SIMMONS' LIVER REGULATOR

This unrivaled Southern Remedy is warranted not to contain a single particle of MERCURY, or any injurious mineral substance, but is PURELY VEGETABLE.

Containing those Southern Roots and Herbs, which an all-wise Providence has placed in our country where Liver Diseases most prevail. It will Cure all Diseases caused by Derangement of the Liver.

The SYMPTOMS of Liver Complaint are a bitter or bad taste in the mouth; Pain in the Back, Sides or Joints, often mistaken for Rheumatism; New Spasms; Loss of Appetite; Bowels altered, usually constipated and lax; Headache; Loss of memory, with a painful sensation of having failed to do something which ought to have been done; Debility, Low Spirits, a thick yellow appearance of the Skin and Eyes, a dry Cough often mistaken for Consumption. Sometimes many of these symptoms attend the disease, at others, very few; but the LIVER, the largest organ in the body, is generally the seat of the disease, and if not regulated in time, great suffering, wretchedness and DEATH will ensue.

The Great Unfailing SPECIFIC will not be found the Least Unpleasant.

For DYSPEPSIA, CONSTIPATION, Jaundice, Bilious attacks, SICK HEADACHE, Colic, Depression of Spirits, SOUR STOMACH, Heart Burn, &c., &c.

Simmons' Liver Regulator, or Medicine, is the Cheapest, Purest and Best Family Medicine in the World!

MANUFACTURED ONLY BY
J. H. ZEILIN & CO.,
Macon, Ga. and Philadelphia, Pa.
Price, \$1.00. Sold by all Druggists.

FOR SALE BY THEO. F. KLUTZ,
Salisbury, N. C.

COME TO THE BOOK STORE EVERYBODY.

And get Bibles, Prayer Books, Hymn Books of any kind you want; Histories, Biographies, Music Books, Music, Novels of the best authors; Blank Books, Albums of the most stylish kind; Stereoscopes and Views; School Books, all kinds in general use; Slates, Inks, Writing Paper of the best quality; Wall Paper and Window Shades in great variety; Music Teachers for vocal, Piano, Banjo, Violin &c.

A WORD TO FARMERS.

Buy a few dollars worth of books every year for your sons and hands and take a good newspaper, they will work better and be more cheerful. Try it.

A WORD TO FARMERS' SONS.

You have something to be proud and to boast of. The farm is the keystone to every industrial pursuit. When it succeeds all prosper; when it fails, all flag. Don't think you can't be a great man because you are the son of a farmer. Washington, Webster and Clay were farmer's sons, but while they tilled the soil, so do you. Buy a good book, get a time, read and digest it, and then do better.

Call and see me and look over books.

COME TO THE PHOTOGRAPH GALLERY,

And Get a Good Picture.

We will give you a good picture or not let you take it away; for we don't intend that any bad work shall go from this office to injure us and the business. Call and try.

Up Stairs between Parkers and Miss McMurray's.

Call and examine my stock of Wall Paper, Window Shades, Writing Paper, Inks, &c. Mind I don't intend to be under sold.

Feb. 27, ft.

LINDSAY'S MIASMA ELIXIR.

THE GREAT POISON NEUTRALIZER.

A Sure Preventive and certain cure for GONORRHOEA AND FEVER, all species of Miasmatic diseases. Send for circular.

Dr. J. Walker's California Vinegar Bitters

are a purely Vegetable preparation, made chiefly from the native herbs found on the lower ranges of the Sierra Nevada mountains of California, the medicinal properties of which are extracted throughout without the use of Alcohol. The question is almost daily asked, "What is the cause of the unparalleled success of VINEGAR BITTERS?" Our answer is, that they remove the cause of disease, and the patient recovers his health. They are the great blood purifier and a life-giving principle, a perfect Renovator and Invigorator of the system. Never before in the history of the world has a medicine been compounded possessing the remarkable qualities of VINEGAR BITTERS in healing the sick and curing disease.

The properties of DR. WALKER'S VINEGAR BITTERS are Aperient, Diaphoretic, Carminative, Nutritious, Laxative, Diuretic, Sedative, Counter-Irritant, Sudorific, Alterative, and Anti-Bilious.

Dr. Walker's Bitters proclaim VINEGAR BITTERS the most wonderful Invigorant that ever sustained the sinking system.

No Person can take these Bitters according to directions, and remain long unwell, provided their bowels are not distended by mineral poison or other means, and vital organs wasted beyond repair.

Bilious, Remittent and Intermittent Fevers, which are so prevalent in the valleys of our great rivers throughout the United States, especially those of the Mississippi, Ohio, Missouri, Illinois, Tennessee, and Arkansas, Red, Colorado, Brazos, Rio Grande, Pearl, Alabama, Mobile, Savannah, Roanoke, James, and many others, with their vast tributaries, throughout our entire country during the Summer and Autumn, and remarkably so during seasons of unusual heat and dryness, are invariably accompanied by extensive derangements of the stomach and liver, and other abdominal viscera. In their treatment, a purgative, exerting a powerful influence upon these various organs, is essentially necessary. There is no cathartic for the purpose equal to Dr. J. WALKER'S VINEGAR BITTERS, as they will speedily remove the dark-colored viscid matter with which the bowels are loaded, at the same time stimulating the secretions of the liver, and generally restoring the healthy functions of the abdominal organs.

Purify the body against disease by purifying all its fluids with VINEGAR BITTERS. No epidemic can take hold of a system thus fore-armed.

Dyspepsia or Indigestion, Headache, Pain in the Shoulders, Coughs, Tightness of the Chest, Dizziness, Sour Eructations of the Stomach, Bad Taste in the Mouth, Bilious Attacks, Palpitation of the Heart, Inflammation of the Lungs, Pain in the region of the Kidneys, and a hundred other painful symptoms, are the offspring of Dyspepsia. One bottle will prove a better guarantee of its merits than a lengthy advertisement.

Serofula, or King's Evil, White Swellings, Ulcers, Erysipelas, Swelled Neck, Goitre, Scrofulous Inflammations, Indolent Inflammations, Mercurial Affections, Old Sores, Eruptions of the Skin, Sore Eyes, &c. In these, as in all other constitutional diseases, WALKER'S VINEGAR BITTERS have shown their great curative powers in the most obstinate and intractable cases.

For Inflammatory and Chronic Rheumatism, Gout, Bilious, Remittent and Intermittent Fevers, Diseases of the Blood, Liver, Kidneys and Bladder, these Bitters have no equal. Such Diseases are caused by Vitiated Blood.

Mechanical Diseases.—Persons engaged in Paints and Minerals, such as Plumbers, Type-setters, Gold-beaters, and Miners, as they advance in life, are subject to paralysis of the bowels. To guard against this, take a dose of WALKER'S VINEGAR BITTERS.

For Skin Diseases, Eruptions, Tetter, Salt-Rheum, Itchiness, Spots, Pimples, Pustules, Boils, Carbuncles, Ring-worms, Scald-head, Sore Eyes, Erysipelas, Itch, Scrofulous Discharges from the Skin, Humors and Diseases of the Skin of whatever name or nature, are literally dug up and carried out of the system in a short time by the use of these Bitters.

Pin, Tazo, and other Worms, lurking in the system of so many thousands, are effectually destroyed and removed. No system of medicine, no vermifuge, no anthelmintic will free the system from worms like these Bitters.

For Female Complaints, in young or old, married or single, at the dawn of womanhood, or the turn of life, these Tonic Bitters display so decided an influence that improvement is soon perceptible.

Cleanse the Vitiated Blood whenever you find its impurities bursting through the skin in Pimples, Eruptions, or Sores; cleanse it when you find it obstructed and sluggish in the veins; cleanse it when it is full; your feelings will tell you when. Keep the blood pure, and the health of the system will follow.

TERRELL AND JAMES.

Livery, Sale and Feed Stable, SALISBURY, N. C.

We have thoroughly repaired and renovated the well known and popular MANSON HOUSE Stable, and are prepared to accommodate our patrons with a call. Will keep for hire good safe Horses and Buggies, and Saddle Horses, at moderate prices. Also, good Hacks for excursions parties, &c. Will board Horses by the single feed, day, or month, on special contract. We have a large and commodious lot for the accommodation of country people, and Drovers Especially.

TO STOCK FARMERS:

We also announce to the Farmers of Rowan and adjoining counties, that we have purchased a fine young Stallion, 5 years old next June. Rebel is a beautiful mahogany bay, and perfect kind in harness. We will send him to Virginia; he by Michael and Rebel Denny; ganees; he by Sir Archie; his dam by Fanny Lucas; she by Waterloo; she by Standard; she by Monsieur Tonson. Young Rebel is a thoroughbred by his sire and from a strain of good qualities and supposed to be of fine blood. Rebel's style and beauty, when seen, is sufficient advertisement.

Young Rebel took the first premium at N. C. State Fair. We offer his services at Stable this Fall Season on the following terms: Single service, \$5. for Season of 3 months from Nov. 1st, \$10. For Insurance, \$15—money due at the end of the Season, and as soon as the mare proves to be in foal. The charge of procreation, in either instance, will forfeit the Insurance. The mare and foal will be held responsible for the Insurance. Will use every precaution to prevent accidents. We will not be responsible for any that may occur. Will be thankful for a share of public patronage and will endeavor to give satisfaction.

Nov. 1, 1873 3m) T. & J.

\$10 to \$20 per day. Agents wanted every where. Particulars free. A. H. BLAIR & Co. St. Louis, Mo. Nov. 6 1873-17.

R. R. R. RADWAY'S READY RELIEF CURES THE WORST PAINS

In from One to Twenty Minutes. NOT ONE HOUR

after reading this advertisement need any suffer from RHEUMATISM, GOUT, BRUISES, SCALDS, BURNS, &c.

The Only Pain Remedy

that instantly stops the most excruciating pains, allays inflammation, restores the system, and cures the most obstinate cases of RHEUMATISM, GOUT, BRUISES, SCALDS, BURNS, &c.

WILL AFFORD INSTANT RELIEF

INFLAMMATION OF THE BLADDER, CONGESTION OF THE LUNGS, SORE THROAT, DIFFICULTY OF BREATHING, PALPITATION OF THE HEART, HYPERTROPHY OF THE LIVER, INFLUENZA, HEADACHE, GOUT, RHEUMATISM, COLD CHILLS, AGUE CHILLS, &c.

FEVER AND AGUE.

FEVER AND AGUE need for fifty cents. There is not a remedial agent in the world that will cure Fever and Ague, and all other fevers, so quickly and so surely as RADWAY'S READY RELIEF. Fifty cents per bottle.

HEALTH! BEAUTY!!

STROG AND PURE BLOOD—INCREASE OF FORCE AND VIGOR—A BEAUTIFUL COMPLEXION SECURED TO ALL.

DR. RADWAY'S Sarsaparillian Resolvent.

THE GREAT BLOOD PURIFIER.

HAS MADE THE MOST ASTONISHING CURES. SO QUICK, SO RAPID, AND SO COMPLETE, THAT IT IS THE ONLY TRULY WONDERFUL MEDICINE.

Every Day an Increase in Flesh and Weight is Seen and Felt.

Every drop of the SARSAPARILLIAN RESOLVENT cleanses the blood, drives out the impurities, and restores the system to its normal state. It is the only medicine that will cure the most obstinate cases of RHEUMATISM, GOUT, BRUISES, SCALDS, BURNS, &c.

Kidney & Bladder Complaints,

Urinary and Womb Diseases, Gravel, Diabetes, Dropsy, Hemorrhage of Water, Incontinence of Urine, Stricture, Gonorrhoea, Syphilis, &c. In all cases where there are any discharges from the urinary organs, or where the urine is thick, or where there is any pain in the back, or where there is any swelling of the bladder, or where there is any difficulty in passing the urine, or where there is any other complaint of the urinary organs, RADWAY'S SARSAPARILLIAN RESOLVENT will cure it.

Tumor of 19 Years' Growth Cured by Radway's Resolvent.

DR. RADWAY'S Perfect Purgative & Regulating Pills

DR. RADWAY'S Perfect Purgative & Regulating Pills

perfectly tasteless, elegantly coated with sweet gum, sugar, and pepsin, and perfectly safe. They are the only pills that will cure the most obstinate cases of RHEUMATISM, GOUT, BRUISES, SCALDS, BURNS, &c.

THREE CRIMES.
A Terrible Story.
[Detroit Free Press, Nov. 4.]

On Tuesday last a man named Lyman Arnold, a business man at Avoca, Steuben county, N. Y., left the town without informing his wife or friends of his departure, and before night it was discovered that he had forged notes and checks to the amount of \$900, and obtained the cash on them. He was the husband of a very estimable woman, his second wife, and is the father of four or five children. From some words he let drop the day before, it was thought that he had started for Detroit, and a telegram was sent there. The Chief of Police gave the case to Detective Bishop, and the detective began working it up. After sending the telegram the route taken by Arnold was more exactly ascertained, and Deputy Sheriff E. B. Higgins, of Avoca, started on the trail. He was fortunate to find the forger at Niagara Falls, just as he was preparing to come West, and he took him back to Avoca, arriving there Thursday, to find that a mysterious murder had been committed during his absence.

Living in the village was a young woman named Emeline Tower who, had once worked for Arnold as a domestic. There was talk that the two were more intimate than they should have been, and the village gossip had created unpleasantness in Arnold's family, so that Miss Tower did not visit the house and was not on speaking terms with Mrs. Arnold. There was, however, no suspicion of a separation between husband and wife, or of the horrible crime to grow out of the scandal. Arnold was supposed to be an honest man, and there were those who took his side and defended him, Wednesday night about midnight Mrs. Arnold, who was sleeping alone, was aroused by having a bullet shot into her head, which passed out her mouth. As she sprang up a person in the room fired two more shots, both taking effect in Mrs. Arnold's body, and both producing fatal wounds. There was no light in the room, but in the darkness Mrs. Arnold heard the rustle of a dress and saw a female figure, as soon as the wife fell back dying the figure fled.

It was some time before any of the children came down stairs, they having been chloroformed, as was afterwards ascertained. They aroused the neighbors at once, and the dying woman made her statement about the female figure, though at the time it was thought she was out of her mind and was speaking at random. It was found that the person who had committed the deed had effected an entrance by climbing upon the kitchen roof, and then raising one of the chamber windows of the house. Miss Tower knew of this route, but no one else outside of the family.

On Thursday morning, after the murder had become known throughout the village, and after she had discussed the affair in common with others, Miss Tower took the cars for Detroit. This circumstance, in connection with the hint dropped by Arnold that he was coming this way, led to the belief that the two were connected with the murder, and were going off together.

A telegram was sent here asking that the woman be watched. She arrived here on Saturday morning and registered herself at the Cass House under the name of Mrs. Hunt. The same morning a trunk belonging to Arnold arrived by express marked "Mrs. L. Hunt, Cass Hotel, Detroit," indicating that the two had arranged their plans together and were to meet here. Arnold, of course did not reach here, being under arrest. The woman waited until Saturday, and then, perhaps thinking that he had been captured, she took the train to Dexter, and from there drove out to her uncle's, seven miles north, in the township of Dexter. Detective Bishop had kept track of her movements, and when Sheriff Higgins arrived here on Saturday night the detective was ready to go with him.

On Sunday they went to Dexter, and then procuring a carriage drove to Linden, reaching the house where Miss Tower was stopping two hours after the family had retired. She was called up and arrested, but was the least excited of the three, bearing herself coolly and not even exhibiting any curiosity to know the charge against her. In her trunk was found a revolver with three empty chambers, and the ball brought along from the scene of the murder was an exact fit for the weapon. Further than this, she had a bottle partly filled with chloroform.

On her way into the city she was informed of the murder and of the arrest of Arnold, but she had few questions to ask, no excuses to offer for her conduct, and up to yesterday morning, when she started for New York, she had not shed a tear. The woman is twenty-six years of age, of medium height, and quite handsome. The Sheriff is positive that she is the midnight stranger who did the shooting.

Eloped with His Own Wife.

The Springfield (Mass.) Republican states that a Lowell man has just eloped with his own wife. He deserted her for another woman seven years ago, and she went to California and got rich, and returning a few days ago found him repentant and quite tender towards her and her money, so they met by appointment at the depot and eloped in due form, California being the objective point.

Corn Beef.—The Scientific American informs the Ladies that if they would have corned beef jelly after it is cold, and not as dry as a chip, they should put it into boiling water when they put it out to cook, and they should not take it out of the pot when done, until cold.

The Original Limits of North Carolina.

When, in November, 1789, North Carolina acceded to the Union, it was composed of States, with a single exception, lying on the Atlantic. To-day, after a lapse of sixty years, her senators and representatives are discussing the admission of a young and wealthy territory lying on the Pacific and fronting the ancient empire of China. I presume that it is not generally recollected that this territory, some three thousand miles to our west, was originally a part of North Carolina. In the charter given by Charles II. of England, to certain of his countries, Carolina contained all the land lying between the Atlantic and Pacific Oceans within the parallel of 29° and 36° of north latitude. Its northern limits entered the Pacific at the Bay of Monterey, only a few miles south of that of San Francisco, and is famous as the line of the Missouri Compromise. Its boundaries contained the present States of North and South Carolina, Georgia, Tennessee, Alabama, Mississippi, Louisiana, Arkansas, almost all of Texas, a large part of Florida, a large part of the territories of Old and New California, and New Mexico; and portions of the Mexican provinces of Sonora, Chihuahua, and Coahuila. This magnificent tract, feeding at present five millions of inhabitants, was made in consideration of a yearly rent of sixty-four dollars and thirty-seven cents, together with one-fourth of all the silver and gold ore which might be found in it. Although this might during late years have been a respectable income, yet it is well known that the royal donor never realized anything from his stipulated return, no gold or silver having been discovered within these bounds—at least to no considerable amount—until after the Revolution. Such continued to be the limits of Carolina until the peace of 1763, when the land lying west of the Mississippi was ceded by Great Britain to France. Having subsequently become the property of Spain, it participated in the revolt which some thirty years ago resulted in the erection of the republic of Mexico; our own eyes have seen a large part of it reannexed to the destinies of its parent State.—S. F. Phillips.

Why the Tornado Captured the Virginia and Why the Captured Passengers were Shot.

As far back as 1869 the Captain-General of Cuba threatened to detain and search any vessel in Cuban waters suspected of carrying arms and ammunition to the insurgents. Secretary Fish protested against the execution of this threat in the case of an American vessel. The decree was shortly afterward modified by the Spanish Government to obviate the otherwise inevitable recognition by us of the fact that war was going on in Cuba. At that date General Rawlins was still alive.

Shortly after this modification, and as if to defy the United States, the American steamship Florida was detained by Spanish ships and searched on two occasions, not in Cuban waters, but on the high seas; once just outside the Danish waters of St. Thomas, and again just outside the British waters of Nassau. These insults to our flag and to international law were allowed by Secretary Fish to pass unexplained and unresented. And now what wonder that Spanish naval officers should reply upon our cowardice, and presume upon the immunity vouchsafed them, to repeat their outrages wherever and whenever a navy opportunity occurs. Or why should anybody be surprised that the Spanish Government, which has learned by ample experience that the threats of Secretary Fish are empty words, should instruct its officers to disregard them?

These facts suffice to account for an occurrence that would certainly arouse the universal indignation of any nation but his. But there is another fact far more potent, and unfortunately for our national honor, far more disgraceful. Spain through her Ministers in Washington has learned the efficacy of a liberal use of money where it would do the most good, and has aptly availed herself of the knowledge. And even under the present circumstances any departure from Mr. Fish's traditional policy would probably be not unjustly regarded as a direct violation of a bargain.

The Spanish agents and their allies in this city have circulated a rumor that the Virginia at the time of her capture had hoisted another flag; but they know full well that the commander of the Tornado flag except the stars and stripes. The Spaniards of Santiago shot four of the captured passengers, because, although they knew the charge of piracy was absurd, and would not be allowed to any other power on earth—indeed, it had just been abandoned by Spain herself in the surrender of the British yacht Deerhound with her officers and crew—they also knew that they had paid defenders in this country by whom any little difficulty would be arranged amicably, as family difficulties ought to be.—N. Y. Sun.

The Fashionable Scant Effect.

[Mrs. Barnham's Letter to St. Louis Republic.]

The extreme phase of the fashionable scant effect was reached Sunday by a lady who walked up Fifth avenue in a navy blue calico-hair dress. Not a pucker or a visible seam, or a particle of trimming, broke up the beautiful surface of that woman. She was an unbounding level, and how she got into that straight-jacket of a dress I couldn't imagine till I took a rear view of her, and found she was laced up behind from neck to hem. Two unobtrusive box-plaits lurked in a shy way each side the opening; otherwise that garment looked like a biqueted pantalooleg. And walk—well she couldn't walk very well, and in case of fire that woman would be fried in her own fat.

A Word to Planters.

The Athens Watchman has the following excellent advice to the farmers: "MORE BREAD AND LESS COTTON." Let this, in the future, be the watchword of Southern planters. If our people now had their cornfields, barns and smokehouses well filled, and had saved their domestic manure (which for want of attention, is suffered to run to waste) instead of creating liens to purchase guano, they could snap their fingers in the face of Monsieur Panic.

The great desideratum with planters has always been a plan by which to secure him prices for cotton. Many experiments have been suggested—many learned essays have been written—many impracticable plans suggested. Notwithstanding all these failures, there is a plan so simple, so certain and efficacious, that it is absolutely amazing that it has not been adopted long ago. It will secure the object sought, beyond all peradventure—it cannot possibly fail.

Let Southern planters raise their own supplies of bread, meat and domestic animals, and let manufacturers of all the common necessities of life be established in our midst and no cotton sold for less than 25 cents! Planters have the remedy in their own hands—it is simple, safe and certain—as simple as the prophet's prescription for the cure of Naaman's leprosy. Why will they not adopt it? Is it because, like Naaman, they desire to be so much "great thing"?

So long as cotton has to pay for corn, bacon, flour, horses, mules, clothing, agricultural implements, furniture, groceries, and even manure, it will require all the cotton we can make to purchase these supplies—and under the inexorable laws of supply and demand, the larger our crops are the lower will be the price of the commodity.

What profit is it to the planter to make a hundred bales of cotton, if it requires one hundred and ten bales to pay for his family supplies, including guano? Is it not indefinitely better to make but 25 bales at 25 cents per bale, and his own supplies? Whatever the cotton brings will be clear profit. The planter will then have capital to invest in manufactures, or otherwise.

This is no empty theory. It is a well established fact. Any planter look around him and inquire who has been compelled to borrow money to carry on farming operations. It is the cotton planter who goes "the whole hog" on cotton. From whom does he borrow? From the man who raises, first, his own provisions, and afterwards, what cotton he can make. Is not this always true? No one will pretend to dispute it. What is good for one individual, is good for the whole community.

Let our Southern planters adopt the policy recommended, and instead of being "hevers of wood and drawers of water," they will become the most prosperous agricultural people the sun ever shone upon.

HEAVY ON COLLEGE-BRED CONGRESSMEN.

The Nation has an article on the members of Congress who have had the benefit of College life and those who have been less fortunate, and more fortunate, if its criticism is just. We do not question the correctness of its criticism, not knowing very much about the intellectual status of our present Congress. The Nation thinks that college men are not the ablest men in Congress. Some of them would never be taken for the alumni of any respectable institution of learning. We dare say that this is true, for we have known many graduates of colleges who were in the truest sense of the words—very badly educated men. It says:

"For instance, Mr. Trumbull did not have the advantages of university training; but his esteemed colleague, Gen. Logan, was graduated at Louisville University. Mr. Poland of Vermont was as unfortunate as Mr. Trumbull; but our much respected friend, Gen. Butler, is, classically speaking, an alumnus of Waterville. Some men of whom one would feel sure that they had received the benefit of college training and associations did not; and most notably, Messrs. Bayard, Coakling, Sherman, Thurman, and Edmunds. Others again, as to whom one might safely make oath that they had never seen a college save through the windows of a railway car, are recorded as having received a collegiate education; and among them are Mr. Pomeroy of Kansas, Mr. Conner of Texas, and Mr. Voorhees of Indiana." It says further, that "the records of Congress show that the common boast is true that men of the humblest position can rise to the honor of governing the country; but they also show that the honor becomes very small and is continually growing less."

To the cultivated and refined there is nothing more distasteful than to be compelled to mingle with undignified, uneducated, self-assuming colleagues.

BOYS, NOTE THIS!—Don't forget to take off your hat when you enter the house. Gentlemen never keep their hats on in the presence of ladies, and if you always take yours off when mamma and the girls are by, you will not forget yourself or be mortified when a guest or a stranger happens to be in the parlor. Habit is stronger than anything else, and you will always find that the easiest way to make sure of doing right on all occasions is to get in the habit of doing right. Good manners cannot be put on at a moment's warning.

Kemper's majority in Virginia is 27,903 a gain over Walker's vote of 9,052. Kemper received a large number of colored votes—a good sign that this class is finding out its best friends and its true interest.—Hillsboro Recorder.

Milk in Winter.—A great many farmers have plenty of milk in summer, but run out of the article in winter or rather their cows run out of it. They fail to supply the article when called for. Now milk is a good thing, a good article of diet, good for infants and old folks, good to furnish cream and butter, and every one who pretends to be a farmer ought to have plenty of it all winter. But to have it, there are certain requisites. One of these is warm shelter; another is plenty of nutritious food; and another still is kindness in caring for so good an animal. Why, a good cow is one of the family almost. Everybody should have a kind word for her. She should be looked up to with respect. If there is anything dainty in the food line for such animals, she should have it. If a good big quantity of the rich lactated food is wanted, she should be regaled twice a day with some nice warm slop or bran and corn meal. You can no more get much milk from dry milk, than you can get blood from a turnip. We wait every body to have plenty of milk, and we wait cows to have warm shelter and plenty of food to furnish it.

SUICIDE OF NINE CHINESE GIRLS.—A recent China newspaper publishes the following account of an incident which is reported to have taken place at Whampoa: "Nine young girls, living with different families in the village, seem to have entertained an aversion to married life. Seeing the misery and toil to which the members of the families with whom they lived were subjected, and above all the slave-like obedience of wives to the wills of their husbands, the damsels in question came to the resolution of putting an end to their earthly careers, which is here carried into effect by a different mode *operandi* to that of opium-poisoning, in vague in Hong Kong. The nine damsels met by appointment on the bank of the river, at the entrance of one of the creeks in the vicinity of 'Brown's Folly,' situated in heavy winter garments, which they had sewn all together, in order to prevent a separation. While they waited on the bank, heart and mind, the damsels plunged to the deep. As this happened close to the time of the festival of the seven female geni, descended from heaven and so called the 'seven sisters,' all sorts of superstitious conclusions are drawn from it."

The Charlotte Observer says: Capt. Shotwell, while in Grant's Albany Battery, was employed in making ladies shoes. He says the institution turned out two thousand pairs per day, but he felt sorry of heart, and mind, the damsels plunged to the deep. As this happened close to the time of the festival of the seven female geni, descended from heaven and so called the 'seven sisters,' all sorts of superstitious conclusions are drawn from it."

As this happened close to the time of the festival of the seven female geni, descended from heaven and so called the 'seven sisters,' all sorts of superstitious conclusions are drawn from it."

The Charlotte Observer says: Capt. Shotwell, while in Grant's Albany Battery, was employed in making ladies shoes. He says the institution turned out two thousand pairs per day, but he felt sorry of heart, and mind, the damsels plunged to the deep. As this happened close to the time of the festival of the seven female geni, descended from heaven and so called the 'seven sisters,' all sorts of superstitious conclusions are drawn from it."
