

**SOUTHERN MANUFACTURES AND TRADE.**—We observe in some of our late exchanges, a statement, that a paper manufactory in Virginia was about filling a heavy order from the North for a fine article of paper;—take this in connection with the fact, that large quantities of Cotton yarn have been sent from this State to the North, and found a ready sale in preference to that of their own manufacture; and we have facts illustrated which ought to be sufficiently cheering to those who are urging forward the development of Southern resources,—and such are a sufficient answer to those who sneer at the possibility of our being able to maintain a profitable, and independent trade through our own sea-ports. Let the South in general, (and North-Carolina, in particular,) only make the proper exertions, and improve the great advantages which Nature, in her bounty, has conferred,—and we shall no longer see our Cities lifeless, and the Country being rapidly deserted;—and what is more important, we shall no longer feel ourselves trampled by a state of dependence, involving innumerable evils.

**LAND SLIDES ON THE MISSISSIPPI.**—In consequence of the low stage of water, during the summer,—a number of slides have taken place on the Mississippi river bank,—some time since, accidents of the kind occurred in N. Orleans, and Vicksburg, and more recently in Natchez and Rodney,—these encroachments of the river threaten very serious consequences to Towns situated immediately on its banks.

**NEW YORK.**—The Elections in this State take place next week, commencing on Monday,—it will, no doubt, be a warm contest; both the parties talk confidently of success.

The last Greensboro' Patriot contains a Notice, that application will be made to the next Legislature to charter a Bank, to be located at Fayetteville, with a branch at Greensboro'.

**PENNSYLVANIA.**—The new Constitution in this State has been ratified by a majority of 2,113 votes.

**FIKE.**—A fire has occurred at Harri-borg lately which destroyed property to the amount of \$25,000.

**Black Hawk,** the celebrated Indian warrior has lately died.

**NEW JERSEY.**—It was stated in our last paper, that this State had elected the Administration Congressional ticket by a small majority,—it was so believed at that time,—but it has since been ascertained that the case is just reversed;—owing to the rejection of some returns, the Whig Congressional ticket has been elected,—the Whigs also, have a majority in the Legislature.

**UNITED STATES AND TEXAS.** The following paragraph copied from the Washington Globe of the 17th ult., shows that the Texan Minister has lately made a formal withdrawal of the proposition made by Texas, for admission into the Union.

"We understand that the Texian Minister, on the occasion of exchanging the ratifications of the boundary convention lately published, delivered to the Acting Secretary of State a note, in which, after stating in friendly terms that although, since the note of Mr. Forsyth, declining the proposition submitted by Texas for her admission into the Union, the question of annexation had been considered by the United States Government as finally disposed of; yet, inasmuch as the impression appeared still to remain upon the public mind in both countries that the proposition was still pending, he had been instructed by his Government to communicate to that of the United States its formal and absolute withdrawal of that proposition."

The Charleston "Mercury," a sub-treasury paper, speaks as follows, as regards its present position in relation to the Whig, and Van Buren parties:

"We never gave the Whigs pledges,—we long ago, long before the Banks failed and the Constitutional treasury was breached, told them we did not trust them, and conjectured then that self interest would dictate to the Administration a policy friendly to the South. Subsequent events have proved the wisdom of the distrust,—and the sagacity of the prediction. The Whigs have proved themselves at least as much a spoils party as those they denounce; and we assure them that we value their angry denunciations now, as much as we did formerly their mince eulogies and empty professions. By their bitter resentment at being us (our "apostasy" as they term it) they but show how miserably they stand."

We pledge ourselves to the Administration now no further than to support them as long as they go on doing right. We ask them not for missions or other favors. We expect that there will exist no overweening or impolitic confidence between old and new only united on an important measure of policy. We do not come crouching to them, as the Whig's State Rights friends declare that they have gone to the almighty Mr. Clay, begging pardon "like the men of Kent with boughs in their hands."

**NEXT LEGISLATURE.**—In a few weeks our Legislature will be again in Session: We have heard the question asked,—what matters of importance will come before it?—For ourselves, we know of no very important subjects to be acted on. The last Legislature revised the Laws, and they have been printed in two Vols., at great expense; we hope therefore, there will be no necessity of undoing this revision, and that it will be suffered to remain two years longer, at least, before the work of amending, or altering is commenced.

The new State House, will claim some attention from the Legislature,—an appropriation of one hundred and fifty, or two hundred thousand dollars will be required to complete it. The work, unquestionably, ought to be completed in the style in which it has progressed,—but if half the complaints as to the manner in which it has been conducted, are true,—and they demand consideration,—the Legislature ought to appoint new managers.

This building will cost the State at least \$500,000, before it is finished. If instead of expending \$500,000 on the State House,—suppose one costing only \$3 or 300,000 had been built, and the balance of \$200,000 loaned out on good security to Companies to aid in building up cotton, woolen, and other manufactures;—which would have added most property to the people, and honor to the State! Let the people answer.

**A PENITENTIARY.**—It has been suggested that possibly the next Legislature may take up the question of a Penitentiary, and establish one. It is to be hoped, they will do so; after the experience of our Sister States on the subject, it certainly needs no argument to prove the superior efficiency, and humanity of the penitentiary system over the barbarous punishments of our penal code, some of which, are only worthy of the feudal ages, or modern lynch law; under this present system rogues, and villains are punished by such modes as tend to render them desperate, and utterly devoid of character, so, they are turned loose, upon society to commit new depredations;—we think it will be better to put them in that way at some good trade in a Penitentiary,—in this way they not only stand a chance of being reformed,—which as a moral consideration ought to be weighty,—but they will at least, pay their own expenses, and relieve the public of thousands of dollars annually; for it is a notorious fact, as we understand, that most of the charges in every county, arise from the trial and support of such as violate the law, and being unable to pay expenses, are a burden to the County.

**OUR UNIVERSITY.** We have received, through the politeness of a friend, a Catalogue of the University, lately printed, from which we are pleased to learn, that the present state of the Institution is such, as must be highly gratifying to its friends; the number of Students is larger than it has been for more than 10 years, and altogether, the College seems to be in a progressive and flourishing state; the subjoined table shows the number of resident students, annually, for twenty years past:

YEAR.	STUDENTS.	YEAR.	STUDENTS.

A very spirited excitement is now prevailing in Massachusetts, and Rhode Island; it seems that the legislatures of these States at the last Session passed a law forbidding the good people to drink any kind of liquor or wines, in less quantities than 15 gallons, or what is the same, forbidding its sale without a license, in less quantities;—the sovereign voters, are, however, determined not to submit to such wholesale guzzling, wishing, most probably to take it in smaller and more temperate allowances; they are moving every thing to have the law repealed at the next Session, so that they may buy and drink just as little as they please.

**FOR THE WESTERN CAROLINIAN.** The Cabarrus Volunteer Artillery, having arrived safely at home, would now take the opportunity of returning their sincere and heartfelt thanks to the officers of the Salisbury Regiment, and especially to the citizens of the Town, for their hospitable attention to the Company during their late visit to them. Salisbury has ever been noted for the hospitality of its citizens, but the Company of Volunteers from Cabarrus have, on their late visit, received more than even common hospitality; they have enjoyed the commendation of her citizens in such manner, as will long be held in remembrance by every member of the Corps, and they would now present their respects to Maj. Gen. Thos. G. Polk, Col. R. W. Long, the Salisbury Musicians, and all the Officers and Soldiers belonging to the Regiment.
