

MOTHERS WANT IT
 for croupy children, be cause it quickly clears away the choking phlegm, stops hoarse, croupy coughs and allows restful sleep. No alarming croup when Mother keeps a bottle of **CHAMBERLAIN'S COUGH REMEDY** always on hand in the home. Benefits children and grown persons.
 No Narcotics. Sold everywhere.

WOMEN FIRST! BUT, MEN, BE SURE TO DO YOUR SHOPPING NEXT.

ODUM FAMILY REUNION
 An Occasion Long to be Remembered at the Old Home Place of the Late Ferdinand Odum.
 Correspondence of The Robesonian.
 An occasion long to be remembered was the Odum reunion on Thanksgiving day at the old home place of the late Ferdinand Odum 6 1-2 miles west of Lumberton on the Red Springs road, where the youngest son, Mr. Humphrey Odum, now resides. The surviving children of the above union are 5 sons and 3 daughters: Mr. Opie Odum of St. Pauls, Mr. Oscar Odum of Sampson county, Prof. Owen Odum of Stoneville, Mr. J. Odum of Pembroke, Mr. Humphrey Odum of the old home place; Mrs. C. L. Johnson and Mrs. Edwin Martin of St. Pauls, and Mrs. W. F. Prevatte of Lumberton B. 6.
 All were present with most of their children and grandchildren, making a total of 123. There being no program arranged, the day was spent in talking, eating, kodaking and getting acquainted with members of the different families.
 In the grove a long table had been prepared for the occasion and about 1 o'clock dinner was announced. Rev. A. E. Paul of Lumberton, beloved pastor of many of those present, offered prayer, after which every one came forward and partook of the bountiful feast which had been prepared. Everything one could desire was there in abundance. After every one had partaken to their hearts desire, there was a plenty left to feed a crowd two or three times as large as the one present.
 This was the first reunion of the Odum family, and they are making plans to make it an annual affair.
 Those present were: Mr. and Mrs. Humphrey Odum and family of the old home place; Mr. and Mrs. Opie Odum and family of St. Pauls; Mr. and Mrs. Oscar Odum and family of Sampson county; Prof. Owen Odum and family of Stoneville; Mr. and Mrs. J. Odum and family of Pembroke. Then there were many 'sons and daughters-in-law, and a few friends of the family.
 After the noon hour the Raft Swamp quartette, composed of Messrs. E. T. and W. F. Prevatte, Fred Stephens and H. M. Odum, sang "They are waiting and watching", after which Rev. H. W. Baucum of Winston-Salem made a very appropriate prayer, thanking God for his many blessings to the family in the past, and asking for a continuance of the same. And we sincerely hope that each and every one who was gathered there for the occasion will so live, until when we've called hence, we will be prepared to enter into that eternal home, where the last great reunion will be, and where sad farewells will come no more, and families will never break up; for as we shall meet from year to year our ranks will grow thinner, and thinner, but we hope at last to be a reunited family up yonder on that blest eternal shore, where sorrow, pain and death will be felt and feared no more, and where we shall clasp the hand of loved ones who have gone on before to welcome us to that bright eternal home.

Daily Fashion Hints

SUEDE AND SATIN AND PATENT LEATHER
 all offer attractions for m'lady. The pair that are worn are of soft brown suede with low heel, cut out sides and a bow. Also of suede are the slippers in the circle. They are trimmed with a buckle effect of bronzed heads, in the lower rectangle, from left to right, black satin, black patent leather and black satin with suede are the materials used. The slipper further right is black satin with suede for the buckle-like in-step ornament. It has elastic in the front to insure a trim fit.

WILSON PEACE PRIZE AWARDED TO AN ENGLISHMAN.

Viscount Cecil of Chelwood, formerly Lord Robert Cecil, has been declared winner of the first \$25,000 award of the Woodrow Wilson foundation.

Norman H. Davis, president of the foundation board of trustees announced Thursday that Viscount Cecil had been chosen unanimously by the jury of award as the person "who had rendered the most meritorious service of a public character looking toward the establishment of peace through justice, and who had done most to give effect to the ideals and the great plan for world peace to which Mr. Wilson gave so much thought and effort." The jury sat at Boston under chairmanship of Dr. Charles W. Eliot, president emeritus of Harvard university. High lights in the Englishman's qualifications for the \$25,000 prize were listed as:

"For five years he has carried on the ideals of Mr. Wilson.
 "In the Italo-Grecian crisis a year ago he fought for peace, for mediation, for a fair settlement with an honesty and a rightness which could not be denied.

"He was instrumental in gaining recognition for Bulgaria thereby tending to assure peace in the Balkans.
 "He has aided in the development of an international conscience in the matter of mandates—the sacred trusts of civilization dreamed of by Woodrow Wilson.
 "He has been a pioneer for control in arms traffic.
 "He has been unceasingly active in behalf of racial, religious and linguistic minorities."

Samuel J. Cain, 55, prosperous farmer, got out of bed at his home in Surry county at 12:30 a. m. on the night of December 4, got his shotgun, remarked to his wife "I am now telling you good-bye" and went out and blew off the top of his head. No reason assigned; business was prosperous and home relations pleasant.

KEEPING WELL BACTERIOLOGY IN THE KITCHEN
 DR. FREDERICK R. GREEN
 Editor of "HEALTH"

MOST people think of germs or microbes as awful things which produce disease. So they are, some of them.

But there are also good germs that work for man when he knows enough to let them.

Pasteur, in 1862, showed that the air and the soil are full of germs of all kinds, some of which he proved are the cause of fermentation and some of the diseases of animals and men.

At once, scientific men all over the world began to look for these little creatures. They found many different kinds and they also were able to explain by them many everyday things which had for centuries been misunderstood.

When the housewife in the kitchen mixes her dough for bread, she puts in a small amount of yeast. Why? Because she knows from her mother's teaching and from her own experience that the bread won't "rise" unless the yeast is put in.

What is yeast? The human race has used it for ages. When the angels came to visit Lot, before they destroyed Sodom and Gomorrah, he gave them "unleavened bread," that is, bread made without yeast. God commanded the children of Israel, through Moses, that the feast of the Passover was to be of unleavened bread, because they were not to wait even for the bread to rise before leaving Egypt. Every one knew for centuries that yeast was needed to make bread rise, but no one knew why.

In 1879, Housen and Pasteur showed that yeast was a little plant which grew very rapidly in warm, moist dough; that as it grew, it gave off carbonic acid gas. The gas made little bubbles in the dough and so made it light.

Pasteur found that there were different kinds of yeast. Some made sweet bread, some made sour. He showed the bakers how to make pure yeast, which would always make sweet bread.

Fermentation was another mystery. Why did fruit and vegetable juices ferment and turn sour? Pasteur found that it was due to little plants floating in the air; that if the fruit was heated so as to kill any of these plants that may be in it and then put in airtight cans or jars, it would keep without spoiling.

Every housekeeper, when she bakes bread or puts up fruit, is running a practical bacteriological laboratory and is using the knowledge which Pasteur gave the world.

Before Pasteur's time there wasn't a can of fruit, vegetable or meat in the world.

Today, we can every year millions of pounds of food for future use.

SHORT COURSES BEGIN AT STATE IN JANUARY

Raleigh, Dec. 7—Practical short courses in various agricultural subjects will be given by the school of agriculture at State college during the week beginning January 12 and ending January 17 according to an announcement by Z. P. Metcalf, director of teaching in the school of agriculture.

One of the most popular of these courses is the practical instruction of poultrymen given by Dr. B. F. Kaupp and his associates in the poultry department. Dr. Kaupp states that there was a one hundred percent increase in the attendance at

 of this ensemble costume serves coat as well as frock, for the coat hangs right to the top edge of the fur when it is closed. Crimson silk rep combined with matching davyne make coat and frock. The frock, by the way, has long puffed sleeves. Fur is lynx.

the courses last winter over the previous year and indications are that the attendance will again double itself this winter.

The entire staff of the poultry department will take part in teaching this course. In addition, one or two experts of national reputation from outside the State have been secured. The course deals with packing and grading eggs for market, caponizing poultry, poultry house construction,

the control of poultry diseases with familiar household remedies and the keeping of poultry records.

This course, like all the others, is offered by the college free of all charges. Meals will be served at nominal cost and rooms may be secured near the campus. Those who wish to take the poultry course should write Dr. B. F. Kaupp, State college, at an early date.

Miss Mary White Nash of Franklin county Friday was awarded a verdict of \$6,000 by a Wake county jury in her \$25,000 malpractice suit against Dr. Hubert A. Royster, prominent Raleigh surgeon. The suit was based upon the alleged negligence of Dr. Royster in leaving the case in the hands of his assistant after an operation and the plaintiff claimed that she had been crippled for life.
