It has been said, that all are selfish by nature; and yet no remark was ever more unjust. We will adduce for example your brighest specimen of genius-one who has the Promethean spark in his soul, who looks upon the landscape and loves it, who sees virtue and falls prostrate at its shrineand yet practises vice. Vice is a relative term—the Hindoo priest, who urges the widow to mount the funeral pile of murder, is less guilty of crime on account of his ignorance, than the christian, who breaks a less moral tie. So genius, " which knows the right and yet the wrong pursues" is vicious when compared with folly.

How few of the favored sons of talent act up to their high vocation. In all arts, in all sciences, genius, like a comet, is ever eccentric, and its irregularity, comparatively speaking, is a crime-can it be reduced to consistency? can education and mind be led to adopt the plain morality of an honest yeoman?

Method is every thing-a virtuous system will prove an overmatch for evil habits; and a Saturday Evening should recal one from the troubles and outward assaults of the world to an inward communication with himself. his conduct, his location as to here and hereafter. It should be like the cottage of the lover and the laborerhe should sit down before the fireside of his own heart, call around him his children, which are his thoughts, and with them enter into judgment as to the past, and from this calculate upon better things to be performed in future. Men read history to be informed of the past-they gravely calculate from prediction what may ensue from the aspect of the present political world-and yet forget to look at the past of their own lives, and to draw

Scriptural use of the Word FORTY.

This numerical, which occurs so frequently, and in places where its introduction is manifestly at variance with passages that precede and follow it, is in the East constantly used as a general term, implying many, or an indefinite number, as we use the words score, or a dozen or two. A ruined palace at Persepolis is called Chelminar, or the forty pillars, though it has but nineteen standing, and when perfect, had two hundred and six. The Arabs also use one thousand and one in a similar manner, Thus Moses was in the mount " forty" days means many days. The Israelites lived many, not "forty" years in the wilderness This meaning explains many difficulties in Scripture history. Persians. Arabs, and Turks, still use the term "forty" in this sense.
