. 22nd, 1920
- Barnesville, Tuesday, Nov. 23rd, 1920
- Proctorville, Wednesday, Nov. 24th, 1920
- Gaddys, (Curtis' Store) Friday, Nov. 26, 1920
- Fairmont, Saturday, Nov. 27th, 1920
- McDonalds, Monday, Nov. 29th, 1920
- Alfordsville, (Bullock's Store) Tuesday, Nov. 30th, 1920
- Rowland, Wednesday, Dec. 1st, 1920
- Pembroke, Thursday, Dec. 2nd, 1920
- Wakulla, Friday, Dec. 3rd, 1920
- Waxton, Saturday, Dec. 4th, 1920
- Buies, Monday, Dec. 13th, 1920
- Shannon, Tuesday, Dec. 14th, 1920
- Rennert, Wednesday, Dec. 15th, 1920
- Lumber Bridge, Thursday, Dec. 16th, 1920
- Parkton, Friday, Dec. 17th, 1920
- Red Springs, Saturday, Dec. 18th, 1920
- St. Pauls, Monday, Dec. 20th, 1920

Please attend these places at the time mentioned above as I will not make but one round this year.

R. E. LEWIS, Sheriff.

SERVICE MAY WE BE OF SERVICE TO YOU

It is becoming more and more evident that co-operation between the farmer, the business man and the bank is necessary to the most satisfactory growth of either.

It is the principle on which real results are accomplished.

We appreciate the business with which we are favored. The best, most helpful, friendly Banking Service possible to be rendered is the expression of our appreciation.

THE FIRST NATIONAL BANK LUMBERTON, N.C.
