

Entered at the Post-Office at Statesville N. C., as second-class matter.]

Seventy-five deaths are said to have occurred in New Orleans, from smallpox, within a few weeks.

Secretary Folger's health is improving, and he contemplates an early voyage to Bermuda to advance the same.

Arkansas are being purchased by Northern capitalisis and removed from the to Everitt himself, though these ill-temmarket to be held for use when Canada | pered manifestations are about to render and the Northwest are denuded of their forests.

The tramp season has set in at the White House in Washington City, and several each day apply to see the Presideat (not supposed to do him harm.) who are usually met by attendants and rebut at times call again to be refused.

Speculating in "futures" fixing the prices at which the farmers produce shall be sold, six months or a year hence-is one of the great evils of the times, and State Legislature and Congress should enact laws against the pernicious and increasing evil in this country. The evil not only damages the farmers of the country but inflicts ruin and dire calamity upon thousands, and their families who are enticed to embark in such gambling. The number who are thus ruined each year is much larger than generally supposed, filling uplunatic asylumns and causing suicides, that otherwise would not occur. dupes to their ruin. -----Every intelligent man in the country who keeps himself posted in respect to the actions of congress and the attitude of the two parties on the questions of the tariff and the reduction of taxation knows that what has been accomplished is a Republican achievement. The Democrats entered the session with the avowed purpose of defeating all tariff legislation and all efforts to reduce taxation. They fought the bills introduced of which they were capable. When all other efforts to defeat action had failed, they declined to serve on the Conference Committee, hoping thus to create fatal delay. After that, too, had failed they resorted to filibustering in the House and maintained it. ------Once more, we refer to the Timber subject, on account of its importance to the people of the State and their welfare and that of those who are to come after them. The present demand for timber in its various forms, already great, will continue to rapidly increase, while the area of it is limited, and nat- wrong, and a great hardship. ural growth slow and the workof many years. The consumption for various purposes is very great and demand continually increasing, for most sorts, and largely from the Northern States, and counties in Europe. To keep up the supply, the forests must be supplied is deserved, instead of praising and apby the hands of men in planting and cul- plauding all that was done in that delectivating a new growth for the use of the table body. Two of these are the Wilworld. No industry will incur smaller outlay and labor, and lands can't be used (old fields and swamps) of small value for any other purpose. Elizabeth City Carolinian: "The Bourbon press is just now making a parade of the fact that the Legislature has reduced the property tax from 28 to 25 cents, and boasts that it will afford great relief to the people. Let us see. The Legislature enacted another law on this taxing question authorizing the appointment of Township Assessors, to "assess" the value of real estate. This was done in response to the recommendation of Gov. Jarvis, who complained that the people in returning their taxes rated their lands too low. So hereafter these "Assessors" and not the owners of the land, will fix its taxing value. The purpose is to get more money. This cannot be done except by raising the taxable value of property. Just wait they should boldly condemn. The Faland see how much it will relieve the people."

The Greensboro North State says "Evcritt has been notified to get out of the Revenue office.

Mr. Everitt, we are informed, has not been notified to do any such thing, and that it is not the President's purpose to have him go in any such way, and un-

It so happens that the importance of this matter consists in Everitt's not representing himself, but those who came within 443 yotes of carrying on a Bourbon count of electing the Liberal ticket last year. Displacing him for one who helped the Bourbons, is a very serious business, to make the best of it, no matter what provocation Dr. Wheeler might have had for his course. It may be right to restore Wheeler if some things we have heard are nottrue, but it has got to be The timber lands of Mississippi and done without prejudice to the Coalitionists, and consequently without prejudice

> it impossible. The distilling order, increasing the

production of whiskey to the bushel of grain, was made because it can be produced under certain favorable conditions. The time of fermentation under the reg ulation is different from that followed fused admittance under various pretexts, by the old "stillers" in this section .by which they are induced to depart, Consequently they found it difficult to make the amount required, and those who engaged in it at the start having

frequent deficiency taxes to pay, most of them quit the business from fear of loss. The matter was brought to the attention of the Commissioner of Internal Revenue, and the production was reduced to the present standard.

For several years the question of restoring the capacity of production has been agitated from time to time by the authorities at Washington, because they supposed that the experience of the last few years should have enabled the distillers to increase the quantity produced. The officers of the District, however, are of the opinion that quite the larger ma-Families are beggared and reduced to jority engaged in the business do not poverty by this cupidity which entraps make above the 2 gallons to the bushel, delegations, moved toward the Presby- tents and several conversions. There was a meeting of Southern cotton manufacturers in Atlanta, Ga., a lesson. few days ago, says the New York Herald, for the purpose mainly of organizfire risks, such as has been in operation in New England for many years. In the discussions of this meeting it was asserted that their mills are so well estabet for coarse cotton goods all over the United States and regulate the price of such fabrics even in New England. Nobody who has the general prosperity of the country at heart will be sorry for this. On the contrary, it affords cause for congratulation that the South is availing itself of the diversified opportunities for prosperity with which nature endowed it, but which it was prevented from improving until the abolition of slavery relieved it from the policy of pect of being unceremoniously left by concentrating itself npon agriculture. The New England mills will be forced, by the necessities of the situation, to surrender to the South the manufacture of coarse cotton goods almost altogether, at no distant day, and bend their attention to fine fabrics which require more skilful labor.

-----The Legislature.

There are a few Bourbon Sheets in the State that have the honesty and boldness to criticise and condemn much of the doings of the late Legislature' as mington Star and Elizabeth City Fal- Denison cleared \$10,000 last year on con, from the latter of which we now quote. Says the Falcon:

"We have been gravely informed that it was unwise and wrong in us to condemn some of the acts of the late Legislature, because a majority of its members were Democratic. Strange that in Texas is conservative Democratic, any one could sanction such a victous argument. Under no circumstances can it be wrong to condemn that which is bad and worthless; nor is such con-

demnation unwise, for honesty is not only commendable for honesty's self, but it is infinitely the best policy. Again, why are we Democrats?-Because we believe the principles of Democracy to be just and fair and honest. Why should not Democratic papers condemn dishonesty and incompetency in their own ranks as well as in the ranks of their opponents?" The comments of the Falcon are no to keep a bottle of PAIN KILLEE always on

less pungent upon the Legislature, than upon a large number of the Bourbon press, which damns with praise where.
