

VARIETY.

ALLITERATION.

Frederick Fawcett, famed for firm friendship, finding female flattery fruitless, fled far from fair fronted flourishing fields, fixed in the flowing forest, and formed the following fine flourishing farewell for false fallacious Fanny Fustious:

Flattering friend, farewell forever, Hope hath hung her harp on high, Every effort or endeavor Starts some serious sobbing sigh.

When with warmest wishes wooing, Lingered long love's languid look, Silent, still sublimely showing, Firmest faith for future forecast.

Pleading prospects prove protesting Innocency is innate, Deserts dream delights distracting, Far from former frowning fate.

Pleasure's pleasing path pursuing, That through toilsome time I tread, Vagrant virtues vainly viewing, She still pseudo shining shed.

False felicitous friend, farewell, Shall sorrowing sighs still silent sleep? To transient time thy troubles tell, Why with wearied wanderings weep.

MARRIAGE.

"Marriage is to a woman at once the happiest and saddest event of her life; it is the promise of future bliss, raised on the death of all present enjoyment. She quits her home—her parents—her occupations—her amusement—every thing on which she has hitherto depended for comfort—for affection—for kindness—for pleasure. The parents by whose advice she has been guided—the sister to whom she has dared to impart the very embryo thought and feeling—the brother who has played with her, by turns the counsellor and the confidant—and the younger children, to whom she has hitherto been the mother and the playmate—all are to be forsaken at one fell stroke—every former tie is loosened—the spring of every action is to be changed; and yet she flies with joy in the untrodden path before her. Buoyed up by the confidence of requited love, she bids a fond and grateful adieu to the life that is past, and turns with excited hopes and joyous anticipation of the happiness to come. Then woe to the man who can blight such fair hopes—who can treacherously lure such a heart from its peaceful enjoyment, and the watchful protection of home—who can, coward like, break the illusions that have won her, and destroy the confidence which love had inspired. Woe to him who has too early withdrawn the tender plant from the props and stays of moral discipline in which she has been tutored; and yet make no effort to supply their places; for on him the responsibility of her errors—on him who has first taught her, by his example, to grow careless of her duty, and then exposed her with a weakened spirit, and unsatisfied heart, to the wild storms and the wily temptations of a sinful world.—The new Novel of Deceit.

WONDERFUL MECHANISM.

The following descriptive notice of Muckle's Automaton Writing Lady, and other ingenious mechanical figures, is copied from the United States Gazette:

It is not generally known to the public, that this ingenious piece of mechanism has lately arrived in this country. It is the work of the celebrated German artist, Mr. Muckle—the fruits of two years close application and study. The figure itself is as large as life, and is represented sitting at a table open on all sides, thereby putting aside, at once, the theory which naturally enough connects itself with the Automaton Chess-Player, that the movements are effected by human agency. No stronger proof of the ingenuity and skill of the artist, nor evidence of the complexity of the machinery, is required, than the readiness with which the figure writes any sentence requested by the audience. The figure itself being of full size, has quite an interesting appearance. The moving of the eyes and eye-lids just previous to its commencing to write, and the peculiar inclination of the head and body, as though amid itself had its influence on the position of the figure, gives the appearance of thoughtfulness and life to the Automaton, and has a pleasing effect on the spectator. The machinery is so constructed as to enable the figure to supply itself with ink, as required, from an inkstand placed on the table; and to address the audience by easy and graceful motions. Connected with this wonderful exhibition of human skill and ingenuity, are some mechanical figures about two feet in height; the easy and natural movements of which afford the strongest evidence that the head which made them was not deficient either in contrivance or execution.

The performance of Mr. Schweighoffer, from Amsterdam, a professor in experimental philosophy, excites the wonder and admiration of every one. Indeed, he is only equalled in his performance by the celebrated Mons. Saubert.

BECKWITH'S Anti-Dyspeptic Pills.

THOSE who are afflicted with HEAD-ACHES, HEART-BURNS, and other distressing symptoms of disordered stomach, bowels, and liver, may find relief in Dr. Beckwith's Anti-Dyspeptic Pills, which can be had at this Office—price fifty cents per box.

The Doctor, who once resided in this place, but now lives in Raleigh, has, after a long and extensive practice, been enabled to compound a most valuable remedy for the chronic diseases of the digestive organs, so common in Southern climates, especially with those who lead sedentary lives.

It would be an easy matter to make out certificates to prove that these Pills are a "sovereign remedy" for "all the ills that flesh is heir to;" but it is not pretended that they are an universal antidote. Certificates of the most respectable Physicians and other gentlemen can be shown to substantiate their efficacy in the particular class of diseases above spoken of: and the Editor of this paper can testify that he has derived speedy and permanent relief, in the use of them, from a most distressing and long-continued head-ache. Some of his friends tried them, at his suggestion, and experienced the same beneficial effects. Salisbury, June 14, 1834.—1f

He is in the regular receipt of the Reports of the Fashioners as they change both in the large cities of this country and of Europe—so that gentlemen may be satisfied that their orders will always be executed in the very latest style.

Orders from a distance will be attended to with the same punctuality and care as if the customer were present in person. Salisbury, May 17, 1834.—1y
