REBREATHED AIR.

We do not know precisely how re-breathed air produces its deleterious influence, nor is it worth while to stop to inquire, in this discussion. It is certain that its effects are fatal to health. It would be absurd to assert that the ing House for the Methodist Episcopal rightful prevalence of consumption is telligent observers understand that there are many causes operating to produce or develop this disease. It is ... vertheless probable that impure or from attendance by age and infirmities. r breathed air is the greatest agent of The address was delivered by Bishop cvil in producing, and rendering fatal, Pierce, before an immense concourse, inpulmonary affections. The crowded, c'ading visitants from several States. badly-ventilated schoolroom, is often the place where, early in life, rebreathed air commences its deadly work. Not merchants in this city have entered into country, is a fit place in which to con-fine children six or eight hours of the new arrangement is to go into effect on day. The little ones are herded to- the 3rd of June, just one week from together in a promiscuous crowd ; those morrow. EBEN MOODY BOYNTON. 80 BEERMAN STREET, New York. Nov. 27, 1266; July 23, 1867; Jan. 14, 14, 1868; July 27, 1869.

Not One Failed in 20,000.

The New Year finds the LIGHTNING SAWS universally acknowledged to lead the Ameriican market. No manufacturer of Saws has dared to question or publicly test at the American Institute, or otherwise, the matter of supe-riority of the latest improved Saws. The \$500 challenge for expenses of public contest is engraved on the saw.

The large increase of the business has compelled leave of No. 80 Beckman street, and arrangements for the manufacture of five thousand LIGHTNING Cross cuts per mouth, and hope to be able to fill all orders promptly. The supply has been unequal to the demand

of the LIGHTNING BUCK SAW, but hereafter | will endeavor to keep a stock on hand. The sale of seveal dozen of the above mentioned Saws causes belief that they are the best bindes in the market. All Lightning Saws are indelhly etched with my name, the Cross-Cuts with rections for fliing, using &c. Each Lightning Saw will coil and touch ends

uninjured. Not one in twenty thousand has proved imperfect so thorough as the inspection of these regular goods : but, for the benefit of such unskilled men as can not set and use a thin saw, a guage heavier (than regular 12) will e inserted to order. Since enlargement of dust space, one year ago, no complaint of clogging has been received. The Lightning Saws are equally adapted for small and large timber, soft

or hard wood but soft timber requires it to be set wider. Lightning haws are all set and sharpened ready or use when sent out; are two guages thinner on back.

NEW YORK, AMBRICAN INSTITUTE FAIR BUILDING, Nov. 4, 1871.

E. M BOYNTON, 80 Beekman St., New York-Sir: This certifies flat 1 saw the Lightning (Your Cut Saw, worked by Land, by two men and saw cut off a sound Sx9 inch clestetleg in 3 2 4 seconds; and 16 cuts of same, continuously, in two minutes and 18 seconds, or at the rate of a cord of wood in less than nipe minutes. I am satisfied that for all purposes of cross-cutting large and small timber, your cross-cilt and wood saws have no rival in speed, in case and in simplicity. I be inverteir universal use would save a vast amount of money and time, and lighten the toil of

millions of men. J. W. BLAKE Superintendent and Engineer, American Institute Fair,

N. B. These extreme tests are quoted merely to prove what should be obvious-that direct cutting better than the old V friction process used by all other sams. Honest hardware men will procure the genuine for their customers, even if they are overstocked with nferiorigoods, but where they do not keep them, agents are wanted.

N B. Millions of axes are used for cutting wood: a Lightning Cross Cut Saw, either for one man or for two, will cut five times as fast as an axe. Why not try them ? Also, Lightning Ice Saws, 4 to 6 feet ong, suitable for general use.

See that the name and warrant are on each saw .

the noint ichind the others consecuently a its and clears only with outside edges. No slant cut to guar out. It one point of M touth was set one way and one the other, the slant would ride and lift out the tooth.

. 3d. Unts at a direct or opposite angle to the old V too'h saw, beneath all sawdust, as a plow instead of a harnow

4th. Are edged with an oil stone, after filing toeth.

5th. These are the only patent direct cutting and charring testil known for cross cutting saws; cut faster, ensier than any other, and are, with present form, as simple to sharpen as the old V tooth, as M shape.

BOYNTON'S PATENT LIGHTNING SAW.

This gas possesses several great advantages over the ancient V tooth, which has hitherto been relied on, especial oun cross-cut saws, the strongth stillness and durability of these teeth, and their capacity for deep guinning are so, bylous that we will only name four other points of comparison, viz: Speed. ease, simplicity and perfect clearater.

SPEER - Ail are aware that an ordinary hand saw cuts only one wry; i. e. the front cut is more effective than the back, or retreating out. These texts, with their opposite cutting faces, cutting in line, are equivolent to the front cut both ways of the hand saw, in distinction to the back cuts of theold V saw. Hence speed is it evitable.

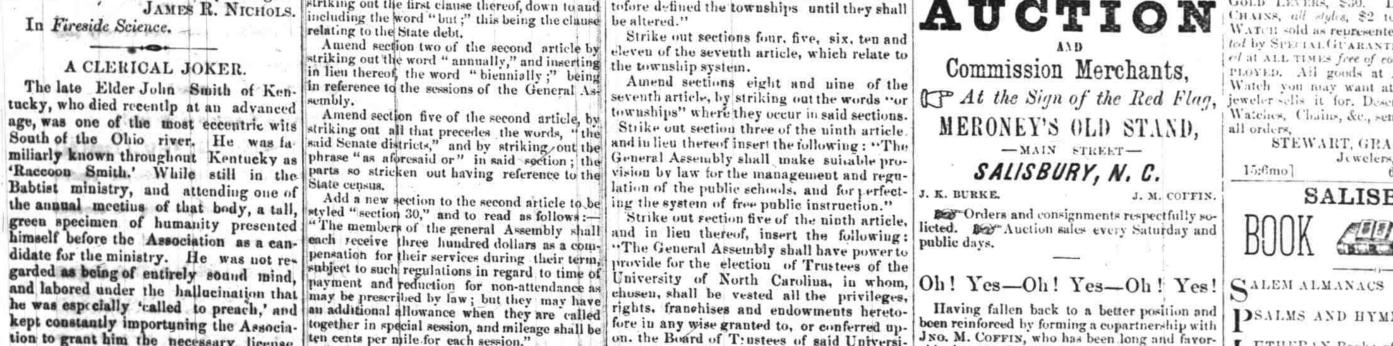

EASE by UCTTING .- It is easier to plow a grove in timber than to crush one out. The application of this principle is very perfect, all the textubeing of even length, double pointed, cut with outside vertical and projecting edges, and clear simultarectusly will the sense. Simplicity .- This is obvious, all the points being like landsaw teeth. viz: the same length. No

hooks, or thick raking teeth, to be shortened, only one will hie is required to keep them in order, and they are asy tor the unskilled laborer to sharper as the old fashioned saw.

PERFECT CLEARANCE. -- Continuously cutting and clearing, there opposite " cutting faces" not only cut, buticlear, by lifting the fibre above the projecting bindes, like a plow, which is the most perfect clearing inmlement.

By their eircolar we see that two Boyr ton brothers, by hand, cut off a twelve-inch sycamore (buttonwood) tog in eight seconds, before Major General Meade and other distinguished men, at Independence Square. Philadelphia. September 1, 1869. We also rote as a proof of the case that permits sustained effort, the sawing, by hand, of twenty-x couds of hard beech, maple, elm, ash, and hickory wood in eight hours (including lost time) in Michigan. Such work, by two men, with one saw once, filed is wonderful

These Saws are made and sold by Mr. E. M. Boynton, 80 Beekman street, New York, and are protected by faur extents, dated respectively 27, 1866, July 23, 1867, January 14, 1868; July 27, 1866 We trust that the inventors of so valuable an improvement, in an article of such universal use as the saw, will be able to enjoy the fruit of their labors free from intringement or piracy of any kind. - laos AGE, APRIL 7, 1870.
