The young fiend, Walworth, who shot his fither a few days ago in New York City, now sets up the plea of insanity as an excuse for his hogrible crime. It is to be hoped that this specious plea will not save him from a punishment he so richly deserves. It would be better for the world if such unnatural monsters were speedily put out of the way. All the parties connected with this horrible tragedy are said to be highly respectable. This may be; but we are inclined to think that so brutal a son must have sprung from an unnatural mother; and that the responsibility of the fearful crime rests upon her soul. The young man seems to have been all his life under the special guardianship and tutorial care of his mother, to whom he was devotedly attached. If this is true, and we are willing to admit that a mother's influence is worth anything, the conclusion is irresistable that her influence over him was bad, and that he had been gradually schooled and trained by her for the perpetration of the revolting deed. It requires a good deal of persuasion to make first degree. one believe a doting mother capable of inciting her son to the commission of a crime so horrible as parricide; but when we remember the immense influence a good mother exerts over her child ! how completely and wonderfully his every action is made to conform to her will, and how easily perfect obedience is exacted from him by the gentle, god-fearing mother, we are inclined to hold her mainly responsible for his actions. There is no other relation that can exert such a power for good or evil over the child as the mother; and we believe that where children, she ought to be held morally accountable for their conduct, for she, above all others, is most capable of rearing or moulding them so as to exercise a controlling influence over them a particeps criminis to this blackest of murders. We know that many will say, without due

reflection, that the father is wholly responsible; that by his alleged desertion and brutal treatment of his wife, he had prepared the son for this fearful crime. We have no doubt that the father was greatly to blame; but taking it for granted that all alleged against him is true, there is still no justification for the deed and no excuse for the mother who might have preventing deeds of blood.

During the war there was such earnestness and prayer, and heroism, that the whole nation was lifted to a higher tone, and it seemed as if with victory, a noble career was opened to the land. But, now that twice the years of the war have pass ed, there is such corruption as has never been seen in the nation's history. Currup tion of public officials, corruption in the sent by mail, post paid on receipt of 25 cents party which was foremost in loyalty durng the war, alliance for party ends with men of known want of principle, a feverish thirst for speculation, an era of crim a weakening of family feeling and purity -these things are most ominous, and especially since they are demoralizing in their influence on the best of men.

My friends, if there is any man whom SECOND. from the bottom of my heart I pity, it is the man who believes that all mankind are cheats and swindlers, and who considers life merely a game of grasping and griping.
