

puzzles an Egyptian hieroglyphic; to decipher *chirography*, which is more like *cryptography*, and resembles a *Mosaic Manuscript* rather than any postobolian production;—to transpose the idiom of all languages into that of our mother tongue, as well as we know how;—to affix *punctuation* to things that come to us without point or character. We have *verse* to translate, wherein the first letter of every line is an obstinate Capital;—and *poetry* to measure and *rhythym*, in which the capitals stand forth in thick array, like scarecrows in a pea patch, or “sheep & bones round a parsley bed.”—*Nantucket Jarr.*

It is a chivalry at once harmless and safe, that which seeks to procure in this country an active espousal of the Grecian cause. For good will and good wishes towards the victims of Turkish tyranny, every American has a claim to be credited. More than this cannot be attempted by the government, and ought not to be without it.

Neither the laws of nations, nor the policy of our government, would authorize our plunging into war for the philanthropic purpose of procuring Grecian liberty, by aiding in the dismemberment of a foreign state. And, indeed, to expect in these radical times, when the bulwarks of our strength are stripped to the root, that we should embark in the costly effort of building up the fortunes of an oppressed people abroad, is to betray gross ignorance of the prevailing spirit and sentiment of the times. “We assist the Greeks, forsooth! We! with an army of one soldier for fifteen hundred inhabitants! one solitary soldier for one hundred and sixty square miles! A bill to relieve the Greeks! Why it would stand no more chance than a bill to raise a monument to WASHINGTON! unless you proposed to send all the army and all the navy to GREECE, on condition that it should cost the U. States nothing to maintain them.”

Greece has better hopes. Russia must be favorable to the cause which bears up so manfully and with such success, against the enemy of Christendom.—*Chals. Cour.*

The editor of the Philadelphia National Gazette, has read a portion of the new Waverly novel, “Peveril of the Peak,” and speaks of it in the following terms:—*Chals. Cour.*

#### FROM VERA CRUZ.

By the arrival of the Mrs. Washington, from Alvarado we learn (says the Philadelphia Gazette) that the Commandant of the Fort St. Juan de Ulloa, on the night of October 27th, made an attack with the garrison on the city of Vera Cruz. It appears that the Governor was prepared for the assault. The moment the Royalists entered the city, they were attacked in the streets by the Imperialists, and completely routed, with the loss of upwards of two hundred killed, wounded and prisoners. Gen. Balleza, the former Governor of St. Juan de Ulloa, had resigned previous to this affair, and the castle is now under the command of an officer of the name of Henrique. It was not expected that the castle could hold out long. Te Deum was celebrated at Alvarado, on the 28th, for the success of the Imperial Majesty’s arms. No American vessels at Alvarado left on the 29th, and on the 30th, the American George Washington, from New Orleans, at Vera Cruz.—The British ship *Marquis of London*, sailed for Baltimore on the 27th, with the Mexican Ambassador to the United States.

#### SPANISH AFFAIRS.

BOSTON, NOV. 25.—Mailed papers to the 24th September, received here, repeat the Gibraltar accounts of the continued success of the Constitutional forces over the bands of Royalists, in all parts of the kingdom, without apparently diminishing the latter. It is said that the Regency which these insurgents have established in Catalonia, has appointed M. Labrador (a very eloquent orator) to plead their cause before the Congress of Valencia. The extent of the commotions in some parts of Spain may be estimated by the fact, that fifty-six individuals, including the heads of clergy, and Generals Santocildas, Fumaz and Sans, two brigadiers, and several field officers, have been banished at one time to Majorca, for participating in a commotion at Barcelona.

The King of Sardinia, it appears by these papers, has fitted out a squadron for the alleged purpose of protecting the commerce of his subjects against depredations of the Algerines, Tunisians, &c. on account of his refusal to pay any further tribute to the States of Barbary. It is composed of two sail of the line, two stout frigates, and two smaller vessels.—The Spanish politicians aver that the object of the equipment is a pretence, and that its real design is the same as that of the French squadron which has been cruising on the coast of Spain for two months. They hint that these equipments, in a time of profound peace, are connected with the secret objects of the

#### BLITHEWELL DURE.

On Tuesday night the audience at the city theatre were exceeding fatigued by the representation of “Modern Honor.” The laughter was loud, long, and oft repeated; nay, sometimes shouts of applause were heard. The use of cologne water to soften the hands, of oak bark to make the skin bullet proofs, and the lustrating dress to render the person invulnerable, were all duly served up with appropriate dialogue and action. The squatting and dodging was performed by Sambo Puffy and Caesar Huffy, valets to Col. Bombastes Puffy and the hon. Mr. Huffy. The song of “Oh how cruel am de bullet ball,” was encored; the whole piece was well received and was given out for a second representation amidst shouts of applause.—*Phil. Dem. Press.*

#### U. S. BANK.

The delegates appointed by the stockholders of the bank of the U. States, to nominate a successor to Langdon Cheves, Esq. the present president, have named Nicholas Biddle, Esq. of this city, to fill the vacancy occasioned by the resignation of the former gentleman.—*Phil. Gazette.*

A Singular Ornament.—Dr. Beattie, a physician to Greenwich Hospital, England, is said to wear, mounted as a brooch, the ball which caused the death of Lord Nelson, in the battle of Trafalgar.

The annual amount of revenue of the New-York grand canal will this year fall little short of \$600,000, nearly \$20,000 more than the estimate furnished to the legislature at its late session.

The story lately re-published from the London Globe, respecting a great secret discovered in the art of tanning, for which the inventor had received a large sum of money, turns out to be fabulous.

The United States’ frigate *Congress*, Captain *Biddle*, sailed from Hampton Roads on the 7th. The Congress is bound on a cruise for the protection of our commerce, against pirates in the West India Seas.—*Nat. Intell.*

At Schenectady (New-York) Agricultural Fair, a bull calf was exhibited, for which the owner refused to take 250 dollars.

J. C. YATES has been elected Governor of the State of New-York, and EASTUS Root Lieutenant Governor of the same State, by vast majorities.

A criminal under sentence of death in New Jersey had his sentence suspended until he repented—another criminal in the western country had his sentence suspended until he finished his memoirs, &c. and last week Diana Selbeck died of yellow fever at New York, having been for some years under sentence of death for having poisoned her mistress, but the sentence, “in consequence of her ill health,” was commuted to imprisonment.—*Democratic Press.*

“Holy Alliance” on Spain. That knowing the risk they will run should they attempt to march an allied army through France to put down the Constitution and put up Ferdinand, the allied Sovereigns contemplate to embark an army on board these squadrons at Genoa, and to land them therefrom in some part of Catalonia, where they are to be joined by the insurgent forces of the Regency, and to attempt to play the same game in Spain which they have played so successfully in Naples. These may be the suggestions of jealousy and precaution; but they have an awful squinting towards designs actually contemplated.—*Colonel.*

The Morning Chronicle, a Daily Newspaper at Albany, in the state of N. York, has come to an untimely end, after an existence of only three months. Its complaint was the only disease that newspapers die of in this country—want of nutrients die of in this country—want of nutrients.

Lorenzo Turner Hall, the printer and publisher of a paper in Boston, called the “Castigator,” has been convicted before the Municipal Court of that City, of a libel on Amos Binet, Esq. Navy Agent, and sentenced to 3 months’ imprisonment in the common jail.

It is said that by the laws of China no man can be harassed, even for the Emperor’s taxes, from the time he begins to till the earth in the spring, until the end of harvest. Mr. Degrandis, in his Sale Report, asserts, “that the experiment of having no imprisonment for debt has, for years, been tried in France, and found entirely satisfactory.”

To preserve turnips.—Pull them late in the fall; cut off the tops and lay them in heaps in the turnip yard; cover them entirely with the tops nine inches thick. They will be as good in the spring for the table as the day they were pulled, and the inside layer of tops will be quite green; at least so they were with those who have repeatedly tried it.—*Farmer’s Messenger.*

Lundy Foot, the celebrated Tobaccoeater, applied to Curran for a motto when he first established his carriage. “Give me out, my dear Curran,” said he, “of a smartest cast, because I am afraid the people will laugh at a tobaccoeater setting up a carriage, and for the scholarly’s sake, let it be in Latin.” “I have just fit it in,” said Curran, “it is only two words, and it will at once explain your profession, your elevation and your contempt for their silliness, and it has the advantage of being in two languages, Latin or English, just as the reader chooses—put up ‘Quid Redit’ upon your carriage.”
