

## CHEWING TOBACCO

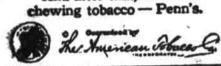

Penn's spells quality. Why?

Because-

Penn's is packed airtight in the patented new container - the quality is sealed in. So Penn's is always fresh

-an entirely new idea for chewing tobacco. Have you ever really chewed fresh tobacco? Buy Penn's the next time.

Try it. Notice the fine condition. And after that, use fresh

## How to Meet the **Cotton Boll Weevil**

II How Cotton Farmers May Play Safe and Make More Than a Mere Living in Spite of The Boll Weevil. By C. B. Williams.

In the growth of cotton as of any other crop it is always wise to keep down production to a point where there will not be an over production. For this reason it will be wise that in a general way our cotton growers At the present time, it would appear from all the facts available that the accept adjusted service certificates; acreage of cotton in the State should not be increased over that planted last year. In fact, it is evident that we as a State will profit by a reduction in acreage, and make up as much as feasible the reduction in acreage by increased production per acre. Other increased production per acre. Other methods of growing cotton which will aid, \$186,000,000, and land settlement selecting the very best man to be result in economically higher yields \$112,000,000. per acre than many are securing in the State at the present time. Those growers will have to reduce, in all can look after promptly and well as deaths of holders of certificates. vil infested states to the south of the first year after the bill came into us, in order that they may plant operation, would be \$74,279,000, the and cultivate the cotton at the excircumvent the boll weevil most suc- been made for raising revenue to leased from cotton should go into cial provisions are needed until after ing crops needed to meet the needs It added that any estimate of governof the growers' family, laborers and livestock on the farm, and to build amount of revenue needed on account up the production of our soils. outside of possibly our northeastern With the Play and eastern farmers, the acreage to corn and soybeans might this year be materially increased. The corn to supply feed for the livestock and bread for the home (and there is none better when properly cooked. Why cannot we eat more corn bread, muffin bread etc., and teach our friends to the north of us to appreciate the full walue of this grain for bread making the shout when the community serpurposes? Grow soybeans and cowpeas for seed; for soil improving purposes; and for supplying at least in part, the roughage and grazing for the farm stock. Where the beans and peas are used for soil improving purposes, crops like cotton and corn which fellow will usually show considerable increase in yield which should be at a cheaper cost per unit of crop. These

are no Utopian schemes, for thousands of progressive North Carolina farmers are already following this plan of providing most of their food and feed and are producing goodly yields of cotton and other crops and at the same time are building up the productiveness of their sails from year to year.

Some other crops that may be used on many cotton farms to a much larger extent than at present are rye, crimson clover, vetch; in some cases peanuts, velvet beans( certainly in the southeastern section of the State), sweet potatoes, and sorghum to supply sorghum sirup for the home, tenants, less provident neighbors, and perhaps to those in the near-by villages and towns who have not lost their taste for good country "eats".

Lesson number two is to play safe in farming where cotton or any other crop is the main money crop, we must as near as practicable to do so, provide for and grow the feed needed the work and other livestock of the met in the auditorium and listened by the farm family and laborers and farm. When this plan is followed the to the purpose, ideals and good times farm will become largely self-sustain- of the Camp Fire Girls organization happy. He should and usually will children; for promoting civic and religious work in the community; for making improvements in the home and on the farm; and then something more for putting aside for investment and a rainy day.
