WAKE-FOREST INSTITUTE.

THE Exercises in this School will be resumed on the first Monday in February next.—Since the close of the last term, the services of two able and experienced Professors have been secured; and they will be in place at the commencement of the session. The friends of the Institute have, now, much to encourage them.

The annual expense of each student at the Institution, is One Hundred Dollars,—payable, Fifty at the beginning of each term, (February and July). It is deemed important to state, that the neglect hitherto of the Resolution, requiring the fifty dollars in advance of each Session, has proven both detrimental and inconvenient to the interest of the Institute; and will in future be rigidly enforced. No Student will be admitted to recitation, without first producing the Treasurer's certificate.—We hope that in this requirement, we shall not be esteemed either rigid or illiberal, as it is the common requirement of all schools.

JOSEPH B. OUTLAW, Prest. January 5, 1838.

THE second quarter of the Winter Session will commence on the 1st day of January, 1838. A few more pupils can be accommodated. Excellent BOARD may be had for eight dollars per month.

To Merchants, Agriculturalists, and Gardeners.

G. R. GARRETSON has removed his wholesale and retail Agricultural and Garden Seed Warehouse, to Flushing, L. I. New York, where he intends dealing extensively in the above business, and will be at all times enabled to furnish dealers and others with every article in his line of business. And as the greater part of his stock of Seeds is raised under his personal attention or direction, or where it is necessary to import from Europe, they are procured from the most respectable seed establishments there, and their qualities being tested to his own satisfaction, their accuracy and vitality are expressly warranted.

The vending of seeds is a business deserving much greater attention from the mercantile community than is at present bestowed upon it. There is scarcely a farmer or planter who would not purchase an assortment of superior Garden Seeds if they could procure them easily. And as they yield a handsome profit, some explanations may be requisite in regard to making sales, &c. They are usually supplied by the pound or bushel, and will afford a profit of 100 per cent or more, at the New York retail prices. For convenience they can be neatly papered and labelled and assorted into boxes (or put up in strong papers, thereby saving the expense of box) each suitable for a family garden, which will be supplied at from \$1 to \$25—the latter being sufficient to crop a garden of one acre. Or they can be put into 6 1/2 and 12 1/2 cents papers, neatly labelled, and assorted suitable for a retail dealer, each of which by the quantity will be charged so as to allow a profit of 80 per cent on the New York retail prices. Any one wishing to engage in the vending of seeds, and not having experience, by addressing the proprietor will have the necessary information given, and they may feel confident they will be served with none but articles of the very best quality.

MULBERRIES FOR SILK WORMS.

FIFTY THOUSAND PLANTS of the Chinese Mulberry or *Morus Multicaulis*, for sale. Of all the varieties of Mulberries for silk, this appears most eminently entitled to preference, and since its introduction into France seems destined to replace every where the common White Mulberry for the nourishment of silk worms, such is its superiority over all others. The tree is beautiful and of a rapid growth, and will thrive well in almost any situation, and a few years are sufficient to raise considerable fields of them in full vigor, sufficient to support an immense number of silk worms. The raising of silk is as easy as the raising of wheat and much less laborious. For a number of years past it has been a regular and profitable employment of many of the farmers of Connecticut, during the early part of the summer, and is emphatically a business, of the farmer—a simple labor, in which females and children who do not essentially aid in supporting a family may turn their services to profit. Every family of the most limited means can raise the mulberry and produce coccons, and for a trade can procure a pamphlet which will give them the necessary information of reeling, &c. The plants can be packed so as to be transported to any part of the Union and will be furnished in quantities to suit purchasers, and at very moderate rates. January 12, 1838.

NEW WATCHES, JEWELLERY AND CUTLERY.

MONTAGUE'S BALM; AN INDIAN CURE for TOOTH-ACHE.

THE established reputation and constantly increasing demand for this effectual remedy of pain and preservative of the Teeth, has induced the subscriber to offer it to the American Public. Arrangements have been made to supply agents in all the principal cities and towns of the U. States, so as to place it within the reach of those suffering, and likely to suffer, with the most harrassing of all aches, (tooth-ache.) When applied according to directions given on the bottle, it has never failed to afford immediate and permanent relief.—It also arrests the decay in defective teeth and relieves that soreness which so frequently renders a strong tooth useless.

The application and remedy are simple, innocent, and not unpleasant; and the large number of persons, in various sections of the country, that have already experienced such delightful and salutary benefits from the use of the Balm, are ready to bear (for the public good) their testimony to its unrivalled qualities.

It is an Indian remedy, obtained singularly and unexpectedly, and may be regarded by the civilized world as the most valuable discovery of the Red Man of the Woods.

WILLIAM W. GRAY'S

INVALUABLE OINTMENT,

For Ulcers, Tumors, &c. Can now be obtained of the proprietor, at the office of the Raleigh Register. Single Pot, 1 dollar—One dozen, 9 dollars. Raleigh, October 8, 1836. The above Medicine is for sale in Salisbury at the Store of JOHN MURPHY.

For five or six years previous to the Spring of 1834, a Negro man of mine had been much afflicted with an ulcerated arm and hand, which rendered him almost useless. The ulcer embraced that part of his arm from the elbow down, including his entire hand, which was literally a mass of putrefaction. A joint of one finger, and a part of the thumb, perished and dropt off. A more distressing and hopeless case I have never beheld. It was abandoned by his physicians as incurable, except by amputation of the hand.

The best medical treatment having failed to relieve the man, I placed him under the care of Mr. William W. Gray, in this place, who, with his Ointment, has effectually cured the case, although the Negro was frequently absent for weeks and months together. He has been entirely well for the last eight months, and I have good reason to believe will continue so.

WILLIAM BOYLAN.

ANOTHER GREAT CURE!

Raleigh, September 21, 1836. I am now 58 years of age—when in my 17th year, I received a wound on my left leg, which became ulcerated, and continued so until the first of March last. It would occasionally heal up, and then break out again; but most of the time, it was in a very painful condition, the sore having extended to a large size, and become very deep. I tried many remedies to make a cure, without success, until I applied Gray's Invaluable Ointment, two pots of which have effectually cured my leg, and reduced it to its natural size. The cure would have been made much sooner, had I strictly attended to the directions for the use of the Ointment; but this I failed to do, while I took much exercise, and very imprudently used tight bandages. My leg has been well for more than six months, during which time, I have walked much, yet it remains firm and free from all soreness or inflammation. After having been afflicted for a period of forty-one years, I now enjoy the benefit of a sound leg again. LEWIS HOLLOWAY.

JUST RECEIVED,

And for Sale by the Subscriber,

DR. SHERWOOD'S Electro-Magnetic Remedies for Chronic Diseases, of the class Hyper-trophy, including all the forms of Scrofula, viz: Tubercular Consumption, White Swellings, Dyspepsia, Scrofulous Sore Eyes, Chronic Diseases of the Liver, Of the Heart, Scald Head, Of the Spleen, King's Evil, Of the Kidneys, Leucorrhoea, Chlorosis, Menorrhagia, or Female complaints.

These are but different modifications of the same disease, arising from the same cause, distinguished by the same diagnosis, and curable by the same remedies.—Their common cause is an irregular action of the Electro-Galvanic forces in the system; they may all be detected by pressure upon the sides of the vertebrae and glands of the neck, which elicits the Electro Galvanic Systems, and they may be cured by the Electro-Magnetic remedies. The latter are accompanied by a copious medical treatise, explaining the principles of the discovery upon which they are founded, and stating the manner in which they are to be applied. In this work Dr. Sherwood demonstrates the fact that every part of the human body, together with every particle of animate and inanimate matter, is either in a negative or positive state of electricity; and that every motion, in all matter, whether in the largest masses or in the smallest particles, is produced by the attracting and repelling forces of this universal principle. The morbid action which produces disease of the organs or limbs, he proves to be occasioned by the undue preponderance of one of these forces in the system, and his remedies restore health by subduing this irregular action to an equilibrium. By this means, the very seeds of the disease are eradicated, and a permanent cure effected, even in cases where all hopes of relief from ordinary sources is abandoned. The Electro-Magnetic Remedies are the only preparations applicable to this prevailing class of disease, and they never disappoint the confidence reposed in them. The symptoms of the class of diseases to which they are applicable, can be discovered, under the directions contained in the work which accompanies them, without the aid of a physician, and they can be used with perfect safety and success without dieting or inconvenience, or any further advice than the work affords. The principles upon which these remedies are prepared, are strictly scientific—and as such, together with their unequalled success, as curative agents in the diseases mentioned (which annually consign thousands to the grave, and among them many of the loveliest of the human race) have already effected sales to the amount of \$1000 per month, for the learned and talented inventor—and among the purchasers, are many of the ablest Northern and Western physicians, for their own practice. Price \$10. J. B. HINTON. Raleigh, Jan. 26, 1839.
