The tempest raves without, and I will raise in union within; From constant gravity to fly, Can be no deed or deadly sin.

Incessant study sours the mind, As ceaseless sun-shine taints the air; Nature is provident and kind, She only frowns to be more fair.

Another peal, another glass! That flash how awful and sublime, How fleet the coruscations pass.

'Tis not in levity or fear We treat this dread tremendous hour; But in deep confidence and cheer, Submissive to the ruling power.

The storm subsid. The midnight chime Has struck, the ground is drenched with rain; 'Tis time to sleep, put by the wine, We'll drink when tempests rave again;

LATEST FROM EUROPE.

By the arrival of the ship Napoleon at New-York, still later intelligence is received to the 25th of August.

There is no news from the seat of war. Some surprise is expressed by the London editors. The accounts from Constantinople are to the 25th July.

Our surprise at the delay of intelligence from the seat of war increases daily. The 1st part of the French expedition to the Morea consisted of 8 men of war and 48 transports, with 9,000 troops on board.

The prominent intelligence relates to the war in the east. If the accounts, which we give below, are to be credited, the Russians have carried the fortress of Shumla.

There seem to have been serious dissensions in the councils of the Porte. The Heraclion has caused Ejiou Pacha to be beheaded, who did not sufficiently defend himself on the Danube.

A letter from Moscow announces that the fortress of Bahdad has been taken by storm, by the troops of Gen. Faskewitch.

The accounts from Selim of the 4th inst say, that the reports in circulation, and which agree with one another, leave no doubt that the position of Schumla has been carried by the Russians. The Emperor Nicholas was present at this battle, which will be a moral blow for the Turks.

Greece, July 23. An Aid-Camp of General Paskevitch, brought us the following news:

The Imperial colors are flying on the walls of the important fortress of Kars, which was taken by storm on the 15th July, at eight o'clock in the morning.

Our troops attacked the Turks with impetuosity with the bayonet, and dislodged them from that formidable position, notwithstanding their superiority in numbers and the vigorous resistance they made.

Terrified by our success, he enemy, to the number of 5000 men, laid down their arms, besides 1250 who were made prisoners during the attack.

The attack continued three hours. The ground occupied by the camp, as well as the suburbs, was covered with the Turkish slain. The loss of the army, in killed and wounded, is 2000; 3000 cavalry, who were in the fortress escaped to the mountains; the garrison amounted to 14,900 men.

We had one officer and 33 privates killed; one captain, 13 officers, and 316 privates wounded. We found in the fortress 161 pieces of cannon, 33 standards, and a considerable quantity of ammunition, arms and Magazines of corn.

The siege of Silistria was to commence on the 21st. Varna is invested, and Gen. Suchtelen has defeated a body of Turks who swam over the Liman to get in the rear of the corps before that place.

It was also reported that Greece was declared independent, and an armistice had been proposed on the part of the Sultan, but that Russia had refused it.

A Paris paper of the 20th states, that the French government has determined to follow the example given by the most honorable classes of society, by sending to the use of the Greek Government the sum of 500,000 francs. This in fact is the principal item of French intelligence. The "expedition" is the main topic there.
