NEW PROSPECTES

THE REPUBLICAN.

* This Reputations " has been published in Washing-ton, North Carotina, for six months, and will be contin-ued so long as anflicient patronage is received to defray the expenses of its publication. It has now upwards of four hundred subscribers, and it is believed that if those friends to whom this Prospectus is sent will make a lit-tle exertion, the number may be doubled. For the sup-port of our paper, we are compelled to rely almost en-italy upon our subscription list, as the advertising patronage is almost exclusively in the hands of the Whige ; and they cherish towards our press the better hostility.

It is important that a Republican press abould be sustained at this place. It is peculiarly important to the Republican party of this Congressional District.— This town is about the centre of the District. The importance of the press may safely be inforred from the malignant and bitter persecution we have received from the Whigs for our effort to establish it. It is important to the whole Republican party of North Caroing, that this press should be sustained. There is no other Republican paper published in a circuit of 50 miles ; and if we except the Tarboro' ' Press,' there is to our friends in that District for the aid we have al-

FEVER AND AGUE.-TO MY FRIENDS IN THE WEST, and particularly those who have used the LIFE MEDICINES in treatment of FE-VER AND AGUE.

It is but a very short time since these Medicines have It is but a very short time since these Madicines have been introduced into the Fever and Ague Districts, and the proprietor flatters himself that during that period, wherever they have been used according to the direc-tions, they have done more towards exterminating the disease, than all other remedies and prescriptions com-bined. It is a common excuse smong " regular prac-titioners," when specifics are introduced, that they can-not cure diseases which acoule are in the labit of coninformers," when specifics are introduced, that they can-not cure diseases which people are in the habit of con-sidering incurable. Medical experience is continually doing away a part of the list of the incurable diseases, and Mr. Moffat has the happiness of confidently an-nouncing that *Fever and Ague* is now to be added to the number of complaints which modern skill has con-

In Fever and Ague the Life Medicines not only give ouicker relief than any other remedy, but, if persovered in, effect a permanent cure; so that if the patient is only ordinarily careful, and resorts directly to his medicine upon the first symptom of tendency to a new at-tack, it may always be warded off. To escape one chill would be of infinitely more consequence to the sufferer than the value of the remedy-to remove the disease permanently would confer a benefit opon him which cannot be estimated by any earthly standard. That none within 75 miles. There is no Republican paper these Medicines will effect what is here claimed for published in the Newbern District. > It is not for the mere purpose of disposing of a few hundred packages of the Life Medicines, that the pro-prietor makes this appeal. The demand for his Medicines is already greater than he can conveniently supply; and even were it insufficient to afford him ness, he would conceive himself supremely selfish, if

The Life Medicines, if properly used and percevered in, recommend themselves ; still it is necessary that the public should know that such medicines exist, and hence the propriety of advertising them. It is hoped, there-fore, that the proprietor will not be accused of egotism when he says that there is no medicine or mode of treatment extant, for fever and ague, so appropriate, thorough and positive in its happy effects as Moffut's Life Pills and Phenix Bitters.

Fever and Ague is a most obstinate disease, and in warm and humid climates, frequently resists every ordinary mode of cure, so as to become very distressing JOHN H. HARDIE, Sh'ff. to the person, and by the extreme debility which the disease induces, it often gives rise toother chronic complaints. Marsh minsmats, or the effluvia arising from stagnant water, is the most frequent exciting cause of this disease ; and one of its great peculiarities is its susceptibility of a renewal from very slight causes, such as from the prevalence of an easterly wind-even with out the repetition of the original exciting cause. In this, Fever and Ague differs from most other fevers; as it is well known, that after an ordinary fever has once occurred, and been removed, the person affected is not so lable to a fresh attack as one who was not so affect-I think, by this improved Spindle, the same water so lable to a fresh attack as one who was not so affect-will do at least one-third more business, and die meal od.
