Mr. White: Among the many wonderful productions of nature, mineral, vegetable, and animal, which you from time to time tell of, why don't you now and then give us information of a few of the remarkables near home ? Why, sir, Salisbury and its precincts might afford subjects, with a little amplifying, sufficient to fill a magazine of wonders. Passing over the many vegetable and mineral phenomena around us, we are instinctively constrained to view with amazement the inexplicable freaks of nature, and marvel at the performances, the beauties, the deformities, and the fecundity of the animal creation. You know, as for bifieds, our town need not turn its back upon all the world beside; for I am sure we can match any thing brought against us, either for wisdom or folly, vice or virtue; and as to quadrupede, if our agricultural soci ety would give us half a chance, and offer some respectable premiums, we would as tonish the nation with boar-pigs, buil calves, horse colts, ram lambs, et cetera. But, Mr. Editor, I have lost the trail I star ted upon. All I meant to say to you, was this: A neighbor of mine has a common sized, small boned, curl'd-tail'd, short legged, deep bellied, strait eared, spotted sow pig, which littered 8 young pigs this season; and in three months after, she littered 11 more; all of the first litter died but one, and that one, at the age of three MATTER OF FATT.
