A Bile On The Knee.

Henry Archibald is a devoted fisher man, not that he ever catches much of anything, but still he likes to take his pole and line, and go up along the Delaware during the long, warm Summer days and lay in the mellow sunshine and think what the old woman will say when she finds out he has gone off without splitting any kindling. In this view of the case he vesterday got out his hooks and lines to look them over. He sat on the wash-bench by the hydrant enjoying himself hugely when Mrs. Archibald came out and made him bring her a bucket of water.

While he was doing this, she picked up a large bass hook to admire it, and laid it down again with the line scattering out in the yard.

Henry discussed the situation in Europe with Oxtoby, who was digging garden on the other side of the fence, and then sat down again to the contemplation of his fishing-tackle. Pretty soon e missed a book.

"Mother," ne shouted, "what 'nunder the sun did you do with my bass book?" "Bother your old bass hook," said Mrs. Archibald, and she slapped the stove damper shut with emphasis:

Really it was simply a gilt watch, but it would last for ten years before the surface was worn through, and was innocent enough when sold for what it was. In the hands of unscrupulous dea ers however, it was very dangerous. An expert could readily detect its character by the color and weight, as well as by the use of acids, but with any ordinary customer it would easily pass for gold. Such a watch case, worth some \$23, would in genuine gold be worth \$60 to \$70.
