shat he may see for himself; and while on the subject, we would humbly recommend to the partizat papers above referred to, who are accustomed to give one-sided views of matters and things, generally, to suit their own convenience, that before they pronounce with much knowingness and equal correctness of the views of men and state of publie opinion in reference thereto, they would do well to be informed of the same, and then stick to facts.

### STEAMBOAT EXPLOSION.

The New Orleans Louisianian of the 4th inst. mentions the explosion of the steamer Buck eye while lying along shore on the Mississippi, taking to wood. All the boilers were blown overboard, and one lodged on the bank,-the boat was left a mere wreck, both the boiler and hurricane decks being completely swept away, only 5 or 6 persons were killed, the passengers at the time being fortunately, mostly on shore; the names of the persons killed had not been ascertained.

Anorner.-The same paper also mentions the reception of information that the steamer Ponchartrain, bound from New Orleans to Tampico, had burst her boilers at sea, and had been compelled to rig a jury mast and stand for the Texas coast. The last account reported her seen lying in Matagorda Bay, -no lives lost by the accident.

### FIRE.

The town of Port Gibson, in Mississippi, situated on the Mississippi river near Grand Gulf, has been almost entirely destroyed by fire. The Bank. public buildings, and in all two-thirds of the place was reduced to ashes.

We notice the famch in Baltimore of a new steamboat, the "Wilmington," intended to ply on the line between Wilmington and Charleston.

Some of the New York papers deny positively and unequivocally the receipt by Mr. Webster, of any amount of money, as has been recently stated, either in the shape of a gift or loan.

The Address before the Alumni of University at the approaching commencement is to be delivered by Hugh McQueen, Esq., of Chapel Hill.

The Department has examined the accounts of Mr. Breedlove, late collector of customs for the sert of N. Orleans, and is not a defaulter as was falsely alleged by some of the papers at the time of his resignation a few months since.

### ROYAL PROCLAMATION.

NO. IL

To all my faithful subjects :- See we to it. Whereas, my old enemy, C arles Fisher, the same who rebelled against my authority in 1823, has had the analacity to offer for Congress without my leave, and has published an address hoping thereby to delude the ignorant people, and draw off their allegiance from ignorant people, and draw out their antegrance from me:—and scheross, it is my royal pleasure that my lo-tone cossin, Doctor Pleasurt Hendurson, formerly of Surry, and now of the 10th Congressional District, and who was "born within five miles of the line," shall be returned to Congress. This, therefore, is to command returned to Congress. This, therefore, is to command all my faithful subjects every where, under penalty of my awful displeasure, not to believe one word, syllable, or letter in said address; but in all places to pronounce the same to be auducious, scandalous fabrications, and failacious. Purthermore, I do hereby command my royal ecavenger, the Editor of "the dirty sheet" at Ashbore, without delay, to print and publish "by au-thority" whatever my Honorable Secretary, Samuel Blue-Light, may write in the premises. And I do here-by command all my subjects every where to believe whatever my Secretary shall write, and to swear to the same, if necessary.

Growth of the West .- It is stated that in the year 1800, there were only about 3,000 souls within the limits of the State of Illinois. In 1820, the population had increased to 54,000. In the next ten years, that is, 1830, the population had tripled in numbers, having increased to 157,455 .-According to the State census of 1835, the enumeration presented an aggregate of no less than 269,-794 souls, being an increase of nearly one hundred per cent. in five years! These items we derive from the Louisville Journal, the editor of which truly remarks that "such is the march to 'empire' of the great West." We may add that it is with this inland world, teeming with every thing that is calculated to sustain in full prosperity and abundance, a population of many millions, that Baltimore is carnestly and perseveringly lahoring to connect herself by her great rail-road-Who can doubt that when completed, and forming as it will do the shortest and easiest route between the Atlantic and the Ohio, there will not be constantly pressing towards it as much travel and trade as will give it incessant employment.—Bal.

R. W. LONG. Salisbury, April 25, 1839.

### PEDIGREE:

I CERTIFY, that Larn was bred by me, and that he was foolded in the Spring of 1833. He was got by Godolphin, his dam, Pocahontae, by Sir Archy; his gran dam, Young Lottery, also by Sir Archy, out of Colonel Singleton's celebrated Lottery, by the imported Bedford, out of the imported mare Anvillina; Godolphin was got by Eclipse; his dam Sylph, by Haphestion, out of Lottery by imported Bedford, &c. Haphestion was got by the imported Buzzard, out of the dam of Sir

Archy.

DESCRIPTION, PERFORMANCE, &c. LATH is a fine bay, without white, 15 hands inches high, with good bone and capital action. At 3 years old, he won the produce stake at Columbia, 2 mile heats, heating Mr. Taylor's filly, Daisy, and Captain Spann's colt, Convention, nine others paying forfest.—Two weeks afterwards, he won the Jockey-Club purse. 3 mile heats, at Augusta, beating Kite, and dis Black Bird. At Charleston, he was besten by Clod Hopper for the Jockey-Club purse, 3 mile beats; being very much amies, he was drawn after the first heat.— At 4 years old, he won the Jockey-Club porse, 4 mile heats, at Camden, besting Sir Kenneth and Dorabella. at 3 heats, losing the first in consequence of bolting Prize-holders when several lengths in advance of the field, just before he reached the judge's stand, and getting entangled SPI.

amongst the carriages, he sustained an injury which occasioned his withdrawal from the Turk.

LATH was a race horse of the first class, which he evinced in his trials with Bay Maria, Charlotte Russe, and Kitty Heth, and in point of blood, he is inferior to none, whether imported or native. His constitution is robust, having never bem sick, and his temper good. His colour, form, and action, speak for themselves. In a word, Lath unites in himself as many claims to public patronage, as any young Stallion that I know,

Willwood, Jan. 22, 1839.

From the above certificate of Col. Hampton, who wed and had LATH trained for the Turf, it will be seen that he considered him a fleet barge of the mas case, not only from the races he has mentioned as having run sklicly, but from private trials he has made with he es which are now on the Turf, and running with considerable spaces. It will also be observed by his Certificate, that he considered Lath of the purest blood ;-

not to be surpassed by any horse imported or native.

I consider it entirely unnecessary to attempt to sulo gise Lath, either for his performances on the Turt or as to his blood, since in every respect he is so well at-tested. But will remark, that Lath has not only de-seended from pure blood, but has come from stock, both ft. 7 in. on Basin, 32 ft. 7 in. on sire, grandsire, dam, and grandam, that are of the running blood. For instance, his sire Godolphin, made his front of Custom-house street-four miles in 7 minutes and 50 seconds; his grandsire, the American Eclipse, so well known at the North and 1 Prize—Ditte, No. 339, 24 ft. 8 ir, on Royal South, made his time in the great match-race, the North. against the South, \$20,000 aside, in 7 min. and 37 sec; which he won with considerable eclat, and which gain 'ed bein the memorable name of the Champion of the North; his dam, was sired by the renowned Sir Archy, whose reputation as a racer, &c., stands unquestion both in England and America. The grandam of Lath, Old Lottery, bred by the great Southern Amateur of horses, Col. R. Singleten, of South Carolina, has pro-

duced more fine race horses than any other mare in the Union. Thus it will be seen that there is united in Lath two of the heat study of the South, Hampton's and Singleton's, crossed with Gen. Coles of the North. The public is now presented with such an opportunity of improving the blood of that noble and useful animal, the horse, as very rarely occurs in this section of

To Owners of Mills.

The Subscriber has an improved patent Spindle to Mills, by which, a mill will do much better than with the usual form of Spindles. It is so constructed at kep from heating or killing the meal is no rubbing of the stones.

This runner is so confined by the Spindle as always to preserve its balance, and of course there is no rubbing of the stones.

I think, by this improved Spindle, the ame water will do at least one-third more husaness, and the meal of superior quality.

Any person yishing to one one of these Spindles, may obtain one or more, by making application, (within a short time) to the Subscriber at Mackaville, having the short time) to the Subscriber at Mackaville, Davie Ca. N. C. I think the protected not proved Spindle roady for use.
